ACKNOWLEDGEMENTS

I am forever thankful to Jesus Christ for His blessings since this thesis has been completed, which entitled “ENCAPSULATION USING TAPIOCA STARCH OR MALTODEXTRIN ON RAMBUTAN-PEEL ETHANOLIC EXTRACT IN PERFORATED POUCHES, AND APPLIED TO SUGAR-PALM NEERA TO DELAY FERMENTATION FOR ALCOHOL PRODUCTION”. This thesis was written as a partial fulfillment of the academic requirements to obtain the degree of Sarjana Teknologi Pertanian Strata Satu, Food Technology Department, Faculty of Science and Technology, Universitas Pelita Harapan, Tangerang.

The completion of this thesis report also involved supports from several parties. Hence, the author would like to give the special gratitude particularly to:

1. Ir. W. Donald R. Pokatong, MSc., Ph.D., as thesis supervisor for the guidance, encouragement, time, and advices throughout the research and thesis completion.

2. Julia Ratna Wijaya, MAppSc, as Head of Food Technology Department for the opportunity in conduction this research.

3. Yuniwati Halim, MSc., Ratna Handayani, MP, Sisi Patricia L. A. Gultom, M.Eng, and Dr. Ir. Melanie Cornelia, MT as the Heads of Quality Control, Research, Microbiology, and Chemistry Laboratories, respectively.

4. Dr. Ir. Hardoko, MS. as examiner and Natania, M.Eng, Head of Food Processing Laboratory, also as examiner for the useful suggestions regarding thesis revision.
5. Hendra, Yosafat, Adzie, Merry and Darius who had helped the author during research.
6. Dearest father, mother, sister, and brothers for the financial support and unending prayers.
7. Billy Gunawan for his support, help, and encouragement.
8. Tiffany, Riorita Tandyputri, Virly, and Stevannie Christie who worked under the same supervisor for the cooperation, help, motivation and courage during the project completion.

Therefore, author gladly welcomes any constructive criticisms and suggestions that could refine the work. After all, author hopes that this thesis may provide useful informations to the pertinent readers.

Tangerang, February 2016

COVER
STATEMENT OF THESIS AUTHENTICITY
APPROVAL BY THESIS SUPERVISOR
APPROVAL BY THESIS EXAMINATION COMMITTEE
ABSTRACT........................................................................................................... v
ACKNOWLEDGEMENTS.................................................................................. vi
TABLE OF CONTENTS.................................................................................... viii
LIST OF FIGURES............................................................................................ xii
LIST OF TABLES............................................................................................... xiv
LIST OF APPENDICES..................................................................................... xv

CHAPTER I INTRODUCTION
1.1 Background ............................................................................................... 1
1.2 Research Problem....................................................................................... 3
1.3 Objectives.................................................................................................... 4
    1.3.1 General Objective ............................................................................... 4
    1.3.2 Specific Objectives ............................................................................ 4

CHAPTER II LITERATURE REVIEW
2.1 Rambutan .................................................................................................. 6
2.2 Rambutan Peel ............................................................................................ 8
2.3 Sugar Palm .................................................................................................. 10
2.4 Sugar Palm Neera ....................................................................................... 12
    2.4.1 Sugar Production ............................................................................. 13
    2.4.2 Alcoholic Fermentation .................................................................... 14
2.5 Fermentation Inhibitor .............................................................................. 14
2.6 Encapsulation .............................................................................................. 16
CHAPTER IV RESULTS AND DISCUSSION

4.1 Moisture Content and Extraction Yield of Rambutan Peel Ethanolic Extract ................................................................. 54

4.2 Ratio of Rambutan Peel Ethanolic Extract to Encapsulant ................................................................. 54

4.3 Physicochemical Characteristics of Fermented Sugar Palm Neera Treated with Rambutan Peel Ethanolic Extract Encapsulated with Tapioca Starch or Maltodextrin ................................................................. 56

4.3.1 pH ................................................................. 56

4.3.2 Total Titratable Acidity ................................................................. 59

4.3.3 Total Dissolved Solid ................................................................. 61

4.3.4 Total Sugar ................................................................. 64

4.3.5 Reducing Sugar ................................................................. 67

4.3.6 Alcohol Content ................................................................. 70

4.3.7 Microbial Counts ................................................................. 72

4.3.7.1 Total Plate Count ................................................................. 72

4.3.7.2 Yeast and Mold Count ................................................................. 75

4.4 Physicochemical Characteristics of Fermented Sugar Palm Neera of Pouched Extract Encapsulated with Tapioca Starch or Maltodextrin Before and After Pouch Withdrawal ................................................................. 78

4.4.1 pH ................................................................. 78

4.4.2 Total Dissolved Solid ................................................................. 80

4.4.3 Alcohol Content ................................................................. 82

4.5 Selected Treatments ................................................................. 85

4.6 Distilled Bioethanol ................................................................. 85
CHAPTER V CONCLUSIONS AND SUGGESTIONS
5.1 Conclusions ........................................................................................................ 89
5.2 Suggestions ........................................................................................................... 90

BIBLIOGRAPHY .......................................................................................................... 91
APPENDICES ................................................................................................................ 100
LIST OF FIGURES

Figure 2.1 Four varieties of rambutan in Indonesia .................................................. 7
Figure 3.1 Processes used to prepare rambutan peel extract, encapsulation of extract and its application to sugar palm neera for fermentation ................................................................. 33
Figure 3.2 Processes used for rambutan peel extracts preparation and its application to sugar palm neera ................................................................. 35
