ACKNOWLEDGEMENTS

Greatest thanks to God who had always given His blessing and accompanied the author until finishing this thesis report entitled “UTILIZATION OF ROSEMARY (Rosmarinus officinalis L.) LEAVES IN THE MAKING OF ROSEMARY DRINK”. This thesis is written as partial fulfillment of academic requirements to obtain the degree of Sarjana Teknologi Pertanian Strata Satu in Food Technology Study Program, Faculty of Science and Technology, Universitas Pelita Harapan, Tangerang.

The author realizes that this report would not be successfully completed without the help and support from many parties. Therefore, the author would give much gratitude and highest appreciation to:

1. Prof. Dr. Manlian Ronald A. Simanjuntak, ST., MT., D. Min. as Dean of Faculty of Science and Technology.
2. Ir. W. Donald R. Pokatong, M.Sc., Ph.D. as Head of Food Technology Study Program and Academic Advisor who has given opportunity for the author to conduct this research and also many supports.
3. Yuniwaty Halim, MSc. as thesis supervisor and Head of Quality Control Laboratory for the guidance, helps, effort, patience, advices, and support, and sharing for the author until the thesis is completed.
4. Dr. Nuri Arum Anugrahati, S.Si., M. P. and Dr. Ir. Adolf JN. Parhusip, M.Si., as thesis examiners who has given guidance and advices for the author in this thesis.
5. Dr. Melania Cornelia, Dr. Adolf JN, Parhusip, and Natania, M.Eng, as Head of Laboratories for the guidance, advices, and opportunity for the author to conduct the research in the laboratory.

6. Mr. Adzie, Mr. Darius, Mr. Hendra, and Mr. Yosafat as laboratory assistances for the support and joy during the research.

7. Father (Garto Sofian), mother (Carolyn), brother (Suhendro Priyono), and sister (Suhenny Priyuni) for endless supports, helps, and prayers until the thesis is completed.

8. Abigail Keziah, Evelyn, and Vanessa Christie as fellow friends supervised under the same supervisor for the motivation, sharing, helps, support, prayers, and accompany the author during the unforgettable thesis-making moment.

9. Bernardus Brian, Christopher I Rimba, Daniel Sianto, Felisia Varian, Milkha Fiona, Olivia Virginia, Rani Lumiling Pasau, Raymond Winoto, Revina Tjahja, Stephanie Aurelia, Tania Utami Mandala, and Yossi Triana for the support and also time to spend valuable moment during the university life.

10. All food technology study program students, especially members of class 2013 C and many other friends who could not be mentioned one by one who have given support and motivation during this thesis.

The author realizes that this report is far from perfect. Therefore, any comments and suggestion are welcomed. The author hopes that this thesis report may provide useful information to the readers.

Tangerang, January 2017

## CHAPTER I INTRODUCTION

1.1 Background ................................................. 1  
1.2 Research Problem .......................................... 2  
1.3 Objectives .................................................. 3  
   1.3.1 General Objectives .................................... 3  
   1.3.2 Specific Objectives .................................... 3

## CHAPTER II LITERATURE REVIEW

2.1 Rosemary (*Rosmarinus officinalis* L.) ........................ 5  
   2.1.1 Health Benefit of Rosemary ............................ 6  
   2.1.2 Nutrient Composition of Rosemary ..................... 7  
   2.1.3 Bioactive Component in Rosemary ..................... 8  
2.2 Drying ....................................................... 9  
2.3 Functional Drink .......................................... 10  
2.4 Antioxidant ............................................... 11  
   2.4.1 Lipid Oxidation ....................................... 12  
   2.4.2 Antioxidant Mechanism ................................ 13  
2.5 Phenolic Compounds ........................................ 14  
2.6 Flavonoid Compounds ....................................... 14
CHAPTER III RESEARCH METHODOLOGY

3.1 Material and Equipment ................................................................. 15
3.2 Research Procedures ....................................................................... 15
   3.2.1 Preliminary Research ............................................................... 15
   3.2.2 Main Research ......................................................................... 16
      3.2.2.1 Main Research Stage I ..................................................... 16
      3.2.2.2 Main Research Stage II .................................................... 18
3.3 Experimental Design ....................................................................... 19
   3.3.1 Preliminary Research ............................................................... 19
   3.3.2 Main Research ......................................................................... 20
      3.3.2.1 Main Research Stage I ..................................................... 20
      3.3.2.2 Main Research Stage II .................................................... 22
3.4 Analyses Procedure ....................................................................... 23
   3.4.1 Moisture Content Analysis ....................................................... 23
   3.4.2 Antioxidant Analysis by DPPH Method ....................................... 23
   3.4.3 Color Analysis ......................................................................... 24
   3.4.4 pH .......................................................................................... 24
   3.4.5 Organoleptic Analysis .............................................................. 25
      3.4.5.1 Hedonic Test Analysis ....................................................... 25
      3.4.5.2 Scoring Test Analysis ......................................................... 25
   3.4.6 Total Phenolic Content by Folin-Ciocalteau Method ................... 25
   3.4.7 Total Flavonoid Content ........................................................... 26

CHAPTER IV RESULTS AND DISCUSSIONS

4.1 Determination of Drying Temperature of Rosemary Leaves ............ 27
   4.1.1 Antioxidant Activity Analysis of Dried Rosemary Leaves at
      Different Temperatures .................................................................. 29
   4.1.2 Total Phenolic Content Analysis of Dried Rosemary Leaves at
      Different Temperatures .................................................................. 31
   4.1.3 Total Flavonoid Content Analysis of Dried Rosemary Leaves at
      Different Temperatures .................................................................. 33
   4.1.4 Determination of the Best Drying Temperature .......................... 34
4.2 Production of Rosemary Drink with Different Formulations .......... 34
   4.2.1 Antioxidant Activity Analysis of Rosemary Drink with Different
      Formulations ............................................................................... 35
4.2.2 Total Phenolic Content Analysis of Rosemary Drink with Different Formulations .................................................. 38

4.2.3 Total Flavonoid Content Analysis of Rosemary Drink with Different Formulations .................................................. 39

4.2.4 Determination of the Selected Formulation of Rosemary Drink ............. 41

4.3 Color Analysis of Rosemary Drink ................................................................. 41

4.4 pH Analysis of Rosemary Drink ................................................................. 43

4.5 Determination of the Most Preferred Formula by Sensory Analysis ......... 44

4.5.1 Scoring Test ......................................................................................... 44

4.5.1.1 Color ......................................................................................... 44

4.5.1.2 Aroma ....................................................................................... 46

4.5.1.3 Sweetness ............................................................................... 47

4.5.1.4 Sourness ............................................................................... 48

4.5.1.5 Aftertaste ............................................................................... 49

4.5.2 Hedonic Test .................................................................................... 51

4.5.2.1 Color ....................................................................................... 51

4.5.2.2 Aroma ....................................................................................... 52

4.5.2.3 Sweetness ............................................................................... 53

4.5.2.4 Sourness ............................................................................... 55

4.5.2.5 Aftertaste ............................................................................... 56

4.5.2.6 Overall Acceptance ................................................................. 58

4.5.3 Determination of the Most Preferred Formula of Rosemary Drink ....... 59

4.6 Comparison between Rosemary Drink Made from Fresh and Dried Rosemary Leaves ................................................................. 60

4.6.1 Antioxidant Activity Analysis of Rosemary Drink Made from Fresh and Dried Rosemary Leaves ................................................................. 61

4.6.2 Total Phenolic Content Analysis Made from Fresh and Dried Rosemary Leaves ................................................................. 63

4.6.3 Total Flavonoid Content Analysis Made from Fresh and Dried Rosemary Leaves ................................................................. 65

CHAPTER V CONCLUSIONS AND SUGGESTIONS

5.1 Conclusions .............................................................................................. 68

5.2 Suggestions ............................................................................................. 69
LIST OF TABLES

Table 2.1 Nutrient content of 100 grams of fresh and dried rosemary leaves ....... 8
Table 3.1 Formulation for making rosemary drink........................................... 17
Table 3.2 Treatment combinations in main research ......................................... 21

LIST OF APPENDICES

Appendix A. Result of Identification of Rosemary Leaves ........................................... A-1
Appendix B. Picture of Fresh and Dried Rosemary Leaves at Different Temperature ................................................................. B-1
Appendix C. Moisture Content Analysis of Dried Rosemary Leaves at Different Temperatures ..................................................... C-1
Appendix D. Antioxidant Activity Analysis of Dried Rosemary Leaves at Different Temperatures .................................................. D-1
Appendix E. Total Phenolic Content Analysis of Dried Rosemary Leaves at Different Temperatures ............................................. E-1
Appendix F. Total Flavonoid Content Analysis of Dried Rosemary Leaves at Different Temperatures ............................................. F-1
Appendix G. Picture of Rosemary Drink Made with Different Formulations .... G-1
Appendix H. Antioxidant Activity Analysis of Rosemary Drink Analysis with Different Formulations ................................................... H-1
Appendix I. Result and Statistical Analysis of Total Phenolic Content of Rosemary Drink with Different Formulation ....................... I-1
Appendix J. Result and Statistical Analysis of Total Flavonoid Content of Rosemary Drink with Different Formulation ....................... J-1
Appendix K. Color Analysis of Rosemary Drink by Chromameter ...................... K-1
Appendix L. pH Analysis of Rosemary Drink by pH Meter ................................. L-1
Appendix M. Example of Sensory Analysis Questionnaire ................................. M-1
Appendix N. Scoring Test on Color of Rosemary Drink ...................................... N-1
Appendix O. Scoring Test on Aroma of Rosemary Drink .................................... O-1
Appendix P. Scoring Test on Sweetness of Rosemary Drink .............................. P-1
Appendix Q. Scoring Test on Soursness of Rosemary Drink .............................. Q-1
Appendix R. Scoring Test on Aftertaste of Rosemary Drink .............................. R-1
Appendix S. Hedonic Test on Color of Rosemary Drink ...................................... S-1
Appendix T. Hedonic Test on Aroma of Rosemary Drink .................................... T-1
Appendix U. Hedonic Test on Sweetness of Rosemary Drink .............................. U-1
Appendix V. Hedonic Test on Soursness of Rosemary Drink .............................. V-1
Appendix W. Hedonic Test on Aftertaste of Rosemary Drink .............................. W-1
Appendix X. Hedonic Test on Overall Acceptance of Rosemary Drink .......... X-1
Appendix Y. Statistical Analysis of Rosemary Drink with the Most Preferred Formula .................................................................................................................. Y-1
Appendix Z. Antioxidant Activity Analysis of Fresh and Dried Rosemary Leaves ......................................................................................................................... Z-1
Appendix AA. Total Phenolic Content of Analysis Fresh and Dried Rosemary Leaves .............................................................................................................. AA-1
Appendix AB. Total Flavonoid Content Analysis of Fresh and Dried Rosemary Leaves ................................................................................................. AB-1
Appendix AC. Antioxidant Activity Analysis of Rosemary Drink from Fresh and Dried Rosemary Leaves ....................................................................... AC-1
Appendix AD. Total Phenolic Content Analysis of Rosemary Drink from Fresh and Dried Rosemary Leaves ................................................................. AD-1
Appendix AE. Total Flavonoid Content Analysis of Rosemary Drink from Fresh and Dried Rosemary Leaves ................................................................. AE-1
Appendix AF. Moisture Content Analysis of Fresh Rosemary Leaves ........... AF-1
Appendix AG. pH Analysis of Rosemary Drink from Fresh Rosemary Leaves .................................................................................................................. AG-1
