ACKNOWLEDGEMENTS

The authors want to give thanks to God for His blessing so the writer is able to finish the Final project research and also able to finish the final project report on time which entitled “FORMULATION OF NON–SUCROSE CAJUPUTS SOFT CANDY WITH FRUITS FLAVOR ACCEPTED BY CHILDREN” without any necessary obstacle. Final project is determined as one of compulsory project that is required in order to obtain bachelor degree in Food Technology Universitas Pelita Harapan. The writer realize that this research and thesis report could not be finished without guidances, assistance, support and helps from various parties. Therefore the writer would like to send her gratitude to:

1. Prof. C. Hanny Wijaya as the thesis supervisor who has given her time and effort to give guidance, help, and support during research and report writing.
2. Lisa Amanda Yakhin, M.Eng as thesis co-supervisor who has given her time and effort to help, give guidance and support during research and report writing.
3. Julia Ratna Wijaya, MAppSc as the Head of Food Technology Department.
4. Mr. W. Donald R. Pokatong, Ph.D. and Ms. Yuniwaty Halim, MSc as thesis examiners for the suggestion, knowledge and support.
5. Headmaster of SD Dasana Indah who has given opportunity to conduct sensory evaluation at SD Dasana Indah.
6. Mrs. Pariyati as the Headmaster of SD Citra Kasih who has given opportunity to conduct sensory evaluation at SD Citra Kasih.
7. Mr. Sandy Yap and Ms. Eveline as the board member of Sekolah Minggu Siddharta Padummutarra who has given opportunity to conduct sensory evaluation at Sekolah Minggu Paddummutarra.
8. Ms. Herzegiovinata and Ms. Sharleen as the board member of Sekolah Minggu Dharma Suci who has given opportunity to conduct sensory evaluation at Sekolah Minggu Dharma Suci,
9. Beloved Father, Kiat Koy Hian and Mother, Lioe Tjie Fie for their endless supports and help and advice during research and report writing. Beloved brother, Sutrisno Wijaya, for his endless help and support for the research.

10. Mrs. Natania as the Head of Food Processing Laboratory for the knowledge and information that make the writer able to do the research comfortably.

11. Mr. Jeremia Manuel, Ms. Ratna, Mr. Adolf and Mrs. Melanie as head of laboratories who allow writer to do research comfortably.

12. Mr. Ajie, Ms. Merry, Mr. Yosafat, Mr. Darius and Mr. Hendra as laboratory assistance for the help and guidance to the writer during the research.

14. Meriti, Kristiani, Chiara Wijaya, Hanna Hadi Pranoto, Hanna Yunita C, Loly Intan, Michelle Angelia, Irene Astria Lim, Zefanya T and Ellyn as the writer’s close friends for the laughter, companion and support when the writer feels down.

15. All member of Keluarga Mahasiswa Vidya Buddhis (KMVB) for their endless support and helps.

16. Zefanya T, Stivan E. H, and Felix S. for the togetherness, support and help during consultation and research time.

17. Fellow friends who were conducting research together, for their helps and support.

18. To all of Food Technology students, panelist, all friends and relatives who have not been mentioned for the supports and help to the writer during research and thesis report writing.

The writer realizes there is still lack on this final project report. Therefore the writer accepts all critics and suggestion from all parties. The writer hopes this report can be useful for the readers.

COVER
STATEMENT OF THESIS AUTHENTICITY
APPROVAL BY THESIS SUPERVISORS
APPROVAL BY THESIS EXAMINATION COMMITTEE

ABSTRACT .............................................................................................................. v
ACKNOWLEDGEMENT .......................................................................................... vi
TABLE OF CONTENTS ............................................................................................ viii
LIST OF TABLES .................................................................................................... xi
LIST OF FIGURES .................................................................................................. xii
LIST OF APPENDICES ............................................................................................ xiii

## CHAPTER I INTRODUCTION
1.1 Background ......................................................................................................... 1
1.2 Research Problem ............................................................................................... 3
1.3 Objectives ............................................................................................................. 3
   1.3.1 General Objective .................................................................................. 3
   1.3.2 Specific Objective ................................................................................. 3

## CHAPTER II LITERATURE REVIEW
2.1 Cajuput Oil ........................................................................................................... 4
2.2 Peppermint Oil .................................................................................................. 4
2.3 Cajuputs candy .................................................................................................... 5
2.4 Soft Candy .......................................................................................................... 5
2.5 Flavor .................................................................................................................. 7
   2.5.1 Flavoring ............................................................................................... 7
      2.5.1.1 Honeydew Flavor Compound ...................................................... 8
      2.5.1.2 Banana Flavor Compound ......................................................... 8
      2.5.1.3 Apple Flavor Compound ......................................................... 8
      2.5.1.4 Mango Flavor Compound ...................................................... 8
      2.5.1.5 Guava Flavor Compound ....................................................... 9
2.6 Isomalt ................................................................................................................. 9
CHAPTER III RESEARCH METHOD

3.1 Materials and Equipments ........................................................................... 19

3.2 Research Stages ............................................................................................ 19

3.2.1 Determination of Non-Sucrose Cajuputs Soft Candy Formulation ................. 19

3.2.2 Determination of Optimum Flavor Concentration Addition .................... 23

3.2.3 Determination of Suitable Flavor for Cajuputs Soft Candy ......................... 24

3.2.4 Optimization of the Best Flavor Combination .......................................... 24

3.2.5 Product Verification and Consumer Acceptance Test ............................ 25

3.2.6 Product Profile ...................................................................................... 26

3.3 Analysis Procedure ...................................................................................... 26

3.3.1 Moisture Content (AOAC, 2005) ............................................................ 26

3.3.2 Ash Content (SNI, 2008) ..................................................................... 26

3.3.3 Texture (Syalfina, 2007) ...................................................................... 27

3.3.4 Hedonic Test (Kemp et al., 2009) .......................................................... 27

3.3.5 Multiple-Difference Test (Kemp et al., 2009) ......................................... 28

3.3.6 Ranking Test (Kemp et al., 2009) .......................................................... 28
LIST OF TABLES

Table 2.1 Non-Jelly Soft Candy Standard According to SNI 3547.2:2008....... 6
Table 2.2 Maltitol-based Soft Candy Formulation............................................. 6
Table 3.1 Formulation of Non-Sucrose Cajuputs Soft Candy ......................... 19
Table 3.2 Treatment for Determination Basic Cajuputs Soft Candy Formulation ........................................................................................ 19
Table 3.3 Treatment for Determination Cajuputs Soft Candy Formula............ 20
Table 3.4 Percentage of Flavoring Addition in Formulation ......................... 22
Table 3.5 Experimental Design for Formula Optimization ............................ 23
Table 4.1 Texture profile of Cajuputs Soft Candy Made with Difference Concentration of Arabic Gum.......................................................... 28
Table 4.2 Multiple Paired Comparison Test Result on the Sample............... 28
Table 4.3 ANOVA Result of Texture Analyzer Test on Maltodextrin Concentration Addition............................................................... 29
Table 4.4 Hedonic Summary Result of Each Flavor ....................................... 31
Table 4.5 Hedonic Test Result ...................................................................... 32
Table 4.6 Hedonic Result of RSM Formulation using Overall Acceptance as Parameter................................................................. 34
Table 4.7 ANOVA Equation Model Result of Overall Acceptance Parameter ................................................................. 34
Table 4.8 Target of Each Response in Formula Optimization .................... 38
Table 4.9 Formula Optimization Result of Honeydew and Banana Flavor........ 38
Table 4.10 Comparison of Predicted Value with Verification Value............... 39
Table 4.11 Consumer Test Result.................................................................. 42
LIST OF FIGURES

Figure 2.1 Sucralose Chemical Structure.......................................................... 11

Figure 3.1 Soft Candy Making Flow Chart for Cajuputs Soft Candy Formulation........................................................................... 19

Figure 3.2 9-scale Hedonic Test for Children......................................................25

Figure 4.1 Contour Plot of Overall Acceptance Parameters on Cajuputs Chewy Candy with Fruits Flavor......................................................... 36

Figure 4.2 Surface Plot of Overall Acceptance Parameter on Cajuputs Chewy Candy with Fruits Flavors.......................................................... 36

Figure 4.3 Panelist Percentages According to Gender.................................41

Figure 4.4 Panelist Percentages According to Age.................................41
LIST OF APPENDICES

Appendix A. Multiple Paired Comparison Questionnaire........................................... A-1
Appendix B. Hedonic Questionnaire to Obtain Optimum Flavor Concentration................ B-1
Appendix C. Ranking Test Questionnaire................................................................ C-1
Appendix D. Children Hedonic Questionnaire.......................................................... D-1
  Appendix E. Children Product Verification and Consumer Acceptance Questionnaire......................................................... E-1
  Appendix F. Result on Gum Arabic Concentration Addition................................ F-1
  Appendix G. Result on Maltodextrin Concentration Addition.............................. G-1
  Appendix H. Hedonic Test Result for Flavor Concentration Addition.................. H-1
  Appendix I. Favorable Fruit Flavors Ranking Test Result................................... I-1
  Appendix J. Favorable Fruit Hedonic Test Result on Children............................ J-1
  Appendix K. Hedonic Result of RSM Formulation.............................................. K-1
  Appendix L. RSM Statistic Result......................................................................... L-1
  Appendix M. Product Verification Result............................................................. M-1
  Appendix N. Respondence Analysis of Consumer Acceptance Panelist............... N-1
  Appendix O. Consumer Acceptance Result.......................................................... O-1
  Appendix P. Product Profile Analysis Result....................................................... P-1
