ACKNOWLEDGEMENTS

Praise to the Lord Jesus Christ for His continuous blessing in the completion of this thesis report entitled “APPLICATION OF SEMI-DRIED RAMBUTAN (NEPHELIUM LAPPACEUM L.) AND ETHANOLIC EXTRACT PEEL TO COCONUT (COCOS NUCIFERA L.) SAP TO INHIBIT ALCOHOLIC FERMENTATION FOR COCONUT SUGAR PRODUCTION”. This thesis report was written as partial fulfillment of the academic requirements to obtain the degree of Sarjana Teknologi Pertanian Strata Satu.

The author realizes that this report would have not been successfully completed without the help and support from many parties. Therefore, the author would like to express sincere gratitude to:

1. Mr. Ir. W. Donald R. Pokatong, MSc., Ph.D., as the main supervisor who has given guidance, support, time and advices to the author throughout research preparation and thesis report completion.
2. Ms. Yuniwaty Halim, MSc, as the co-supervisor who has guided, supported and provided advice during thesis preparation and report completion.
3. Ms. Julia Ratna Wijaya, MAppSc as the Head of Food Technology Department for the opportunity in conducting this research.
4. Mr. Jeremia Manuel Halim, MP, Ms. Ratna Handayani, MP, and Ms. Ir. Melanie Cornelia, MT as the Heads of Quality Control, Research, Food Processing, Microbiology and Chemistry Laboratories, respectively.
5. Ms. Sisi Patricia, M.Eng as the Head of Microbiology Laboratory and examiner and Ms. Natania, M.Eng as the Head of Food Processing
Laboratory also as examiner for their beneficial inputs regarding thesis revisions.

6. Ms. Meri, Mr. Hendra, Ms. Rachel, Mr. Yosafat, Mr. Adzie and Mr. Darius who had helped the author during the work in the laboratories.

7. Beloved family, father (Albert Wijaya), mother (Anna Liang), brother (Andrew Wijaya), and sister (Ferent Wijaya) for the prayers, love and support for the author.

8. Audrey, Adeline Pannadhika, Rehuellah Angela, Grace Liesar and Hartono Tanambel who were supervised under the same main supervisor for the support and cooperation during the research work in the laboratories.

9. Mr. Abel and Mr. John for their assistance and time in obtaining coconut sap in Tangerang.

10. All lecturers and staff of Food Technology Department of UPH for the assistance and help given to the author during thesis completion.

11. Sherly Novia, Vincent Halim, Joshua Putra, Theresia Agustina, Steffen Oentoro, Wynn Nathaniel, Theola Wiryani, Calvin Chandra, Loliana Ratnasari, Rick Firmando, Nadya Selamat, Vanessa Jasmine, Alexandra Casie, Bella Agatha, Sharon Angela, and Devina Subowo for their support, assistance and motivation during the research.

12. All members of Food Technology 2011 who helped, motivated and experienced thesis research together.

13. All seniors and juniors from Food Technology Department for their support and guidance in the thesis research.
14. All friends and relatives who are not yet mentioned but have supported the author in completing the thesis research and report.

The author realizes that this report is still far from perfect. Therefore, any criticisms and suggestions for this report are welcomed. Lastly, the author hoped that this report would be useful for pertinent readers.

Tangerang, August 2015

COVER
STATEMENT OF THESIS AUTHENTICITY
APPROVAL BY THESIS SUPERVISORS
APPROVAL BY THESIS EXAMINATION COMMITTEE
ABSTRACT ........................................................................................................ v
ACKNOWLEDGEMENTS ........................................................................... vi
TABLE OF CONTENTS ................................................................................ ix
LIST OF FIGURES ....................................................................................... xii
LIST OF TABLES .......................................................................................... xiii
LIST OF APPENDICES ................................................................................. xiv

## CHAPTER I INTRODUCTION

1.1 Background .............................................................................................. 1
1.2 Research Problem .................................................................................... 2
1.3 Objective .................................................................................................. 3
   1.3.1 General Objectives ......................................................................... 3
   1.3.2 Specific Objectives ....................................................................... 3

## CHAPTER II LITERATURE REVIEW

2.1 Rambutan .................................................................................................. 4
   2.1.1 Utilization of Rambutan Peel ......................................................... 5
2.2 Coconut .................................................................................................... 6
   2.2.1 Coconut Sap ............................................................................... 7
   2.2.2 Fermentation of Coconut Sap ....................................................... 8
2.3 Fermentation Inhibitor ............................................................................ 10
2.4 Extraction ................................................................................................ 12
   2.4.1 Maceration .................................................................................. 13
   2.4.2 Percolation .................................................................................. 14
   2.4.3 Soxhlet Extraction .................................................................... 14
2.5 Coconut Sugar Production ..................................................................... 15
CHAPTER III RESEARCH METHODOLOGY

3.1 Materials and Equipment .......................................................... 17
3.2 Research Stages ........................................................................... 17
  3.2.1 Research Stage I Procedure .................................................. 18
  3.2.2 Research Stage II Procedure .................................................. 20
3.3 Experimental Design ................................................................. 22
  3.3.1 Research Stage I ..................................................................... 22
  3.3.2 Research Stage II ..................................................................... 24
3.4 Methods of Analysis .................................................................... 25
  3.4.1 Moisture Content using Oven Method .................................... 25
  3.4.2 pH Analysis ............................................................................ 25
  3.4.3 Total Reducing Sugar .............................................................. 25
  3.4.4 Total Sugar Content ................................................................. 27
  3.4.5 Total Dissolved Solid ............................................................... 28
  3.4.6 Total Titratable Acidity ............................................................ 29
  3.4.7 Alcohol Content ...................................................................... 29
  3.4.8 Bacterial and Yeast Count ....................................................... 30
  3.4.9 Yield of Coconut Sugar ............................................................ 31
  3.4.10 Texture Analysis ..................................................................... 31

CHAPTER IV RESULTS AND DISCUSSION

4.1 Size-reduced Semi-dried Rambutan Peel and Ethanolic Extract Yield .............................................................. 32
4.2 Physicochemical Properties of Coconut Sap Treated with Rambutan Peel .............................................................. 32
  4.2.1 pH ......................................................................................... 32
  4.2.2 Total Titratable Acidity ............................................................ 35
  4.2.3 Total dissolved solid ............................................................... 37
  4.2.4 Total sugar ............................................................................ 40
  4.2.5 Total reducing sugar ............................................................... 42
  4.2.6 Alcohol Content ...................................................................... 43
4.3 Microbial Enumeration of Coconut Sap Samples ........................................... 46
  4.3.1 Total Plate Count .................................................................... 46
  4.3.2 Yeast Count ............................................................................ 49
4.4 Production and Evaluation of Coconut Sugar Produced from Treated Sap

4.4.1 Yield of Coconut Sugar

4.4.2 Reducing Sugar Content of Coconut Sugar

4.4.3 Total Sugar Content of Coconut Sugar

4.4.5 Visual Appearance of Coconut Sugar

4.4.6 Texture Analysis of Coconut Sugar

CHAPTER V CONCLUSIONS AND SUGGESTIONS

5.1 Conclusions

5.2 Suggestions
