

ACKNOWLEDGEMENTS

First and the foremost, the author would like to thank Jesus Christ for His blessings and grace which makes the author to be able to complete the research and thesis entitled “EFFECT OF GUAR GUM AND EGG ADDITION ON NOODLE ANALOGUE CHARACTERISTICS”. This report is the tangible proof of when I give my weakness to God, He will give me His strength.

The report was done to fulfil the requirements for obtaining bachelor’s degree in Food Technology Study Program, Universitas Pelita Harapan. The completion of this research would not have been possible without guidance, supports and prayers from other parties. Therefore, the writer wants to take this opportunity to express sincere gratitude to:

1. Mr. Eric Jobiliong, Ph.D. as the Dean of Faculty of Science and Technology, Pelita Harapan University.
2. Dr. Nuri Arum Anugrahati, as the Vice Dean of Faculty of Science and Technology, Pelita Harapan Univeristy.
3. Mr. Laurence, S.T., M.T. as the Director of Administration and Student Affairs of Faculty of Science and Technology, Pelita Harapan University.
4. Mr. Ir. Wilbur Donald Raymond Pokatong, Ph.D. as the Head of Food Technology Department, Faculty of Science and Technology, Pelita Harapan University for the chance that has been given to the author.
5. Mrs. Ratna Handayani, M.P., as the Deputy of Food Technology Study Program.
6. Mrs. Yuniwaty Halim, M.Sc. as thesis supervisor that has helped the author by giving time, guidance and critique through the whole research program.
7. Dr. Tagor M. Siregar, M.Si., Natania, M.Eng., and Yuniwaty Halim, M.Sc., as the respective Head of Chemistry, Food Processing, Quality Control and Research Laboratories who had given the permission to conduct the research.

8. Dr. Ir. Hardoko as the lecturers of Food Technology Study Programs for the guidance and suggestions given to the authors regarding the research.
9. Dr. Ir. Melanie Cornelia, M.T. and Lucia C. Soedirga, M.Sc. as examiners in thesis defense for input given for this research.
10. All lecturers, assistant lecturers, and laboratory assistants of Food Technology Study Program for the help given during research.
11. The author's family for the support, prayers and care which made the hardship during the research and finishing the thesis worthwhile.
12. Mr. Herman Lie, who had given time, support, and guidance throughout the process.
13. Joanna Jung, Christine Nathalia and Mackenzie, who has given support endlessly throughout the process.
14. Clara Tasia, Calmness Felia Halim, Ida Ayu Komang Chandra Devi, and Yesyurin Kirana as author's friends who gave endless support, help, time and prayers for the author throughout the research and the making of thesis.
15. All CC kids, Brigitta Angelina, Charlene Octavian, Febiana Christy, Irene Natasha, Joanne Tirto, Michael Austin, Michael Dj, Mona Felicia, Shania Edeline, Steven Ibrahim, Yolita Lilian, and Wilfrina as author's classmates who shared the memories for years and gave author help and supports throughout the study in Food Technology.
16. Jessica Amelia, Abel, Megan, and Deli, who had done research together under the same topic.
17. All friends from Food Technology Universitas Pelita Harapan.
18. All friends and relatives who had not been mentioned but also has given the support and help throughout the thesis program and report.

The author is aware that this report is not perfect, therefore the author apologizes to everyone if the author might have done some faults during the research and the writing of this report. The author would gratefully accept any

criticism and suggestion given to this report. The author hopes that this thesis report will be useful for the readers. Thank you.

LIST OF APPENDICES

Appendix A.	
Moisture Content of Noodle Analogue with Various Guar Gum and Egg Concentration.....	A-1
Appendix B.	
Cooking Loss of Commercial Noodle and Noodle Analogue with Various Guar Gum and Egg Concentration.....	B-1
Statistic Results of Cooking Loss of Noodle Analogue with Various Guar Gum and Egg Concentration.....	B-5
Duncan Test Results of Cooking Loss of Noodle Analogue with Various Guar Gum and Egg Concentration.....	B-6
Appendix C.	
Water Absorption of Commercial Noodle and Noodle Analogue with Various Guar Gum and Egg Concentration.....	C-1
Statistic Results of Water Absorption of Noodle Analogue with Various Guar Gum and Egg Concentration.....	C-3
Duncan Test Results of Water Absorption of Noodle Analogue with Various Guar Gum and Egg Concentration.....	C-4
Appendix D.	
Hardness of Commercial Noodle and Noodle Analogue with Various Guar Gum and Egg Concentration.....	D-1
Statistic Results of The Hardness of Noodle Analogue with Various Guar Gum and Egg Concentration.....	D-2
Duncan Test Results of The Hardness of Noodle Analogue with Various Guar Gum and Egg Concentration.....	D-3
Appendix E.	
Adhesiveness of Commercial Noodle and Noodle Analogue with Various Guar Gum and Egg Concentration.....	E-1
Statistic Results of The Adhesiveness of Noodle Analogue with Various Guar Gum and Egg Concentration.....	E-2
Duncan Test Results of The Adhesiveness of Noodle Analogue with Various Guar Gum and Egg Concentration.....	E-3
Appendix F.	
Springiness of Commercial Noodle and Noodle Analogue with Various Guar Gum and Egg Concentration.....	F-1

Statistic Results of The Springiness of Noodle Analogue with Various Guar Gum and Egg Concentration.....	F-3
Duncan Test Results in The Concentration of Guar Gum on The Springiness of Noodle Analogue.....	F-3

Appendix G.

Cohesiveness of Commercial Noodle and Noodle Analogue with Various Guar Gum and Egg Concentration.....	G-1
Statistic Results of The Cohesiveness of Noodle Analogue with Various Guar Gum and Egg Concentration.....	G-2
Duncan Test Results in The Concentration of Guar Gum on The Cohesiveness of Noodle Analogue.....	G-3
Duncan Test Results in The Concentration of Egg on The Cohesiveness of Noodle Analogue.....	G-3

Appendix H.

Tensile Strength of Commercial Noodle and Noodle Analogue with Various Guar Gum and Egg Concentration.....	H-1
Statistic Results of The Tensile Strength of Noodle Analogue with Various Guar Gum and Egg Concentration.....	H-3
Duncan Test Results of The Tensile Strength of Noodle Analogue with Various Guar Gum and Egg Concentration.....	H-4

Appendix I.

Elongation of Commercial Noodle and Noodle Analogue with Various Guar Gum and Egg Concentration.....	I-1
Statistic Results of The Elongation of Noodle Analogue with Various Guar Gum and Egg Concentration.....	I-2
Duncan Test Results of The Elongation of Noodle Analogue with Various Guar Gum and Egg Concentration.....	I-3

Appendix J.

Statistic Results of Hedonic Test Result on The Taste of Noodle Analogue with Various Guar Gum and Egg Concentration.....	J-1
Statistic Results of Hedonic Test Result on The Aroma of Noodle Analogue with Various Guar Gum and Egg Concentration.....	J-1
Statistic Results of Hedonic Test Result on The Chewiness of Noodle Analogue with Various Guar Gum and Egg Concentration.....	J-2
Duncan Test Results of Hedonic Test Result on The Chewiness of Noodle Analogue with Various Guar Gum and Egg Concentration.....	J-2
Statistic Results of Hedonic Test Result on The Hardness of Noodle Analogue with Various Guar Gum and Egg Concentration.....	J-3
Duncan Test Results of Hedonic Test Result on The Hardness of Noodle Analogue with Various Guar Gum and Egg Concentration.....	J-3

Statistic Results of Hedonic Test Result on The Adhesiveness of Noodle Analogue with Various Guar Gum and Egg Concentration.....	J-4
Statistic Results of Hedonic Test Result on The Overall Acceptance of Noodle Analogue with Various Guar Gum and Egg Concentration.....	J-4
Duncan Test Results of Hedonic Test Result on The Overall Acceptance of Noodle Analogue with Various Guar Gum and Egg Concentration.....	J-4

Appendix K.

Fat Content of Noodle Analogue with Various Guar Gum and Egg Concentration and Commercial Noodle.....	K-1
Protein Content of Noodle Analogue with Various Guar Gum and Egg Concentration and Commercial Noodle.....	K-2
Ash Content of Noodle Analogue with Various Guar Gum and Egg Concentration and Commercial Noodle.....	K-3
Moisture Content of Noodle Analogue with Various Guar Gum and Egg Concentration and Commercial Noodle.....	K-4
Carbohydrate Content of Noodle Analogue with Various Guar Gum and Egg Concentration and Commercial Noodle.....	K-5

Appendix L.

Statistic Results of Proximate, Cooking Loss, and Water Absorption Comparison of Best Noodle Analogue and Commercial Noodle.....	L-1
Statistic Results of Texture Comparison of Best Noodle Analogue and Commercial Noodle.....	L-3

Appendix M.

Statistic Results of Paired Comparison of Best Formulated Noodle Analogue.....	M-1
--	-----

Appendix N.

Hedonic Test Questionnaire	N-1
----------------------------------	-----

Appendix O.

Paired Comparison Test Questionnaire.....	O-1
---	-----

Appendix P.

The result of noodle analogue dough after kneading process.....	P-1
Noodle analogue dough during the pressing into strands process.....	P-1
Noodle analogue after steaming process	P-1
Dry noodle analogue after air drying process	P-1
Cooked noodle analogue	P-2
