

ACKNOWLEDGMENTS

Praise be to God and His Glory. He has given the author the strength to persist in writing this thesis entitled “Martens Clause: Filling the Gaps for International Humanitarian Law in Regulating Autonomous Weapons Systems”. This thesis aims to fulfill the prerequisites in obtaining a Bachelor of Law Degree at the Faculty of Law, Universitas Pelita Harapan.

I hope that this thesis would contribute to harmonizing existing literature and difference in understanding with regard to AWS, the legal gaps from International Humanitarian Law in regulating this weapon, and how the Martens Clause could fill these gaps. I find that the topic of the thesis is universally important and urgent when considering the latest developments in warfare, including for Indonesia. The blessed completion of this thesis would not have been made possible without the support and assistance of various parties. Therefore, I would like to thank:
