ACKNOWLEDGEMENTS

Praise and gratitude to God for His blessing and His grace that this thesis report entitled “UTILIZATION OF BITTER LEAF (*Vernonia amygdalina*) EXTRACT, GREEN TEA (*Camelia sinensis*) AND STEVIA (*Stevia rebaudiana*) IN THE PRODUCTION OF FUNCTIONAL BEVERAGE” could come to a completion. This thesis report is written as a partial fulfilment of the academic requirements to obtain degree of *Sarjana Teknologi Pertanian Strata Satu* in Food Technology department, Faculty of Science and Technology of Universitas Pelita Harapan, Tangerang.

This thesis report would not be possible and successfully completed without the help, support, prayers and guidance from several parties. In this occasion, expression of sincere gratitude and appreciation are given to:

1. Prof. Dr. Manlian Ronald A. S., ST., MT. as Dean of the Faculty of Science and Technology for the leadership and the approval of this report.

2. Ir. W. Donald R. Pokatong, M.Sc., Ph. D as the Head of Food Technology Study Program, for the opportunity to conduct this research and approval of this thesis report.

3. Dr. Ir. Raffi Paramawati, MSi as thesis supervisors, for the genuine guidance, care, inspiration, patience, support as well as useful advice until the research and thesis is finally completed.

4. Dr. Tagor M. Siregar, M.Si as thesis examiner and Head of Chemistry Laboratory for the valuable advice and suggestions to the research.
5. Yuniwaty Halim, MSc, as thesis examiner and Head of Quality Control and Research Laboratories for the help, support, patience and guidance, and opportunity to conduct this research in the laboratory.

6. Wenny Silvia Loren Sinaga, M.Si, as Academic Advisors for the help and guidance.

7. Natania, M.Eng, as Head of Food Processing Technology Laboratory and Dr. Ir. Adolf JN. Parhusip, M.Si, as Head of Microbiology Laboratory for the guidance and advices as well as opportunity to conduct this research in the laboratory.

8. Beloved father (Rudy Halim), mother (Helena Halim), sister (Isabell Virginia Halim and Clarissa Virginia Halim), brother (Calvin Scorpiano Halim), grandmother (Rita Julian) and aunt (Januaty Halim) and the rest of the family for providing endless care, prayers, support and comfort until the thesis is completed.

9. Ardelyta Susanti, Alvita Phoandy, Diana Gozal, Melita Paramita, Yulia Tendean, and Revita Ester as fellow friends under supervision of the same supervisor for the invaluable motivation, help, support, cooperation and memorable moments throughout the thesis completion.

10. Revina Tjahja, Suhendrick Priyono, Priscilla Tania, Yossi Triana, Rani Pasau, Abigail Keziah, Fiona Milkha, Felisia Varian for the endless help, support, care and invaluable moments shared during the thesis completion.

11. Raymond Winoto and family for the generous care, assistance, encouragement, and prayers throughout during the research.
12. Mr. Adzie, Mr. Darius, Mr. Hendra, and Mr. Yosafat as laboratory assistance for the friendly guidance and help during the research.

13. Jimmy Jaya Nugroho, Wiliyanti Sutanto, Priscilla Olivia, Soraya Triesly, Stella Beatrix, Agnes Laurina, Daniel Sianto, Belin Delannoy, Vanessa Valerie, Sylvia Angelina Kurniawan, all members of class 2013 C and many friends who could not be mentioned one by one for the help, motivation, company, support, care and comfort and experiences shared during the thesis.

   It is realized that this report is far from excellence. Critics and suggestions are gladly accepted for better improvement in the future. Hopefully, this report would provide useful information for the readers.

   Tangerang, February 2017

CHAPTER I INTRODUCTION
1.1 Background ............................................................................................................. 1
1.2 Research Problem .................................................................................................. 3
1.3 Objectives .............................................................................................................. 4
   1.3.1 General Objectives .......................................................................................... 4
   1.3.2 Specific Objectives .......................................................................................... 4

CHAPTER II LITERATURE REVIEW
2.1 Functional Beverage ............................................................................................... 5
2.2 Diabetes Mellitus ................................................................................................... 5
2.3 Bitter Leaf (Vernonia amygdalina) ......................................................................... 7
2.4 Tea (Camelia Sinensis) .......................................................................................... 9
2.5 Stevia (Stevia Rebaudiana Bert.) ........................................................................... 13
2.6 Antioxidant and Anti-diabetic .............................................................................. 16
   2.6.1 Antioxidant ..................................................................................................... 16
   2.6.2 Anti-diabetic ................................................................................................... 18
2.7 Herb Extraction .................................................................................................... 19
CHAPTER III RESEARCH METHODOLOGY

3.1 Materials and Equipment ................................................................. 21
3.2 Research Procedures ................................................................. 22
  3.2.1 Preliminary Research ............................................................. 22
  3.2.3 Main research ................................................................. 23
3.3 Experimental Design ................................................................. 24
  3.3.1 Preliminary Research ............................................................. 24
  3.3.2 Main Research ................................................................. 26
3.4 Procedure of Analyses ............................................................... 28
  3.4.1 Moisture Content Analysis (AOAC, 2005) ............................... 28
  3.4.2 Percent Yield ................................................................. 28
  3.4.3 Proximate Analysis ............................................................. 29
    3.4.3.1 Protein Analysis by using Kjeldahl Method (AOAC, 2005) ..... 29
    3.4.3.2 Fat Content Analysis (SNI, 1992) ..................................... 29
    3.4.3.3 Ash Analysis using Dry Ashing Method (SNI, 1992) .......... 30
    3.4.3.4 Carbohydrate Analysis by Difference (AOAC, 2000) ........ 30
  3.4.4 Physicochemical Analysis ..................................................... 31
    3.4.4.1 Color Analysis (Ismail and Tevathi, 2006) ....................... 31
    3.4.4.2 pH (AOAC, 2005) .......................................................... 31
    3.4.4.3 Titratable Acidity (AOAC, 2000) (with modification) .......... 31
  3.4.5 Organoleptic analysis ........................................................... 33
    3.4.5.1 Hedonic Test Analysis (Deibler and Delwiche, 2004) ......... 33
    3.4.5.2 Scoring Test Analysis (Deibler and Delwiche, 2004) ........ 33
  3.4.6 Antioxidant Activity using DPPH Method (Ghasemi et al., 2009). 33
  3.4.7 Inhibition of \( \alpha \)-glucosidase Analysis (Sugiwati et al., 2009) .... 34
  3.4.8 Total Phenolic Content using Folin-Ciocalteau Method (Sahu and Saxena, 2013) ................................................................. 36

CHAPTER IV RESULTS AND DISCUSSION

4.1 Determination of Extraction Method and Type of Solvent of Bitter Leaf
  Extract .............................................................................................. 38
  4.1.1 Moisture Content of Fresh Bitter Leaf and Bitter Leaf Powder ... 38
LIST OF TABLES

Table 2.1 Nutrient content of 100 grams of fresh and sundried leaves of bitter leaf................................................................. 9
Table 2.2 Nutrient content of 100 grams of tea leaves and brewed tea. .......... 11
Table 2.3 Nutrient content of 100 grams dried Stevia leaves ......................... 16

LIST OF APPENDICES

Appendix A. Result of Identification Test of Bitter Leaves ......................... A-1
Appendix B. Moisture Content of Bitter Leaf ........................................ B-1
Appendix C. Yield of Bitter Leaf Extract ............................................ C-1
Appendix D. Antioxidant Activity of Bitter Leaf Extract ......................... D-1
Appendix E. Total Phenolic extract of Bitter Leaf Extract ...................... E-1
Appendix F. Inhibition of Alpha-Glucosidase Activity of Bitter Leaf Extracts F-1
Appendix G. Toxicity Test of Bitter Leaf Extract .................................. G-1
Appendix H. Formulation of The Functional Beverages ........................... H-1
Appendix I. Result and Analysis of pH of Functional Beverages .............. I-1
Appendix J. Result and Analysis of Titratable Acidity of Functional Beverage J-1
Appendix K. Result and Analysis of Color of Functional Beverages .......... K-1
Appendix L. Result and Analysis of Total Soluble Solids (TSS) of Functional Beverages ........................................................................................................ L-1
Appendix M. Example of Organoleptic Questionnaire ............................. M-1
Appendix N. Result and Analysis of Hedonic Test on Color of Functional Beverage ........................................................................................................ N-1
Appendix O. Result and Analysis of Scoring Test on Color of Functional Beverage ........................................................................................................ O-1
Appendix P. Result and Analysis of Hedonic Test on Aroma of Functional Beverage ............................................................ P-1
Appendix Q. Result and Analysis of Scoring Test on Aroma of Functional Beverage ........................................................................................................ Q-1
Appendix R. Result and Analysis of Hedonic Test on Sweetness of Functional Beverage ........................................................................................................ R-1
Appendix S. Result and Analysis of Scoring Test on Sweetness of Functional Beverage ........................................................................................................ S-1
Appendix T. Result and Analysis of Hedonic Test on Bitterness of Functional Beverage ........................................................................................................ T-1
Appendix U. Result and Analysis of Scoring Test on Bitterness of Functional Beverage ........................................................................................................ U-1
Appendix V. Result and Analysis of Hedonic Test on Aftetaste of Functional Beverage ........................................................................................................ V-1
Appendix W. Result and Analysis of Scoring Test on Aftertaste of Functional Beverage

Appendix X. Result and Analysis of Hedonic Test on Overall Acceptance of Functional Beverage

Appendix Y. Result of the Sensory Characteristic of the Functional Tea with Most Preferred Formula

Appendix Z. Result of Proximate Analysis of Functional Beverage with the Most Preferred Formula

Appendix AA. Moisture Content and Carbohydrate Content of Functional Beverage with Most Preferred Formula

Appendix AB. Antioxidant Activity of Functional Beverage with the Most Preferred Formula

Appendix AC. Total Phenolic Content of Functional Beverage with the Most Preferred Formula

Appendix AD. Alpha-Glucosidase Inhibition Activity of Functional Beverage with the Most Preferred Formula
