

ACKNOWLEDGEMENTS

Greatest amount of gratitude is given to Jesus Christ for His guidance and blessings given to the writer upon the completion of this thesis report, which is part of the academic requirements in obtaining a degree of *Sarjana Teknologi Pertanian Strata Satu* in Food Technology Department, Faculty of Science and Technology, Universitas Pelita Harapan.

The writer would also like to thank many other people whom without their roles, the completion of this thesis report could not be achieved. Writer feels truly thankful and in this opportunity would like to express an enormous gratitude to:

1. Ms. Dr. Ir. Raffi Paramawati, M.Si. as the thesis supervisor, for her time, patience, support, advices, care and guidance throughout the entire process.
2. Ms. Sisi Patricia Lolita Ameria Gultom, M. Eng as the thesis co-supervisor and the Vice Head of Food Technology Department in Universitas Pelita Harapan, for her time, patience, support, advices, care and guidance throughout the entire process.
3. Ms. Julia Ratna Wijaya, MAppSc, as the Head of Food Technology Department in Universitas Pelita Harapan for giving a chance to complete this thesis and for all of the advices and support she has given the writer.
4. Her late beloved father and mother, who had never stop supporting the writer and had faith in her until their last breath, and to the rest of her family

members, Halim Wijaya, Tony Hermanto, and Tono for their care and endless prayers.

5. Ms. Ratna Handayani, Mr. Jeremia Manuel Halim, Mr. Adolf Parhusip, Ms. Melanie Cornelia and Ms. Natania as Head of Research, Quality Control, Microbiology, Chemistry and Food Processing Laboratory for allowing the writer to work in the laboratories.
6. All the lecturers and staffs in Universitas Pelita Harapan and University of Newcastle for the knowledge and support they have given to the writer.
7. Mr. Adjie, Mr. Hendra, Ms. Merry, Mr. Darius, Mr. Yosafat and Ms. Rachel, as laboratory assistants for the help, care and support.
8. Willy Wijaya for continuously supporting and praying for the writer.
9. Felincia Kurniawan, Nadia Riani, Felicia Putri, Chiara Wijaya and Veliana Lim for being there for the writer as they struggled and enjoyed the whole process together.
10. Jennifer Terisno, Jessica Adipradhana, Angela Indryana, Zefanya Tjokrodiredjo and other fellow 2010 batch as writer's friends for their support and help.
11. Sylvie Prawiro, Silvia Suminto, Patricia, Mevina, Steffi Augustine, Irene Angga Kusuma, Jacqueline Sutjiawan, Hansen Setiawan, Santo Wijaya and Martin Lie for their support and care.
12. Pdt. Handoyo Santoso, D.Min, as the writer's father in faith, for his endless prayers and support for the writer.
13. All the panelists who took part in the writer's sensory analysis.

14. All those who has helped the writer in in the research and upon completing this report but are not mentioned.

Writer would like to apologize in advance for any mistakes that may present in this thesis report. Writer would also appreciate any criticism or suggestion upon the contents of this report and wish that this report might contribute some benefits to the readers and to the development in Food Technology.

Karawaci, August 29th, 2014

Writer

COVER	
STATEMENT OF THESIS AUTHENTICITY	
APPROVAL BY THESIS SUPERVISORS	
APPROVAL BY THESIS EXAMINATION COMMITTEE	
ABSTRACT	v
ACKNOWLEDGEMENTS	vi
TABLE OF CONTENT	ix
LIST OF TABLES	xii
LIST OF FIGURES	xiv
LIST OF APPENDICES	xv
CHAPTER I INTRODUCTION	
1.1 Background	1
1.2 Research Problem	3
1.3 Objective	3
1.3.1 General Objectives.....	3
1.3.2 Specific Objectives.....	4
CHAPTER II LITERATURE REVIEW	
2.1 Cookies.....	5
2.1.1 Cookie Ingredients.....	5
2.1.2 Cookie Production.....	7
2.2 Cookie Characteristics and Factors Affecting Them	8
2.3 Square Banana (<i>Musa balbisiana</i>) and Its Flour	10
2.3.1 Browning and Its Prevention in The Production of Banana Flour	12
2.4 Sugar and Sweeteners	16
2.5 Coeliac Disease.....	19

2.5.1 Gluten Free Cookies.....	20
2.6 Dietary Fiber.....	20

CHAPTER III RESEARCH METHOD

3.1. Materials and Equipment.....	22
3.2 Research Methodology.....	23
3.2.1 Preliminary Research.....	23
3.2.2 Main Research.....	25
3.3 Experimental Design.....	27
3.3.1 Main Research.....	27
3.4 Analysis Procedures.....	29
3.4.1 Moisture Content (AOAC, 2005).....	29
3.4.2 Texture Analysis (Bourne, 1978).....	29
3.4.3 Yield.....	30
3.4.4 Dimension of Cookies (Lai and Lin, 2006).....	30
3.4.5 Color Analysis (Zoulias <i>et al.</i> , 2000).....	30
3.4.6 Ash Content Analysis (AOAC, 2005).....	31
3.4.7 Protein Content Analysis (AOAC 945.18-B, 2005).....	31
3.4.8 Fat Content Analysis (AOAC 920.39C, 2005).....	32
3.4.9 Total Dietary Fiber Analysis (AOAC 991.43, 2005).....	33
3.4.10 Carbohydrate by Difference (Food Standards Australia New Zealand, 2012).....	34
3.4.11 Calorie (Food Standards Australia New Zealand, Subclause 2(1) of Standard 1.2.8., 2012).....	34
3.4.12 Sensory Analysis (Moskowitz <i>et al.</i> , 2006).....	34

CHAPTER IV RESULTS AND DISCUSSION

4.1. Triangle Test on Best Preferred Cookies with Control Cookies (Sucrose).....	35
4.2 Effect of Flour Pre-Treatments on the Physical and Chemical Characteristics of The Banana flour.....	36

4.2.1 Moisture Content.....	36
4.2.2 Color.....	37
4.2.3 Yield.....	39
4.3 Effect of Flour Ratio and Pre-treatments Type of Banana Flour On Physico-chemical Properties of Cookies	40
4.3.1 Moisture Content.....	40
4.3.2 Diameter Increase and Spread Ratio.....	41
4.3.3 Yield of Cookies.....	43
4.3.4 Color.....	44
4.3.5 Hardness.....	46
4.4 Effect of Flour Ratio and Pre-treatments Type of Banana Flour on Sensory Attributes of Cookies.....	47
4.4.1 Color Attributes.....	47
4.4.2 Aroma Attribute.....	49
4.4.3 Texture Attribute.....	50
4.4.4 Flavor Attribute.....	52
4.4.5 Sensory Evaluation on Overall Acceptance.....	54
4.4.6 Determination of Best Preferred Cookies.....	55
4.5 Nutrition Composition of The Preferred Cookies	56
 CHAPTER V CONCLUSIONS AND SUGGESTIONS	
5.1 Conclusions	58
5.2 Suggestions.....	59
 BIBLIOGRAPHY.....	60
APPENDICES.....	67

LIST OF TABLES

LIST OF APPENDICES

	page
Appendix A. Calculation of Sweeteners	A-1
Appendix B. Triangle Test	B-1
Appendix C. Taxonomical verification results for square banana	C-1
Appendix D. Moisture Content of Banana Flour	D-1
Appendix E. Color of Flour	E-1
Appendix F. Yield of Flour	F-1
Appendix G. Main Research	G-1
Appendix H. Proximate Analysis on the Most Optimum Flour Produced	H-1
Appendix I. Proximate Analysis on the Best Preferred Cookies	I-1
Appendix J. Dietary Fiber Analysis Results	J-1
Appendix K. Nutrition Composition of Mocaf	K-1
