

ACKNOWLEDGEMENTS

Thanks be unto God, Jesus Christ, because of His blessings and guidance to the author during the preparation, research, and the completion of the thesis report with the title of “STUDY OF ANTIOXIDANT OF SILVER NANOPARTICLES SYNTHESIZED USING GREEN SPINACH (*Amaranthus blitum* L.) LEAF AND STEM EXTRACTS”. The author realized that this report could not be completely done without the prayer, guidance, assistance, and support from others. Therefore, the author would like to express gratitude to:

- 1) Mr. Ir. A. Herry Cahyana, MSc, Ph.D. as the thesis main supervisor, for the time, guidance, information, advice, and support during the process and completion of thesis report.
- 2) Ms. Yuniwaty Halim, MSc as the thesis co-supervisor and Head of Quality Assurance Laboratory, for the time, guidance, information, advice, and support during the process and the completion of thesis report.
- 3) Ms. Julia Ratna Wijaya, MAppSc as the Head of Food Technology Department, Faculty of Science and Technology, Universitas Pelita Harapan.
- 4) Mrs. Dr. Ir. Melanie Cornelia, MT., Head of Chemistry Laboratory and Mr. W. Donald R. Pokatong, Ph.D., both acting as examiner of the thesis, for the time and input for thesis revision.
- 5) Ms. Ratna Handayani, MP; Mrs. Sisi Patricia L. A. Gultom, M.Eng; and Mrs. Natania, M.Eng as Head of Food Research Laboratory, Microbiology Laboratory, and Food Processing Laboratory, respectively.

- 6) Mr. Hendra, Mrs. Meri, Mr. Darius, Mr. Adzie, and Mr Yosafat, for the support and guidance in the laboratory during the research.
- 7) Beloved families including father (Henricus Lusida), mother (Megawati Hong), brother (Stefanus Hugo Lusida), and sister (Gabriella Patricia Lusida) for the endless prayer, support, and help.
- 8) Raymond Adianto Juwono for his support and prayer.
- 9) Fellow friends under same supervision, the ‘nano rangers’: Yohanes Cahya Saputra, Jessica Lesmana, and Vania Budiyanto for supporting one another in completing this thesis.
- 10) All fellow friends who doing the thesis period in this semester together, especially: Wiesya Tantonno, Yunita Ng, Angelina Chew and Bella Natasha for always give support and encouragement.
- 11) Jessica Aprilly, Jessilia Sugita Gunawan, Selvina Koesyamin, and Stevannie Christie Taniman, for the help, togetherness, support, prayer, and encouragement to the author during the research period.
- 12) Rae Ninta Elisa, Elizabeth Kurniadi, Amanda Inggita, S.TP., and Edison Sutiono, S.TP. as the seniors of Food technology at Universitas Pelita Harapan for sharing experience and information regarding their thesis.
- 13) All lecturers and staff of the Universitas Pelita Harapan Food Technology Department for the help and information given to the author during thesis completion.
- 14) All Relatives who are not mentioned but have supported the author during the thesis period.

The author realizes that this report is not perfect, and might have done some mistakes during the thesis research process and completion of thesis report. The author welcomes any criticism and suggestion in order to improve this report. Finally, the author hopes that this thesis report would be useful and improve the knowledge of pertinent readers. Thank you.

Tangerang, June 2016

COVER	
STATEMENT OF THESIS AUTHENTICITY	
APPROVAL BY THESIS SUPERVISORS	
APPROVAL BY THESIS EXAMINATION COMMITTEE	
ABSTRACT	v
ACKNOWLEDGEMENTS	vi
TABLE OF CONTENTS	ix
LIST OF FIGURES	xii
LIST OF TABLES	xiii
LIST OF APPENDICES	xiv
CHAPTER I INTRODUCTION	
1.1 Background.....	1
1.2 Research Problem	3
1.3 Research Objectives	3
1.3.1 General Objectives.....	3
1.3.2 Specific Objectives	3
CHAPTER II LITERATURE REVIEW	5
2.1 Nanotechnology	5
2.1.1 Nanoparticles in Food Science	5
2.1.2 Synthesis of Nanoparticles	6
2.1.3 Silver Nanoparticles.....	6
2.1.4 Calcination.....	7
2.2 Green Spinach (<i>Amaranthus blitum</i> L.)	7
2.2.1 Composition of Green Spinach	9
2.3 Extraction.....	10
2.4 Antioxidant	11

CHAPTER III RESEARCH METHODOLOGY

3.1	Materials and Equipment.....	13
3.2	Research Method.....	13
3.2.1	Research Stage I	14
3.2.1.1	Sample Preparation	15
3.2.1.2	Sample Extraction	16
3.2.2	Research Stage II.....	16
3.3	Experimental Design.....	18
3.3.1	Research Stage I.....	18
3.3.2	Research Stage II.....	22
3.4	Method of Analysis	23
3.4.1	Total Phenolic Content.....	23
3.4.2	Total Flavonoid Content	24
3.4.3	Antioxidant Activity	24
3.4.4	Characteristics of Nanoparticles	25
3.4.4.1	Particle Size Analysis of Nanoparticles	26
3.4.4.2	Morphology of Nanoparticles.....	26

CHAPTER IV RESULTS AND DISCUSSION

4.1	Taxonomical Verification.....	28
4.2	Green Spinach Extraction.....	28
4.2.1	Dry Matter Yield of Extracts.....	29
4.2.2	Reducing Agents of Extracts.....	31
4.2.2.1	Total Phenolic Content.....	31
4.2.2.2	Total Flavonoid Content.....	34
4.3	Antioxidant Activity of Green Spinach Leaf and Stem Extracts.....	37
4.4	Formation of Silver Nanoparticles (Ag-NPs).....	39
4.4.1	Amount of Silver Nanoparticles (Ag-NPs).....	39
4.4.2	Antioxidant Activity of Silver Nanoparticles (Ag-NPs).....	42
4.4	Characteristics of Silver Nanoparticles (AgNPs)	45

CHAPTER V CONCLUSIONS AND SUGGESTIONS

5.1 Conclusions.....48
5.2 Suggestions.....49

BIBLIOGRAPHY.....50

APPENDICES.....54

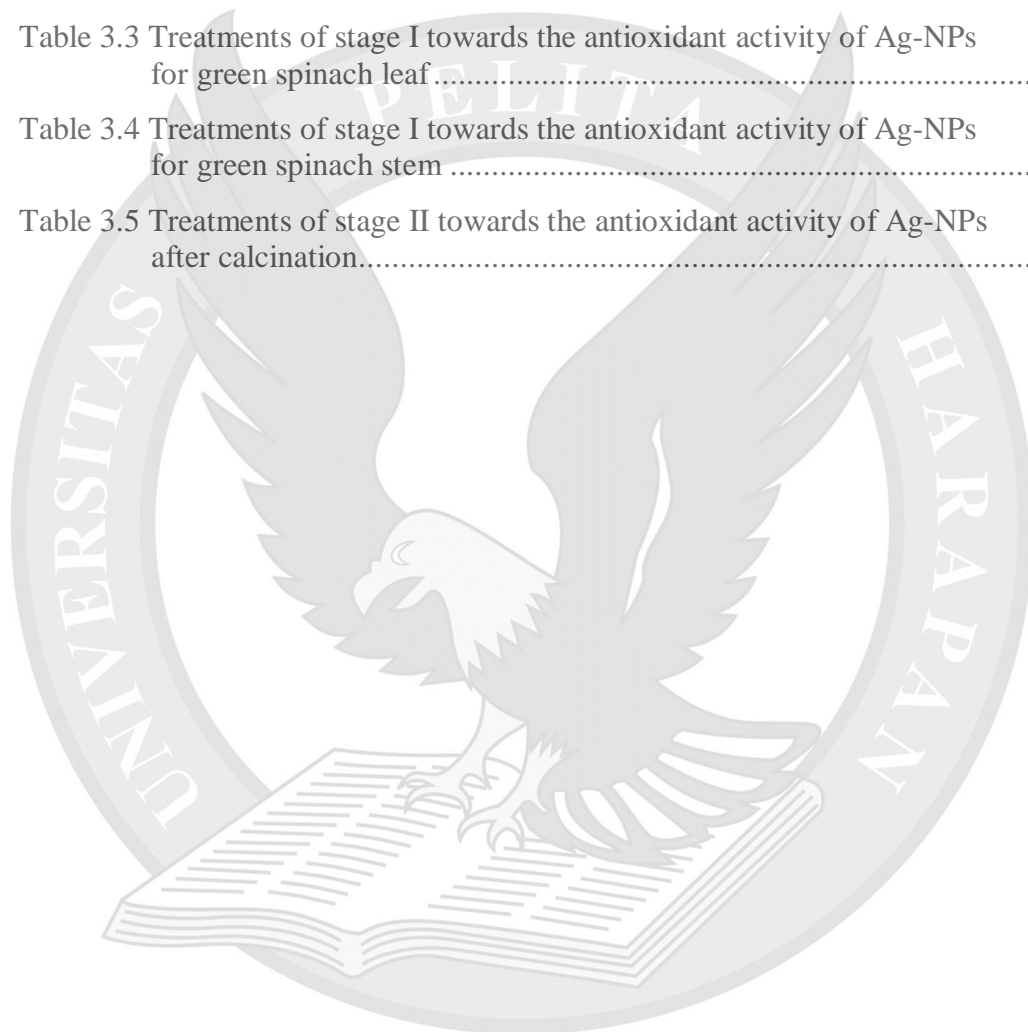

LIST OF FIGURES

	page
Figure 2.1 Green spinach vegetable plants.....	8
Figure 2.2 Mechanism of ascorbic acid as antioxidant.....	12
Figure 3.1 Flowchart of sample preparation of experimental design stage I.....	15
Figure 3.2 Experimental diagram of research stage I.....	17
Figure 3.3 Experimental diagram of research stage II.....	18
Figure 4.1 Dry matter of green spinach leaf extract.....	29
Figure 4.2 Dry matter of green spinach stem extract.....	30
Figure 4.3 Effect of solvent types towards the total flavonoid content of green spinach leaf extract.....	32
Figure 4.4 Effect of solvent types towards the total flavonoid content of green spinach stem extract.....	32
Figure 4.5 Effect of solvent types towards the yield of Ag-NPs synthesized from green spinach leaf extract.....	35
Figure 4.6 Effect of solvent types towards the yield of Ag-NPs synthesized from green spinach leaf extract.....	35

LIST OF APPENDICES

	page
Appendices A. Result of Identification of Green Spinach (<i>Amaranthus blitum</i> L.) Sample	A-1
Appendices B. Result of Identification of Green Spinach (<i>Amaranthus blitum</i> L.) Sample	A-1
Appendices C. Moisture Content Analysis of Green Spinach Leaf and Stem Sample	B-1
Appendices D. Data and Statistical Analysis of Dry Matter Yield of Green Spinach Leaf and Stem Extracts	C-1
Appendices E. Data and Statistical Analysis of Total Phenolic Content of Green Spinach Leaf and Stem Extracts	D-1
Appendices F. Data and Statistical Analysis of Total Flavonoid Content of Green Spinach Leaf and Stem Extracts	E-1
Appendices G. Data and Statistical Analysis of Antioxidant Activity of Green Spinach Leaf and Stem Extracts	F-1
Appendices H. Data and Statistical Analysis of Yield of Ag-NPs	G-1
Appendices I. Data and Statistical Analysis of Antioxidant Activity of Ag-NPs	H-1
Appendices J. Data and Statistical Analysis of Antioxidant Activity of Ag-NPs Treated with Calcination.....	I-1
Appendices K. Characterization of Ag-NPs Treated without Calcination	J-1
Appendices L. Characterization of Ag-NPs Treated with Calcination.....	K-1
