

ACKNOWLEDGEMENTS

Praise the Lord Almighty for His blessings unto the author during the completion of this final project report. The final project entitled "CHARACTERIZATION OF PROTEASES PRODUCED FROM INDONESIAN *Bacillus licheniformis* MUTANTS F11.1 AND F11.4" was conducted in order to fulfil requirement for obtaining the bachelor degree in Food Technology Universitas Pelita Harapan.

The author realizes that the final project and the report could not be completed without helps, prayers, supports, and guidances from many parties. In this opportunity, author feels that it is necessary to deliver gratitudes to those parties who give their supports, either directly or indirectly, during final project and the completion of this report; including:

- 1) Prof. Maggy T. Suhartono, Ph.D. as the advisor who warmly delivered ideas, guidance, help, evaluation, and care to the author.
- 2) Mr. Jeremia Manuel, MP as the co-advisor who delivered brilliant opinions, advices, and evaluations to the author.
- 3) Ms. Julia Ratna Wijaya, MAppSc. as the Deputy of Food Technology Department and as academic advisor who watched over the author during study period; for her helps, guidance, care, and ideas.
- 4) Mrs. Nuri Arum Anugrahati, MP. as the Head of Food Technology Department.
- 5) Ir. W. Donald R. Pokatong, Msc., Ph.D. and Ms. Mery Tambaria Damanik Ambarita, S.Pi, M.Si. for the advices, evaluations and life values given.

- 6) Dr. Adolf Parhusip, as the Head of Microbiology Laboratorium in which the author conducted the final project research.
- 7) Mr. Yos, Mr. Rudy, Mr. Ade, Mr. Ace, and Mrs. Ika for the helps and kindness during final project research in laboratory.
- 8) All lecturers and staffs who delivered lectures and administration helps to the author during 3.5 years of study period of author.
- 9) Santoso Bunawan (Father), Mega Desrani (Mother), Justin Bunawan, and Jonas (Brothers) for the prayers, supports, loves, and cares. This final project is especially dedicated to you and our big family.
- 10) Amalia Cherisa, for the prayers, supports, cares, motivations, and helps to author.
- 11) Michael Wijaya and Joan Adera as trustworthy comrades of similar topic, for the helps, supports, cares, and opinions during final project experiment; as well as Charissa Lungkat, Novel Sari, and Alwi Koeswono Ely as fellow colleagues under same advisor.
- 12) Daffodilo Octo, Jayanto, Sandro Sugito, Tommy, Ibnu Hartono, Jeffri Junaidi, Erwin Santoso, Santoso, Daniel Kurniawan, and Rudy Martin for being best friends and giving their best supports to the author.
- 13) Mikhael Dominico, Purnamasari Antono, Adeline Kartika Putri, Jenifer Susilo, Diana Hartono, Cindy Novita, De'fanny Endy, Yuliana Suhalim, Shella Dharmawan, Liony Wihardja, Ricky Winata, Andre Danu Prasetyo, Yessica Oktaviani, Merica, Jessica Mulyadi, Dyana, Stephen Dewangga, Angelica Nathania, Lidwina Natalia Goenadi, Agustinus Adrian Arinta, Angelin Agustina, Wira Cahyadi, Ian Danarko, Dharmawan Laksana,

Veronica Ekajayanti Gunawan, Winna Carmelita, Jeffrey Soegianto, Malvin Agatho, and all ex of C class members of Food Technology Department year 2007 Universitas Pelita Harapan for the whole fun experiences, acceptance, and inspirations during study in Food Technology Department UPH.

- 14) Bernadette Putri Azalia, Winsia Julia Purnama, Anita Gozali, Veronica Jenny Tanzil, Valencia Claresta Kusumasari, Tobias, William, Jevica, Sesaria, Vienna Gozal, Andreas Tjoa, Febiana Tedja, Andrew Tandra, Steffi Agustine, Laura Herbani, and Victoria Budiman for becoming friends and inspirations during study in Food Technology Department Universitas Pelita Harapan.
- 15) All friends and close relatives who are not mentioned yet but have also supported the author during final project and completion of the report.

The author realizes that this report is not perfect, and the author might have done unexpected things during the final project and the completion of this report. The author would like to appreciate the readers for the concerns and suggestions given to this report. Finally, the author hopes that this report will be useful for the readers, especially for those conducting researches with similar topic.

Karawaci, February 2011

CHAPTER IV RESULTS AND DISCUSSION

4.1 Production of Crude Protease Derived from <i>B.licheniformis</i> mutants F11.1 and F11.4	50
4.2 Characterization of Crude Protease Derived from <i>B. licheniformis</i> mutants F11.1 and F.11.4	55
4.2.1 Optimum pH Determination of Crude Protease Derived from <i>B. licheniformis</i> mutants F11.1 and F11.4	55
4.2.2 Optimum Temperature Determination of Crude Protease Derived from <i>B. licheniformis</i> mutants F11.1 and F11.4	58
4.2.3 Effect of Addition of Several Substances to Activity of Crude Proteases Derived from <i>B. licheniformis</i> mutants F11.1 and F11.4 ...	62
4.2.3.1 Effect of Metal Addition to Activity of Crude Proteases Derived from <i>B. licheniformis</i> mutants F11.1 and F11.4	62
4.2.3.2 Effect of Inhibitor Addition to Activity of Crude Protease Derived from <i>B. licheniformis</i> mutants F11.1 and F11.4	67
4.2.3.3 Effect of Solvent Addition to Activity of Crude Protease Derived from <i>B. licheniformis</i> mutants F11.1 and F11.4	71
4.2.4 Food Product Specificity of Crude Protease Derived from <i>B. licheniformis</i> mutants F11.1 and F11.4	75
4.2.5 The Effect of pH to Stability of Crude Protease Derived from <i>Bacillus licheniformis</i> mutants F11.1 and F11.4	79
4.2.6 Effect of Temperature to Stability of Crude Protease Derived from <i>Bacillus licheniformis</i> mutants F11.1 and F11.4	83

CHAPTER V CONCLUSION AND SUGGESTION

5.1 Conclusion	88
5.2 Suggestion	89

LIST OF APPENDICES

	page
Appendix A. Results on spore-forming assay and Gram staining	A-1
Appendix B. Reagents for protease activity assay	B-1
Appendix C. Universal buffer formula.....	C-1
Appendix D. Protein standard curve	D-1
Appendix E. Standard curve for crude protease activity	E-1
Appendix F. Data for reconfirmation of incubation time determination of crude protease derived from <i>B. licheniformis</i> mutant F11.1	F-1
Appendix G. Data for reconfirmation of incubation time determination of crude protease derived from <i>B. licheniformis</i> mutant F11.4	G-1
Appendix H. Data and statistical analysis for optimum pH determination of crude protease derived from <i>B. licheniformis</i> mutant F11.1 at 60°C.....	H-1
Appendix I. Data and statistical analysis for optimum pH determination of crude protease derived from <i>B. licheniformis</i> mutant F11.4 at 60°C.....	I-1
Appendix J. Data and statistical analysis for optimum temperature determination of crude protease derived from <i>B. licheniformis</i> mutant F11.4 at pH 10.0.....	J-1
Appendix K. Data and statistical analysis for optimum temperature determination of crude protease derived from <i>B. licheniformis</i> mutant F11.4 at pH 10.0.....	K-1
Appendix L. Data and statistical analysis for effect of metal addition to activity of crude protease derived from <i>B. licheniformis</i> F11.1 (60°C, pH 10.0)	L-1

Appendix M. Data and statistical analysis for effect of metal addition to activity of crude protease derived from <i>B. licheniformis</i> F11.4 (60°C, pH 10.0)	M-1
Appendix N. Data and statistical analysis for effect of inhibitor addition to activity of crude protease derived from <i>B. licheniformis</i> F11.1 (60°C, pH 10.0)	N-1
Appendix O. Data and statistical analysis for effect of inhibitor addition to activity of crude protease derived from <i>B. licheniformis</i> F11.4 (60°C, pH 10.0)	O-1
Appendix P. Data and statistical analysis for effect of solvent addition to activity of crude protease derived from <i>B. licheniformis</i> F11.1 (60°C, pH 10.0)	P-1
Appendix Q. Data and statistical analysis for effect of solvent addition to activity of crude protease derived from <i>B. licheniformis</i> F11.4 (60°C, pH 10.0)	Q-1
Appendix R. Data and statistical analysis for food product specificity to activity of crude protease derived from <i>B. licheniformis</i> F11.1 (60°C, pH 10.0)	R-1
Appendix S. Data and statistical analysis for food product specificity to activity of crude protease derived from <i>B. licheniformis</i> F11.4 (60°C, pH 10.0)	S-1
Appendix T. Data and statistical analysis for effect of pH to stability of crude protease derived from <i>B. licheniformis</i> F11.1 (60°C, pH 10.0)	T-1
Appendix U. Data and statistical analysis for effect of pH to stability of crude protease derived from <i>B. licheniformis</i> F11.4 (60°C, pH 10.0)	U-1
Appendix V. Data and statistical analysis for effect of temperature to stability of crude protease derived from <i>B. licheniformis</i> F11.1 (60°C, pH 10.0)	V-1
Appendix W. Data and statistical analysis for effect of temperature to stability of crude protease derived from <i>B. licheniformis</i> F11.4 (60°C, pH 10.0)	W-1
