ACKNOWLEDGEMENTS

Thanks to the Lord for all His guidance and blessing that has been given unto writer in finishing the research and the thesis report entitled “STUDY ON THE UTILIZATION OF POHPOHAN (Pilea melastomoides) LEAVES AS SOURCE OF CALCIUM IN CORPORATION TO SEAWEED (Eucheuma cottonii) IN THE MAKING OF EDIBLE SEAWEED SHEET”. This thesis was written as one of the requirements in order to obtain the degree of Sarjana Teknologi Pertanian Strata Satu from Universitas Pelita Harapan. The research and the thesis would not be completed without help, assistance, support and guidance from many parties. In this opportunity, the writer would like to express the greatest gratitude to those who had contributions, including:

1. Dr. Ir. Raffi Paramawati, MSi as the thesis supervisor for the guidance, knowledge, advices, support, and time throughout the research and the completion of the thesis.

2. Natania, M.Eng, head of Food Processing Technology laboratory and as the thesis co-supervisor for the guidance, knowledge, advices, support, and time throughout the research and the completion of the thesis.

3. Julia Ratna Wijaya MAppSc as the Head of Food Technology Department of Universitas Pelita Harapan and Sisi Patricia L. A. Gultom, M.Eng, head of Microbiology labolatory and as the Vice Head of Food Technology Department of Universitas Pelita Harapan for the chance to the author to do the research and complete the thesis.
4. Wilbur Donald R. Pokatong, Ph.D. as examiner and Yuniwaty Halim, MSc, head of Quality Control laboratory and as examiner for the opportunity, guidance, and advices regarding thesis revision.

5. Dr. Ir. Melanie Cornelia, MT and Ratna Handayani, MP for the opportunity to conduct research in their laboratories.

6. Beloved family including father, mother, brothers, cousins, aunt, and uncle for their continuous supports, encouragements, advises, and prayers during the research and finishing the thesis.

7. Cindy Irawati, Jimmy Jaya Nugraha, Bella Kumalasari, Vania Valencia, and Cely Hoesada who help, support, share valuable and important experience, and give advices and information to the writer.

8. Mr. Adzie, Mr. Darius, Mrs. Meri, and Mr. Hendra as the laboratory assistants for the time, help, and support during the research in the laboratories.

9. All friends from Food Technology 2012 Universitas Pelita Harapan who supported and experienced the research and thesis writing together.

10. All lecturers and staffs of Food Technology Universitas Pelita Harapan.

11. All parties that cannot be mentioned one by one who have involved directly or non-directly through the research and the completion of the thesis.

The writer realizes that there are still shortcomings in this thesis therefore, the writer would welcome any criticism and suggestions given. Hopefully, this thesis would be useful for the readers. Thank you.

Karawaci, February 2016

Writer

## CHAPTER I INTRODUCTION

1.1 Background ....................................................... 1

1.2 Research Problem ............................................ 2

1.3 Objectives ...................................................... 2

1.3.1 General Objective ........................................ 2

1.3.2 Specific Objectives ....................................... 3

## CHAPTER II LITERATURE REVIEW

2.1 Pohpohan ....................................................... 4

2.2 Seaweed ......................................................... 6

   2.2.1 *Eucheuma cottonii* .................................... 7

   2.2.2 *Gracilaria* sp. ......................................... 8

2.3 Edible Seaweed Sheet (*Nori*) ................................ 9

2.4 Glycerol ........................................................ 11

2.5 Calcium ......................................................... 12

2.6 Phytic Acid .................................................... 14
CHAPTER III RESEARCH METHODOLOGY

3.1 Materials and Equipment ................................................................. 16
3.2 Research Procedure .......................................................................... 17
  3.2.1 Preliminary Research .................................................................. 17
  3.2.2 Main Research ........................................................................... 18
3.3 Experimental Design .......................................................................... 21
  3.3.1 Preliminary Research .................................................................. 21
  3.3.2 Main Research ........................................................................... 22
3.4 Analysis Procedure ........................................................................... 23
  3.4.1 Physical Analyses ........................................................................ 23
    3.4.1.1 Thickness Analysis ................................................................. 23
    3.4.1.2 Color Analysis ....................................................................... 23
    3.4.1.3 Texture Analysis ..................................................................... 24
  3.4.2 Chemical Analyses ....................................................................... 25
    3.4.2.1 Moisture Content Analysis ...................................................... 25
    3.4.2.2 Phytic Acid Content Analysis ................................................. 25
    3.4.2.3 Calcium Content Analysis ..................................................... 26
  3.4.3 Proximate Analyses ..................................................................... 26
    3.4.3.1 Ash Content Analysis .............................................................. 26
    3.4.3.2 Protein Content Analysis ......................................................... 27
    3.4.3.3 Fat Content Analysis ............................................................... 27
    3.4.3.4 Carbohydrate Content Analysis .............................................. 28
  3.4.4 Organoleptic Analyses ................................................................. 28
    3.4.4.1 Scoring Test ........................................................................... 28
    3.4.4.2 Hedonic Test .......................................................................... 28

CHAPTER IV RESULTS AND DISCUSSION

4.1 Determination on Proper Pretreatment of Pohpohan leaf powder .......... 30
  4.1.1 Effect of Pretreatment on Phytic Acid Content ............................... 31
  4.1.2 Effect of Pretreatment on Calcium Content .................................... 32
4.2 Effect of Concentrations of Glycerol and Ratios of Pohpohan Leaf Powder and Seaweed on Physical and Chemical Characteristic of Edible Seaweed Sheet ....................................................... 33
  4.2.1 Color ......................................................................................... 33
4.2.2 Thickness ................................................................. 35
4.2.3 Texture ..................................................................... 35
   4.2.3.2 Brittleness .......................................................... 37
   4.2.3.3 Crispiness ......................................................... 38
4.2.4 Moisture Content ..................................................... 39

4.3 Effect of Concentrations of Glycerol and Ratios of Pohpohan Leaf
   Powder and Seaweed on Sensory Attributes of Edible Seaweed Sheet .... 41
   4.3.1 Color .................................................................... 41
   4.3.2 Aroma ................................................................. 43
   4.3.3 Taste .................................................................... 45
   4.3.4 Texture ................................................................. 47
   4.3.5 Overall Acceptance ................................................ 49

4.4 Nutritional Composition of Edible Seaweed Sheet ......................... 51

CHAPTER V CONCLUSIONS AND SUGGESTIONS
5.1 Conclusions .................................................................. 54
5.2 Suggestions ................................................................. 55

BIBLIOGRAPHY ................................................................. 56
APPENDICES ...................................................................... 62
LIST OF TABLES

Table 2.1 Nutrient composition per 100 g of fresh pohpohan leaves .................. 5
