ACKNOWLEDGEMENT

The writer would like to use this opportunity to express gratitude and appreciation towards all of the people that have helped out and provided support throughout the lengthy period in which the final project was planned and executed. This experience has given knowledge and input not only on intellectual level but also towards the development of writer’s critical thinking and as well as character development. Through the hospitality and guidance provided by educators in Institut Pertanian Bogor, writer has gained knowledge and well as valuable practical skills. With the completion of this report, writer would like to give thanks to all parties with each of their support.

1. Professor Maggy Thenawidjaja Suhartono, Ph.D. as the primary supervisor for her time, guidance and patience during the length of the project.
2. Natania, M. Eng. as co-supervisor for her insight and attention of details on the issues that came up during the experiments.
3. Nuri Arum Anugrahati, S.Si, MP as Head of Food Technology Department.
4. My mother and brother who provided support and understandings for any selfish actions that might have been performed.
5. Mr. Yos, Mr. Rudi, Ade, Mrs. Ika Malikhah, Mr. Ace Baehaki and many more parties who are too many to be mentioned for their hospitality and companion.
6. Dyana, Jessica M., Mikhael D., Jovian B., Michael W. and many more UPH students for their friendship and love.

Karawaci, March 2011

## CHAPTER I INTRODUCTION

1.1 Background .............................................. 1
1.2 Research Problem ....................................... 3
1.3 Objectives ............................................... 3
   1.3.1 General Objectives ................................. 3
   1.3.2 Specific Objectives ............................... 3

## CHAPTER II LITERATURE REVIEW

2.1 Food Allergens .......................................... 5
   2.1.1 Milk Allergen ........................................ 8
   2.1.2 Egg Allergen ......................................... 11
   2.1.3 Wheat Gluten ........................................ 13
CHAPTER III RESEARCH METHODOLOGY

3.1 Materials and Equipments ................................................................. 23
3.2 Research Procedure ........................................................................ 24
  3.2.1 Preliminary Research ................................................................. 24
    3.2.1.1 Protease Production and Extraction .................................... 24
    3.2.1.2 Effect of Incubation Period ................................................. 26
    3.2.1.3 Effect of pH .................................................................. 26
    3.2.1.4 Effect of Temperature ...................................................... 26
    3.2.1.5 Wheat Gluten Extraction .................................................. 27
    3.2.1.6 Ovomucoid Extraction ...................................................... 28
  3.2.2 Main Research .......................................................................... 29
  3.2.3 Analysis ................................................................................... 30
    3.2.3.1 Protein Quantification ....................................................... 30
    3.2.3.2 Protease Activity – Sigma Aldrich (1999) ......................... 31
    3.2.3.3 SDS-PAGE .................................................................. 33
    3.2.3.4 Zymography .................................................................. 34
    3.2.3.5 Bacterial Identification and Confirmation ......................... 35
3.3 Experimental Design ........................................................................ 37
  3.3.1 Preliminary Research ................................................................. 37
  3.3.2 Main Research .......................................................................... 39

CHAPTER IV RESULTS AND DISCUSSION

4.1 Ovomucoid Extraction ................................................................. 41
4.2 Gluten Extraction ........................................................................ 42

LIST OF APPENDICES

Appendix A  Gram and Endospore Staining of F11.1 and F11.4 .........................A-1
Appendix B  Bovine Serum Albumin Standard Curve ........................................B-1
Appendix C  Tyrosine Standard Curve ..............................................................C-1
Appendix D  Universal Buffer Formulation .......................................................D-1
Appendix E  Reagents Used in Bergmeyer Assay ............................................E-1
Appendix F  Effect Incubation Period on Protease Activity ..............................F-1
Appendix G  Effect of Temperature on Protease Activity ..................................G-1
Appendix H  Effect of pH on Protease Activity .................................................H-1
Appendix I  Proteolytic Activity on Food Allergens .........................................I-1
Appendix J  SDS-PAGE Analysis of Allergen and Its Hydrolyzed Products ........J-1
Appendix K  Zymography of Crude Protease F11.1 and F11.4 ..........................K-1
