

ACKNOWLEDGEMENTS

Thanks to Jesus Christ for His overwhelming blessings to the author in completing this thesis entitled “CHARACTERIZATION OF EDIBLE FILMS WITH DOUBLE EMULSIONS FROM CINNAMON (*Cinnamomum burmannii*) OIL AS ANTIMICROBIAL”.

This thesis was written based on the research conducted from August 2018 to November 2018. This thesis was written as the partial fulfillment of the academic requirement to obtain the degree of *Sarjana Teknologi Pertanian Strata Satu*, Food Technology Study Program, Faculty of Science and Technology, Universitas Pelita Harapan, Tangerang.

The author realizes that this thesis could not be successfully completed by the author without the support, encouragement and prayers from many parties. Therefore, the author would like to express a huge gratitude to those parties, including:

1. Eric Jobiliong, Ph.D. as Dean of Faculty of Science and Technology.
2. Dela Rosa, M.M., M.Sc., Apt. as Vice Dean of Faculty of Science and Technology.
3. Laurence, S.T., M.T. as Director of Finance and Student Affair of Faculty of Science and Technology.
4. Ir. W. Donald R. Pokatong, M.Sc., Ph.D., as Head of Food Technology Study Program for the chance to conduct the thesis project and guidance throughout the thesis project period.
5. Ratna Handayani, M.P. as Vice Head of Food Technology Study Program for the guidance throughout the thesis project period.
6. Natania, M.Eng. as thesis supervisor and Head of Food Processing Laboratory for the time, guidance and support throughout the whole process of research proposal preparation until the completion of the thesis project.
7. Yuniwaty Halim, M.Sc. as the Head of Quality Control and Research Laboratory, Dr. Adolf J. N. Parhusip, M.Si. as the Head of Microbiology

Laboratory and Dr. Tagor M. Siregar, M.Si. as the Head of Chemistry Laboratory, where the author conducted the project.

8. Esther, S.T.P., Bryan Anders, S.T.P., Christopher I. Rimba, S.T.P., Yosafat, Darius, Adzie and Adhi for the help and information during the work in the laboratory.
9. All other lecturers, lecturers assistant and staffs of Food Technology Study Program for the support and help during the thesis project period.
10. Beloved parents, Ahim Serina and Jek Hwa Hosen, dearest twin sister, Stephanie Alvionita and dearest little brother, Wilson Khodavian, for the love, support, prayers and time given to the author during the thesis completion.
11. Giovani Fransisca Setiawan and Ignatius Jordan Bernando as author's thesis partners for the support and help from the beginning until the end of the thesis project period.
12. Joanina, Gracia Angelina Suryadi, Vanessa Candra and Clairine F. Wongsari as partners on the same team for the support and help during the thesis period.
13. Carinna Ruth Darmawan, Jonathan Christianto, Felicia Agustin, Tiffany Nathalie, Celine Tanuwijaya, Reynald Agustius Livano, Angela Nadya Wijaya, Kaleb Kokoh I. Putra and Liana Oktavia for the help and support in the laboratory during thesis period.
14. Jesseline, Nabillah, Rheza Theodorus, Florencia Irena Gunawan, Stevani Willyanto, Caroline, Gisela Felicia, Verena Sandra, Livia Clarista, Natasha Juniar Suhalm, Veronika Theresia, Irene Agustini, Agustin Novita and Jeffrey Stefanus as author's friends who gave endless help, support and prayers for the author during the thesis period.
15. Author's fellow HMTP members, especially Madeline Gracia, Sheren Julian, Angela Natasia, Marco Marcello and Grace Yovita for the moral support.
16. All friends and relatives who had not been mentioned but also took part in supporting the author during the thesis period.

The author realized that this report is still far from perfect. Therefore, the author would like to apologize for any mistake in the report and would appreciate

any criticisms and suggestions given to this report. The author also does hope that the report will be beneficial and useful for the readers. Thank you.

Tangerang, February 2019

(Jennifer Alvionita)

COVER	
STATEMENT OF THESIS AUTHENTICITY	
APPROVAL BY THESIS SUPERVISOR	
APPROVAL BY THESIS EXAMINATION COMMITTEE	
ABSTRACT.....	v
ACKNOWLEDGEMENTS.....	vi
TABLE OF CONTENTS.....	ix
LIST OF FIGURES.....	xii
LIST OF TABLES.....	xiii
LIST OF APPENDICES.....	xiv
CHAPTER I INTRODUCTION	
1.1 Background.....	1
1.2 Research Problem.....	3
1.3 Objectives.....	3
1.3.1 General Objectives.....	3
1.3.2 Specific Objectives.....	3
CHAPTER II LITERATURE REVIEW	
2.1 Cinnamon.....	5
2.1.1 Morphology of Cinnamon.....	5
2.1.2 Cinnamon Oil.....	6
2.1.2.1 Distillation.....	8
2.1.2.2 Antimicrobial Mechanisms.....	9
2.1.2.2.1 Antimicrobial Activity Determination.....	11
2.2 Emulsions.....	11
2.2.1 Double Emulsions.....	12
2.2.2 Polyglycerol Polyricinoleate (PGPR).....	13
2.2.3 Guar Gum.....	14
2.3 Edible Film and Coating.....	14
2.3.1 Edible Film or Coating Materials.....	16
2.3.1.1 Starch.....	17
2.3.1.2 Plasticizer.....	18
2.4 Food Microbial Contaminant.....	18
2.4.1 <i>Escherichia coli</i>	18
2.4.2 <i>Staphylococcus aureus</i>	19
2.4.3 <i>Aspergillus niger</i>	20
2.4.4 <i>Rhizopus stolonifer</i>	21
CHAPTER III RESEARCH METHODOLOGY	
3.1 Materials and Equipment.....	22
3.2 Research Stages.....	23

3.2.1 Preliminary Stage.....	24
3.2.1.1 Extraction of Cinnamon Essential Oil.....	24
3.2.1.2 Antimicrobial Activity Determination	25
3.2.1.2.1 Rejuvenation of Bacteria	25
3.2.1.2.2 Rejuvenation of Molds	26
3.2.1.2.3 MIC, MBC and MFC Determination	27
3.2.2 Main Research Stage I	28
3.2.2.1 Preparation of Cinnamon Oil Double Emulsions	29
3.2.3 Main Research Stage II.....	30
3.2.3.1 Edible Film Making	30
3.4 Experimental Design	31
3.4.1 Preliminary Stage.....	31
3.4.2 Main Research Stage I	31
3.4.3 Main Research Stage II.....	34
3.4 Analytical Procedures.....	36
3.4.1 Cinnamon Essential Oil Yield (Kasim <i>et al.</i> , 2014)	36
3.4.2 Double Emulsions Characteristics	36
3.4.2.1 Droplet Size (Frascareli <i>et al.</i> , 2011)	36
3.4.2.2 Viscosity (Ali <i>et al.</i> , 2014).....	37
3.4.2.3 Stability	37
3.4.2.3.1 Stability by Centrifugation (Pulatsü <i>et al.</i> , 2017).....	37
3.4.2.3.2 Stability by Creaming Index (Hadnadev <i>et al.</i> , 2013)	37
3.4.3 Edible Film Characteristics.....	38
3.4.3.1 Thickness (Galus and Kadzińska, 2016)	38
3.4.3.2 Opacity (Galus and Kadzińska, 2016).....	38
3.4.3.3 Mechanical and Physical Characteristics (Dashipour <i>et al.</i> , 2014).....	39
3.4.3.4 Water Vapor Transmission Rate (ASTM, 1995 with modification)	39
3.4.3.5 Swelling Index (Galus and Kadzińska, 2016).....	40
3.4.3.6 Antimicrobial Activity (Bahram <i>et al.</i> , 2013).....	40

CHAPTER IV RESULTS AND DISCUSSION

4.1 Taxonomical Verification of Cinnamon.....	41
4.2 Cinnamon Essential Oil Extraction	41
4.2.1 Cinnamon Essential Oil Yield	41
4.2.2 Antimicrobial Activity Determination of Cinnamon Essential Oil	43
4.3 Double Emulsion Characteristics	47
4.3.1 Droplet Size	50
4.3.2 Viscosity	52
4.3.3 Stability.....	53
4.4 Edible Film Characteristics	54

4.4.1 Appearance.....	54
4.4.2 Opacity	55
4.4.3 Thickness	57
4.4.4 Tensile Strength	59
4.4.5 Elongation at Break.....	61
4.4.6 Water Vapor Transmission Rate	62
4.4.7 Swelling Index	64
4.4.8 Antimicrobial Activity	65
CHAPTER V CONCLUSIONS AND SUGGESTIONS	
5.1 Conclusions	68
5.2 Suggestions.....	69
BIBLIOGRAPHY	70
APPENDICES	78

LIST OF FIGURES

	page
Figure 2.1 Cinnamon barks.....	5
Figure 2.2 Cinnamaldehyde chemical structure.....	7
Figure 2.3 Structure of W/O/W double emulsion.....	12
Figure 3.1 Flow chart of the research stages conducted.....	23
Figure 3.2 Extraction of cinnamon essential oil.....	25
Figure 3.3 MIC determination.....	28
Figure 4.1 Double emulsion droplets seen under microscope.....	50
Figure 4.2 Appearance of edible film with (a) 4% oil-double emulsion (b) 6%-oil double emulsion.....	55
Figure 4.3 Effect of oil concentration towards opacity of edible films.....	56
Figure 4.4 Effect of double emulsion concentration towards opacity of edible films.....	56
Figure 4.5 Effect of double emulsion concentration towards thickness of edible films.....	58
Figure 4.6 Tensile strength of double emulsion-added edible films.....	59

LIST OF TABLES

	page
Table 3.1 Double emulsion formulations.....	29
Table 3.2 Edible film formulations.....	30
Table 3.3 Experimental design for T-test.....	33
Table 3.4 Experimental design of stage II research.....	35
Table 4.1 MIC, MBC and MFC value of cinnamon essential oil.....	44
Table 4.2 Droplet size of double emulsions.....	50
Table 4.3 Viscosity of double emulsions.....	52
Table 4.4 Stability results of double emulsions.....	53

LIST OF APPENDICES

	page
Appendix A	
Identification of Cinnamon Taxonomy.....	A-1
Appendix B	
Cinnamon Essential Oil Yield.....	B-1
Appendix C	
Identification of Test Microorganisms.....	C-1
Appendix D	
Calculation for MIC, MBC and MFC Value	D-1
Appendix E	
Droplet Size of Cinnamon Oil Double Emulsions.....	E-1
Statistical Analysis of Droplet Size between Double Emulsions	E-3
Statistical Analysis of Droplet Size upon Storage Time.....	E-4
Appendix F	
Viscosity of Double Emulsions.....	F-1
Statistical Analysis of Viscosity between Double Emulsions	F-1
Statistical Analysis of Viscosity upon Storage Time.....	F-2
Appendix G	
Stability of Double Emulsions by Centrifugation.....	G-1
Stability of Double Emulsions by Creaming Index	G-2
Appendix H	
Opacity of Edible Films	H-1
Statistical Analysis of Opacity.....	H-3
Appendix I	
Thickness, Tensile Strength and Elongation of Double Emulsion- Added Edible Films	I-1
Statistical Analysis of Thickness	I-4
Statistical Analysis of Tensile Strength	I-5
Statistical Analysis of Elongation	I-6
Appendix J	
Water Vapor Transmission Rate of Double Emulsion-Added Edible Films	J-1
Statistical Analysis of Water Vapor Transmission Rate.....	J-3

Appendix K

Swelling Index of Double Emulsion-Added Edible Films K-1
Statistical Analysis of Swelling Index K-3

Appendix L

Antimicrobial Activity of Double Emulsion-Added Edible FilmsL-1
Statistical Analysis of Antimicrobial Activity (*Escherichia coli*)L-2
Statistical Analysis of Antimicrobial Activity (*Rhizopus stolonifer*)L-3
