ACKNOWLEDGEMENTS

Praise the Lord for His blessings to the author during the completion of this report. This thesis entitled “EFFECT OF GERMINATED COWPEA (Vigna unguiculata L.) AND GERMINATED SOYBEAN (Glycine max L.) ON THE QUALITY AND PROTEIN DIGESTIBILITY OF TOFU” was written as a partial fulfillment of the academic requirements to receive the degree of Sarjana Teknologi Pertanian Strata Satu, Food Technology Study Program, Faculty of Science and Technology, Universitas Pelita Harapan, Tangerang.

The completion of this thesis would not have been possible without assistance, supports, guidance, and prayers from other parties. Therefore, the author would like to express gratitude towards those who have helped and supported during these periods, including:

1. Prof. Dr. Manlian Ronald A. Simanjuntak, ST., MT., D.Min., as the Dean of Faculty of Science and Technology for the support and valuable inputs during education in Universitas Pelita Harapan.

2. Ir. W. Donald R. Pokatong, M.Sc., Ph.D., as the Head of Food Technology Study Program and academic supervisor who has given a chance during the time of the project and advices for academic improvement.

3. Dr. Ir. Raffi Paramawati, M.Si., as the thesis supervisor who has given guidance, time, inputs, and support during the whole process of this thesis.

4. Dr. Tagor M. Siregar, M.Si. and Natania, M.Eng., as Head of Chemistry and Food Processing Laboratory, respectively, and as examiners who have given valuable suggestions regarding thesis revisions.
5. Yuniwaty Halim, M.Sc. as Head of Quality Control and Research Laboratories and Dr. Adolf J. N. Parhusip as Head of Microbiology Laboratory who had given permission to the author to conduct research in the laboratories.

6. Virly, STP, Mateus Andra Gunawan, STP, Hendra, Adzie, Darius, and Yosafat for the support and guidance in the laboratories.

7. All lecturers and staffs in Food Technology Study Program for the help and support during research.

8. Beloved father (Sihing Widianto Dewanto), mother (Soelistiorini Widjiatmodjo), sisters (Yessy Paramita Dewanto and Cynthia Paramita Dewanto), brother (Kevin Andinata Dewanto), and relatives for giving endless support and prayer to the author.

11. Fellow friends under supervision of the same supervisor, Alvita Phoandy, Ardelyta Susanti, Mardiana Gozal, Olivia Virginia, and Revita Ester for support and togetherness during research and report completion.

12. All members of Food Technology 2013 especially C class for 3.5 years of togetherness.
13. All other parties who have helped and supported the author during research and thesis completion period, but have not been yet mentioned.

Author realizes that this report is far from perfection and might have some mistakes either during in the conduction of project or the completion of the report. Any criticism and suggestions will be gladly accepted. In the end, the author hopes this report may be useful and informative for the readers. Thank you.

Tangerang, January 2017

LIST OF APPENDICES .......................................................................................... xiv

## CHAPTER I INTRODUCTION

1.1 Background ...................................................................................................... 1
1.2 Research Problem .......................................................................................... 3
1.3 Objectives ....................................................................................................... 3
  1.3.1 General Objectives .................................................................................. 3
  1.3.2 Specific Objectives .................................................................................. 3

## CHAPTER II LITERATURE REVIEW

2.1 Protein ............................................................................................................ 5
  2.1.1 Protein Digestibility ............................................................................... 6
  2.1.2 Protein Bioavailability .......................................................................... 7
2.2 Legumes ......................................................................................................... 8
2.3 Cowpea (Vigna unguiculata L.) .................................................................... 11
2.4 Soybean (Glycine max L.) ............................................................................. 15
2.5 Germination Process ...................................................................................... 18
2.6 Tofu ............................................................................................................... 20
CHAPTER III RESEARCH METHODOLOGY

3.1 Materials and Equipment ................................................................. 26
  3.1.1 Materials ................................................................. 26
  3.1.2 Equipment ........................................................................ 26

3.2 Research Procedures ..................................................................... 27
  3.2.1 Preliminary Research .............................................................. 27
  3.2.2 Main Research ..................................................................... 29

3.3 Experimental Design ...................................................................... 31
  3.3.1 Experimental Design of Preliminary Research ......................... 31
  3.3.2 Experimental Design of Main Research ..................................... 32

3.4 Method of Analysis ......................................................................... 34
  3.4.1 Protein Digestibility in vitro Analysis (Saputra, 2014) .................. 34
  3.4.2 Tofu Yield (Murugkar, 2014 with modification) ......................... 34
  3.4.3 Moisture Content Analysis (AOAC, 2005) .................................. 35
  3.4.4 Ash Content Analysis (AOAC, 2005) ....................................... 35
  3.4.5 Protein Content Analysis (AOAC, 2005) ................................... 36
  3.4.6 Fat Content Analysis (AOAC, 2005) ....................................... 36
  3.4.7 Carbohydrate Content Analysis (AOAC, 2005) ......................... 37
  3.4.8 Water Activity Analysis (Nielsen, 2010) .................................... 37
  3.4.9 pH Analysis (Kusumaningjati; Prabhakaran, et al., 2006) .......... 38
  3.4.10 Texture Profile (Yoon and Kim, 2007; Zhao and Zheng, 2009) .... 38
  3.4.11 Degree of Whiteness (Ketnawa, et al., 2016) ........................... 38
  3.4.12 Sensory Analysis (Meilgaard, et al., 2007; Yoon and Kim, 2007) 38

CHAPTER IV RESULTS AND DISCUSSION

4.1 Determination of Percent Yield and Several Parameters of
  Germinated or Un-germinated Cowpea and Soybean.......................... 40
  4.1.1 Percent Yield ........................................................................ 40
  4.1.2 Texture Profile ...................................................................... 41
  4.1.3 Degree of Whiteness and Moisture Content ............................. 42

4.2 Effect of Different Germinated Cowpea and Soybean Ratio and
  Heating Time on Physical Characteristics of Tofu .......................... 43
