ACKNOWLEDGEMENTS

First and foremost, writer would love to praise the Lord Jesus Christ for his amazing blessings that enable the writer to finish the research and the writing of thesis report entitled “DEVELOPMENT AND BUSINESS PLAN OF RICE-BRAN SUBSTITUTED CENDOL”. The completion of this thesis report is one of the requirements to achieve bachelor degree in Sarjana Strata Satu Teknologi Pangan, which is Universitas Pelita Harapan’s double degree program. As this report was written well through the help and support of many people, thus the writer would like to write his gratitude and thankfulness to:

1. Sisi Patricia Lolita Ameria Gultom, M.Eng, as the thesis supervisor, for the guidance, time, patience, knowledge, and motivation that was given to the writer during the research and thesis report writing.

2. Jacob Donald Tan, BBA, MBA, as the co-supervisor of the thesis, for providing guidance, time, patience, knowledge, motivation, and feedbacks to support the writer.

3. Julia Ratna Wijaya, MAppSc, as the Head of Food Technology Department, Universitas Pelita Harapan, who gave the author the chance to complete this thesis.

4. Mr. Wilbur Donald R. Pokatong, Ph.D., as the head of examiner during the thesis defense, who had given advices and criticisms towards the author, which gave the author a more open minded way of thinking.
5. Mrs. Natania Kam, M.Eng, Ms Ratna Handayani, MP, Ms Yuniwaty Halim, M.Eng, Mrs. Melanie, and Mr. Adolf who have helped and allowed the author to conduct research in the laboratories.

6. The writer’s family, Henry Gunawan (father), Ardianti Kumala (mother), Angie Thea Gunawan (sister), and Irene Gunawan (sister) who had prayed for and supported the author during the thesis completion.

7. Mr. Hendra, Mr. Fauziah, Mr. Darius, Mr. Yosafat, and Ms. Meri, as the laboratory assistants who had helped and supported the author during the research in the laboratories.

8. Dharma Dwitama Harja, Elizabeth Kurniadi, and Rae Ninta Elisa, as the people who have been together in the double degree program with the author from the beginning of the university life.

9. Bella Natasha, as fellow students under the guidance of Mrs. Sisi Patricia L. A. Gultom, M.Eng, who have worked together and supported the author during the thesis research and making the thesis report.

10. Edison Sutiono, Anthonius Hideyo, Anggada Putra, Marvin Setiawan, Alvin Kusuma, and Ariel Siloam, who have provided the author with their help and support during the thesis completion.

11. Yohanes Cahya, Yunita Ng, Ferix Jonathan, Theodorus Kurniawan, and the other students from the Universitas Pelita Harapan Food Technology 2012 class, who have worked together and provide support in the laboratories during the research and completing the thesis report.
12. All of the panelists that have been willing to help the writer during the research, and all of the people who participates in the survey for the rice bran cendol.

13. Fellow students of University of Pelita Harapan Food Technology class C of 2011 who have been with the author for 4 years and shared their knowledge during classes together.

14. People and relatives who cannot be mentioned one by one but also have supported the writer during the completion of the thesis.

The writer realizes that there might be faults and mistakes on the thesis report that the writer expects for suggestions from the reader in order to achieve better accomplishments. There is hope that this thesis report will be useful for the reader.

Karawaci, June 2016

### CHAPTER I INTRODUCTION

1.1 Background ..................................................................................................... 1

1.2 Research Problem .......................................................................................... 2

1.3 Objectives ....................................................................................................... 3

   1.3.1 General Objectives ................................................................................ 3

   1.3.2 Specific Objectives ................................................................................ 3

### CHAPTER II LITERATURE REVIEW

2.1 Cendol ................................................................. .............................................. 4

2.2 Rice Bran ........................................................................................................ 5

2.3 Rice Flour ....................................................................................................... 7

2.4 Carrageenan .................................................................................................. 8

   2.4.1 Kappa-carrageenan .............................................................................. 8

2.5 Dietary Fiber .................................................................................................. 10

2.6 Pandan ........................................................................................................... 11

2.7 Suji ................................................................................................................ 12

2.8 Texture ........................................................................................................... 12
2.11 Business Plan ................................................................................................14
  2.11.1 Customer Segments .................................................................14
  2.11.2 Value Propositions .................................................................15
  2.11.3 Channels ....................................................................................15
  2.11.4 Customer Relationships ..........................................................15
  2.11.5 Key Resources ..........................................................................15
  2.11.6 Key Activities ............................................................................16
  2.11.7 Key Partnerships ......................................................................16
  2.11.8 Revenue Streams ......................................................................16
  2.11.9 Cost Structures ..........................................................................16

2.12 Marketing ............................................................................................17

2.13 Porter’s Five Forces Model with Complementor ....................................17

2.14 Pivot .....................................................................................................19

2.15 Just-in-Time Production ......................................................................20

CHAPTER III RESEARCH METHODOLOGY

3.1 Materials and Equipment ......................................................................21

3.2 Research Procedures ............................................................................21
  3.2.1 The Making of Cendol Particulates ...........................................21
    3.2.1.1 Pandan Leaf and Suji Leaf Extraction ....................................21
    3.2.1.2 The Making of Cendol Particulates ......................................22
  3.2.2 Analysis ........................................................................................24
    3.2.2.1 Sensory Analysis ...............................................................24
      3.2.2.1.1 Hedonic Test (Lawless and Heyman, 2010) .................24
      3.2.2.1.2 Scoring Test (Lawless and Heyman, 2010) .................24
    3.2.2.2 Texture Analysis (Inglett et al., 2005) ..................................25
    3.2.2.3 Lightness (Marquart and McIntosh, 2007) .........................25
    3.2.2.4 Proximate Analysis ...........................................................25
      3.2.2.4.1 Moisture Content (AOAC, 2005) ...............................25
      3.2.2.4.2 Protein Content (AOAC, 2005) .................................26
3.2.2.4.3 Fat Content (AOAC, 2005) .................................26
3.2.2.4.4 Ash Content (AOAC, 2005) .................................27
3.2.2.4.5 Carbohydrate Content (AOAC, 2005) ..................27
3.2.2.4.6 Total Dietary Fiber (AOAC Enzymatic
Gravimetric Method) ...............................................28
3.2.2.4.7 Vitamin B3 Content (HPLC Method) .................29

3.2.3 Business Plan ..........................................................29
  3.2.3.1 Customer Segments .............................................29
  3.2.3.2 Value Propositions ..............................................30
  3.2.3.3 Channels ..........................................................30
  3.2.3.4 Customer Relationships ......................................30
  3.2.3.5 Key Resources ..................................................30
  3.2.3.6 Key Activities ..................................................30
  3.2.3.7 Key Partners ....................................................30
  3.2.3.8 Revenue Streams .............................................31
  3.2.3.9 Cost Structure ..................................................31

3.3 Experimental Design ..................................................31

CHAPTER IV RESULTS AND DISCUSSION
4.1 First Stage Results ......................................................34
  4.1.1 Effect of Rice Bran Flour and K-carrageenan Concentration
to the Sensory Characteristic of Rice Bran Cendol ............34
    4.1.1.1 Chewiness ....................................................34
    4.1.1.2 Taste .........................................................36
    4.1.1.3 Aroma .........................................................38
    4.1.1.4 Color ..........................................................39
    4.1.1.5 Overall Acceptance .........................................40
  4.1.2 Effect of Rice Bran Flour and K-carrageenan Concentration
to the Physical Characteristic of Rice Bran Cendol ..........41
    4.1.2.1 Hardness ......................................................41
    4.1.2.2 Cohesiveness ...............................................43
    4.1.2.3 Springiness ..................................................44
    4.1.2.4 Adhesiveness ...............................................45
4.1.2.5 Chewiness ...........................................................47
4.1.2.6 Lightness ...........................................................48
4.1.3 Selection of Best Combination Rice Bran Cendol ........49
4.1.4 Proximate Analysis Result of the Chosen Rice Bran
and Rice Bran Flour .......................................................49
4.1.5 Dietary Fiber Content Result of the Chosen Rice Bran
Cendol and Rice Bran Flour ................................................50
4.1.6 Vitamin B3 Content Result of the Chosen Rice Bran
Cendol and Rice Bran Flour ................................................51
4.2 Business Plan of Rice Bran Cendol .................................................................51
4.2.1 Executive Summary .................................................................52
4.2.1.1 Introduction ........................................................................52
4.2.1.2 Vision and Mission .................................................................52
4.2.1.3 Logo and Name .................................................................53
4.2.1.4 Tag Line and Slogan .................................................................53
4.2.1.5 Products ........................................................................54
4.2.1.6 Funding ........................................................................54
4.2.2 Industry Analysis .................................................................54
4.2.2.1 Industry Trend ........................................................................55
4.2.2.2 Porter’s Five Forces with Complementor ........................................55
   4.2.2.2.1 Bargaining Power of Suppliers ........................................55
   4.2.2.2.2 Bargaining Power of Buyers ........................................56
   4.2.2.2.3 Threat of Substitutes ......................................................57
   4.2.2.2.4 Threat of New Entrants ...................................................57
   4.2.2.2.5 Rivalry Among Firms ...................................................58
   4.2.2.2.6 Complementor ...............................................................58
4.2.2.3 Long-Term Prospect .................................................................58
4.2.3 Market Analysis .................................................................59
4.2.3.1 Market Segmentation .................................................................59
4.2.3.2 Target Market ....................................................................66
4.2.3.3 Market Position .................................................................66
4.2.3.4 Consumer Behavior .................................................................67
4.2.4 Marketing Plan .................................................................67
4.3.4 Customer Relationships ................................................................. 82
4.3.5 Key Resources ............................................................................ 82
4.3.6 Key Activities ........................................................................... 82
4.3.7 Key Partners ............................................................................. 83
4.3.8 Revenue Streams ...................................................................... 83
4.3.9 Cost Structure ........................................................................... 83

CHAPTER V CONCLUSIONS AND SUGGESTIONS
5.1 Conclusions .................................................................................. 84
5.2 Suggestions .................................................................................. 85

BIBLIOGRAPHY .................................................................................. 86
APPENDICES ..................................................................................... 90
LIST OF TABLES

Table 2.1 Chemical composition of rice bran per 100g .............................................6
Table 2.2 Chemical composition of rice bran from Indonesia’s local variety paddy .................................................................6
