ACKNOWLEDGEMENTS

Praise the Lord Almighty for His blessing and grace for the author during the completion of this thesis report “UTILIZATION OF TOMATO (*Solanum lycopersicum*) IN SOY MILK BASED FROZEN DESSERT” that is one of the requirements for obtaining the degree of *Sarjana Teknologi Pertanian Strata Satu* in Food Technology Department, Faculty of Science and Technology, Universitas Pelita Harapan.

The author realizes that the thesis could not able to be finished without helps and supports from others. In this opportunity the author would like to thank the following parties for helping and supporting author.

1. Prof. Dr. L. Broto S. Kardono, Apt. (†) as the supervisor who guided, supported, and gave advices for the writer during the research was conducted and he had peacefully gone to the Father before being able to sign this report.

2. Julia Ratna Wijaya, MAppSc as the Head of Food Technology Department for the chance given to finish this thesis and co-supervisor for her time, guidance, and support, advices for the writer before, during, and after thesis research process until the report is done.

3. Sisi Patricia, MEng, as the deputy head of Food Technology Department for the support and advices.

4. Family member including father (Rosidi Gunawan), mother (Vonny Tjahyono), and sister (Vicky Gunawan) who always supported and prayed with all their heart for the writer during the thesis progress.

5. Nathania, MEng as the head of food processing laboratory, Jeremia Manuel Halim, MP as the head of quality control laboratory, Dr. Adolf Parhusip as the head of microbiology laboratory, Dr. Ir. Melanie Cornelia, MT as the
head of chemistry laboratory, Ratna Handayani, MP as the head of research laboratory for allowing the writer to use the laboratory with all the equipment during the research.

6. Mr. Adzie, Mr. Hendra, Ms. Meri, Ms. Rachel, Mr. Darius and Mr. Yosafat as the laboratory assistants for the time, guidance, help, and support during conducting research in the laboratory.

7. Tai Fang Yi who helped and supported the author during the research and while finishing the thesis with all her heart and prayers.

8. Gilbert Limeisa, Naufal Diosep Chandra, Pieter Antonius Saputra, William Pratama, Margarethta Manuella Corina, Ariel Siloam, Edison Sutiono, Livia Cornelia, Evelyn Felicia and Henry Gomuljo for the help and support given to the author while conducting the research and finishing the thesis.

9. All people and relatives who are not mentioned yet have also give contribution to the writer during thesis progress and completion of final report.

The writer realizes that this report is far from being perfect. Therefore author welcomes any critics and suggestion given. Moreover, the writer hopes it will give useful information and knowledge for the development of science. Finally, the writer also wants to thank you for the attention, suggestions, and critics given to this report.

Tangerang, September 2015

STATEMENT OF THESIS AUTHENTICITY
APPROVAL BY THESIS SUPERVISOR
APPROVAL BY THESIS EXAMINATION COMMITTEE

ABSTRACT ........................................................................................................... v
ACKNOWLEDGEMENT ................................................................................... vi
TABLE OF CONTENT ..................................................................................... viii
LIST OF TABLES ............................................................................................... xi
LIST OF FIGURES ............................................................................................ xii
LIST OF APPENDICES.................................................................................... xiv

CHAPTER I INTRODUCTION
1.1 Background ................................................................................................. 1
1.2. Research Problem ......................................................................................... 2
1.3 Objectives ...................................................................................................... 2
   1.3.1 General Objectives ................................................................................ 2
   1.3.2 Specific Objectives ............................................................................... 2

CHAPTER II LITERATURE REVIEW
2.1 Tomato (Solanum lycopersicum) ................................................................. 3
2.2 Citric Acid .................................................................................................... 4
2.3 Soy Milk ...................................................................................................... 4
2.4 Non Dairy Frozen Dessert (Parevine) ............................................................ 5
2.5 Pasteurization ............................................................................................... 6
2.6 Aging ............................................................................................................. 6
2.7 Overrun ........................................................................................................ 7
2.8 Freezing ...................................................................................................... 7
CHAPTER III RESEARCH METHODOLOGY
3.1 Materials and Equipments ................................................................. 9
3.2 Procedures ....................................................................................... 9
    3.2.1 Formulation of Soy Milk Frozen Dessert ................................. 9
    3.2.2 Production of Soy Milk Frozen Dessert .................................. 10
3.3 Experimental Design ................................................................. 10
3.4 Analysis ......................................................................................... 11
    3.4.1 Color .................................................................................... 11
    3.4.2 Overrun ............................................................................... 12
    3.4.3 Melting Time ................................................................. 12
    3.4.4 Organoleptic Test ............................................................... 12
    3.4.5 Moisture Content and Total Solid ..................................... 13
    3.4.6 Ash Content ................................................................. 13
    3.4.7 Protein Content ............................................................... 14

CHAPTER IV RESULT AND DISCUSSION
4.1 Physical and Chemical Properties of Soy Milk Frozen Dessert .......... 15
    4.1.1 Color ................................................................................. 15
    4.1.2 pH ................................................................................. 16
    4.1.3 Total Solid ................................................................. 18
    4.1.4 Melting Time ................................................................. 18
    4.1.5 Overrun ........................................................................ 19
4.2 Sensory Analysis of Soy Milk Frozen Dessert ................................. 20
    4.2.1 Color ............................................................................. 21
    4.2.2 Aroma ............................................................................ 22
    4.2.3 Taste ............................................................................... 24
    4.2.4 Texture ................................................................. 25
    4.2.5 Overall Acceptability ..................................................... 27

CHAPTER V CONCLUSION AND SUGGESTION
5.1 Conclusion .................................................................................... 30
5.2 Suggestion ................................................................................... 30
LIST OF TABLES

page

Table 2.1 Proximate compositions of Solanum Lycopersicum ......................... 4

Table 4.1 Hue of Soy Milk Frozen Dessert......................................................... 16
LIST OF FIGURES

Figure 2.1  *Solanum lycopersicum* .................................................................3

Figure 3.1  Process Flowchart of Soy Milk Frozen Dessert ..........................10

Figure 4.1  Effect of tomato juice concentration towards the lightness of Soy Milk Frozen Dessert .......................................................................................16

Figure 4.2  Effect of citric acid concentration towards pH of Soy Milk Frozen Dessert .........................................................................................................17

Figure 4.3  Effect of tomato juice concentration towards pH of Soy Milk Frozen Dessert .........................................................................................................17

Figure 4.4  Effect of citric acid and tomato juice concentration on melting time of Soy Milk Frozen Dessert .................................................................19

Figure 4.5  Effect of tomato juice concentration towards Soy Milk Frozen Dessert overrun ...............................................................................................20
