

ACKNOWLEDGEMENTS

Greatest thanks to God that had always accompanied the writer with His blessing in accomplishing this thesis entitled “OPTIMUM CONDITON FOR N-ACETYL-GLUCOSAMINE PRODUCTION FROM TIGER SHRIMP (*Penaeus monodon*) SHELL USING EXTRACELLULAR CRUDE CHITINASE ENZYME FROM *Mucor circinelloides*” that is written as partial fulfilment of the academic requirements to obtain the degree of *Sarjana Teknologi Pertanian Strata Satu*, Universitas Pelita Harapan.

There are many supports, prayers, guidance, and help received for the author. In this chance, author would like to express gratitude and appreciation to those parties, including:

1. Mr. Eric Jobilong, Ph.D. as Dean of Faculty of Science and Technology.
2. Mrs. Dela Rosa M.M., M.Sc., Apt., as Vice Dean of Faculty of Science and Technology.
3. Mr. Laurence, M.T. as Director of Finance and Student Affair of Faculty of Science and Technology.
4. Mr. Ir. W. Donald R. Pokatong, M.Sc., Ph.D as Head of Food Technology Study Program.
5. Mr. Dr. Adolf J. Parhusip, M.Si. and Mrs. Intan Cidarbulan Matita, Ph.D., as thesis examiners who gave advices for completion of the thesis.

6. Ms. Yuniwaty Halim, M.Sc. as the Head of Quality Control and Research Laboratory also as supervisor who had supervised, encouraged, and supported author through the whole process of this thesis.
7. Dr. Ir. Hardoko, MS. and Ms. Ratna Handayani, MP, as the lecturers of Food Technology Study Program who have given their counsel, guidance and insight regarding the research on glucosamine
8. Dr. Tagor M. Siregar, MS., Dr. Adolf Parhusip, and Dr. Nuri Arum Anugrahati as the Head of Chemistry, Microbiology, and Food Processing, who had given permission to the writer to conduct the research in the laboratories.
9. Virly, STP., Jessica Decyree, STP., Mr. Darius, Mr. Yosafat, Mr. Adi and Mr. Adzie for the guidance and support during the research in laboratory
10. All lecturers of Food Technology Department of Universitas Pelita Harapan for the knowledge given, which was very useful during the research and thesis report completion.
11. All staff of Faculty of Science and Technology for the help and support.
12. Parents and family for endless support during the internship and the making of the report.
13. Elisa Teja, Desy Puspasari, Gian Giovanni, Nicholas Candra, Gerardo Kevin Liguna and Felicia Yulianti Halim as partners during the thesis period.
14. Agustin Novita, Angela Maria Widjanarko, Aurelia Liuputri, Bryan Anders, Cecilia Josephine, Edison Sutiono, Mario Kusuma, Nancy Chandyra Putri, and Willy Williamdy for help and support during the thesis period.
15. Food Explore 10 committee for the support during the thesis period.

16. All people, who have been contributed in the writing of this report that cannot be mentioned one by one.

The writer realizes that this report is far from perfect. Thus, any comments and suggestions are welcomed. The writer hopes that this thesis report may provide useful and productive knowledge for people who read it

COVER	
STATEMENT OF THESIS AUNTHENTICITY	
APPROVAL BY THESIS SUPERVISOR	
APPROVAL BY THESIS EXAMINATION COMMITTEE	
ABSTRACT.....	v
ACKNOWLEDGEMENTS.....	ivi
TABLE OF CONTENTS.....	ix
LIST OF TABLES.....	xiii
LIST OF FIGURES.....	xiv
LIST OF APPENDICES.....	xvi
CHAPTER I INTRODUCTION	
1.1 Background.....	1
1.2 Research Problem.....	3
1.3 Objectives.....	4
1.3.1 General Objective.....	4
1.3.2 Specific Objectives.....	4
CHAPTER II LITERATURE REVIEW	
2.1 Tiger Shrimp.....	5

2.2 Chitin.....	6
2.3 Degree of Deacetylation.....	8
2.3 Glucosamine	9
2.4 Chitinolytic Enzyme	10
2.5 <i>Mucor circinelloides</i>	13

CHAPTER III RESEARCH METHODOLOGY

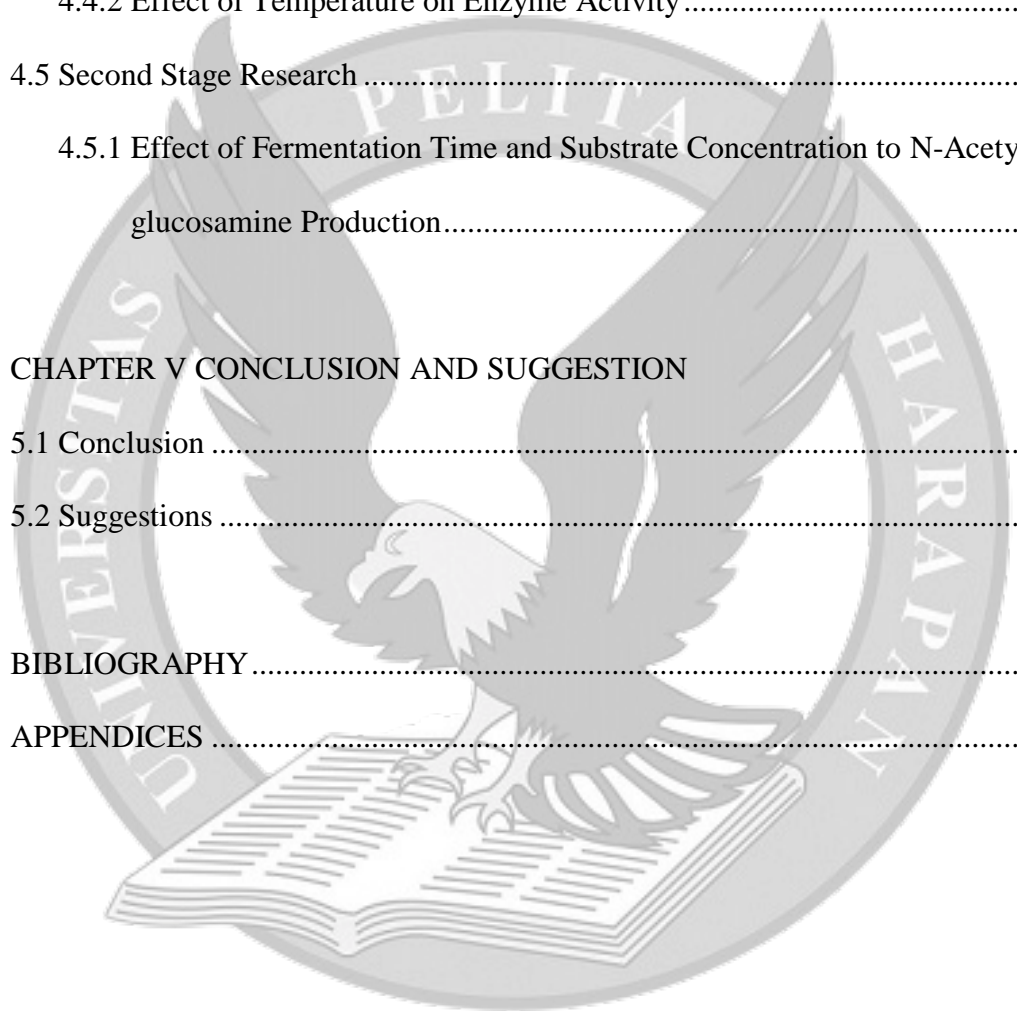

3.1 Materials and Equipment	15
3.2 Research Method	16
3.2.1 Preliminary Research	16
3.2.1.1 Preparation of Isolated Chitin	16
3.2.1.2 Preparation of Colloidal Chitin	18
3.2.1.3 Media Preparation	18
3.2.1.4 Preparation of Stock and Starter Culture	19
3.2.1.5 Morphological Characterization of Culture	19
3.2.1.6 Spore Count	19
3.2.1.7 Extraction of Extracellular Enzyme of <i>Mucor circinelloides</i>	20
3.2.2 First Stage Research.....	20
3.2.2.1 Determination of Optimum pH of Extracellular Enzyme	20
3.2.2.2 Determination of Optimum Temperature of Extracellular Enzyme	21
3.2.3 Second Stage Research	23
3.2.3.1 Determination of Optimum Substrate Concentration and	

Fermentation Time.....	22
3.3 Experimental Design.....	24
3.4 Method of Analysis.....	25
3.4.1 Shrimp Powder Analysis.....	25
3.4.1.1 Moisture Content (AOAC, 2005)	25
3.4.1.2 Ash Content (AOAC, 2005)	25
3.4.1.3 Protein Content (Nielsen, 2009 with modifications)	26
3.4.2 Isolated Chitin Analysis	27
3.4.2.1 Degree of Deacetylation (Czechowska-Biskup, <i>et al.</i> , 2012; Dong, <i>et al.</i> , 2001)	26
3.4.3 Chitinolytic Activity Assay (Yen, <i>et al.</i> , 2010)	28
3.4.4 Enzyme Analysis (Rahmansyah and Sudiana, 2003).....	28
3.4.5 N-Acetyl-glucosamine Analysis	29
3.4.5.1 Preparation of N-Acetyl-glucosamine Standard Curve (Rahmansyah and Sudiana, 2003).....	28
3.4.5.2 Quantification of N-Acetyl-glucosamine (Rahmansyah and Sudiana, 2003)	29

CHAPTER IV RESULTS AND DISCUSSION

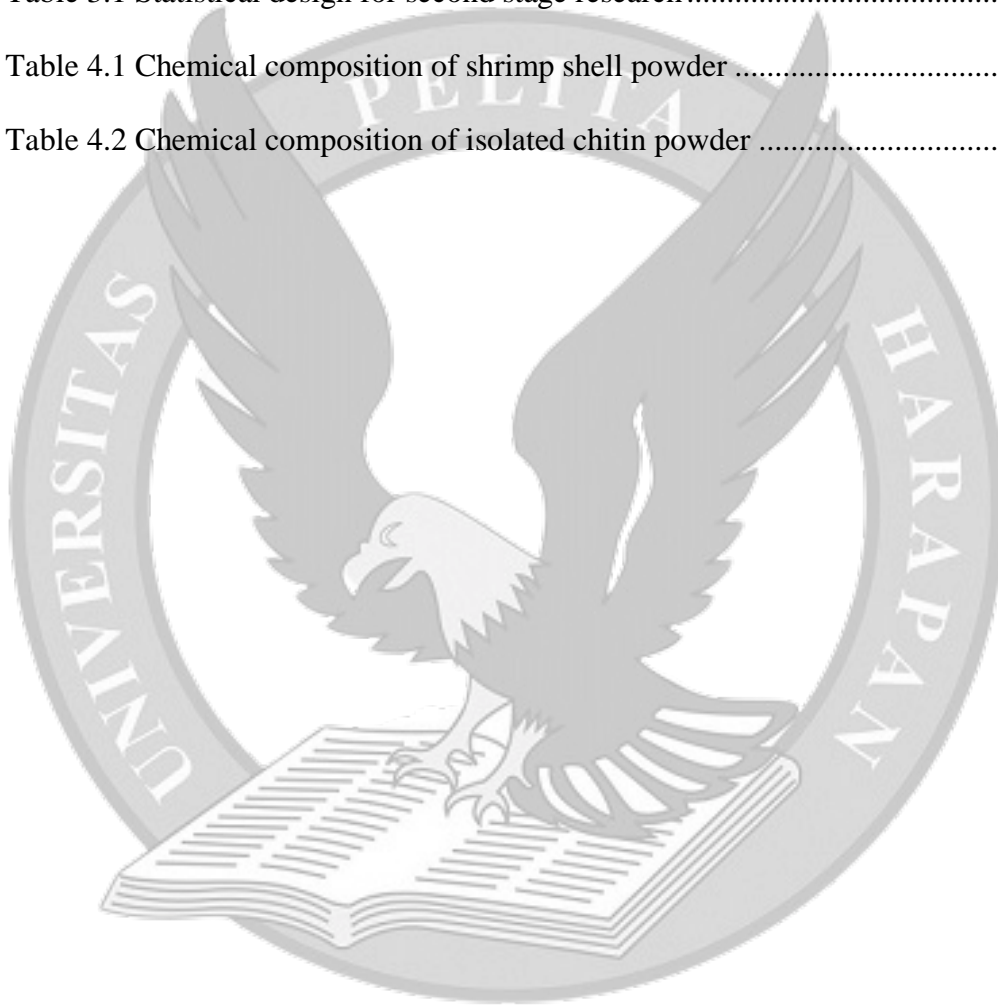

4.1. Shrimp Identification and Analysis of Shrimp Shell Powder	30
4.2. Analysis of Isolated Chitin Powder	32
4.3 Identification of <i>Mucor circinelloides</i>	35
4.3.1 Morphology of <i>Mucor circinelloides</i>	35

4.3.2 Spore Counting	37
4.3.3 Chitinolytic Index	37
4.4 First Stage Research.....	38
4.4.1 Effect of pH on Enzyme Activity	38
4.4.2 Effect of Temperature on Enzyme Activity	39
4.5 Second Stage Research	41
4.5.1 Effect of Fermentation Time and Substrate Concentration to N-Acetyl- glucosamine Production.....	41
 CHAPTER V CONCLUSION AND SUGGESTION	
5.1 Conclusion	42
5.2 Suggestions	42
 BIBLIOGRAPHY	 45
APPENDICES	50

LIST OF TABLES

	page
Table 3.1 Statistical design for second stage research.....	24
Table 4.1 Chemical composition of shrimp shell powder	30
Table 4.2 Chemical composition of isolated chitin powder	31

LIST OF FIGURES

N-Acetyl-glucosamine production.....41

LIST OF APPENDICES

	page
Appendix A	
Shrimp Identification	A-1
Appendix B	
Moisture Content Analysis	B-1
Appendix C	
Ash Content Analysis	C-1
Appendix D	
Yield Determination	D-1
Appendix E	
Degree of Deacetylation of Chitin Powder	E-1
Surat Pernyataan Hasil Analisis <i>Degree of Deacetylation</i>	E-3
Appendix F	
Hemocytometer Spore Counting	F-1
Appendix G	
Chitinolytic Index	G-1
Appendix H	
Protein Content of Shrimp Powder and Isolated Chitin Powder	H-1
Appendix I	
N-Acetyl-Glucosamine Standard Curve	I-1
Appendix J	
Effect of pH and Temperature on Chitinase Enzyme Activity	J-1

Appendix K

Effect of Substrate Concentration and Fermentation Time toward
N-Acetyl-Glucosamine Production..... K-1

Appendix L

Statistical Analysis of Second Stage.....L-1

Appendix M

Statistical Interaction between Substrate Concentration and
Fermentation Time.....M-1
