ACKNOWLEDGEMENTS

Praise and gratitude to God Almighty, due to His blessings I can finish my thesis entitled “STUDY ON THE USE OF KELOR (Moringa oleifera) LEAVES POWDER IN THE MAKING OF NUTRITIOUS JELLY CANDY” that is written as partial fulfillment of the academic requirements to obtain the degree of Sarjana Teknologi Pertanian Strata Satu Food Technology, Universitas Pelita Harapan.

Support, guidance, and prayer from several parties undeniably given until this thesis completed, therefore deserves mentions of gratitude. In this occasion, the author would like to give biggest appreciation to:

1. Dr. Ir. Raffi Paramawati as supervisor, for the time in patiently guiding and giving useful advices until this thesis is finally completed.
2. Natania, M.Eng as co-supervisor, for the time in teaching, guiding, and advising until this thesis is finally completed.
3. Julia Ratna Wijaya, MApSc as Head of Food Technology Department UPH, for the support until this thesis is completed.
4. Dr. Ir. Melanie Cornelia, MT, Yuniwaty Halim, MSc and Ratna Handayani, MP as head of laboratories (chemistry, quality control, and research laboratory respectively) where the author conducts the final project.
5. Mr. Aji, Ms. Meri, Mr. Hendra, Mr. Darius, and Mr. Yos for the enormous help at the laboratories.
6. All lecturers of Food Technology Department who teach the author during studying at Universitas Pelita Harapan.
7. Herman Hoesada and Maria Susana K. Joviaal as beloved parents, Helbert 
Hoesada as beloved brother, Gunawan Hoesada and Kusumaningtyas as 
beloved grandparents, and all of my family for raising me, giving endless 
support, take care and pray for me.

8. Jossianna Liauwan, Tabitha Sofia Irawan, Deliani Tanin, and Riorita 
Tandyputri as best friends in class for accompany me in the past few years.

partners on the same team, for the help and support for each other.

10. Amelia Permadi, Yohanes Aldi L., Febrian, and Gloria Lady as my life-long 
friends who complete my life with their jokes, memories, support, and care.

11. Almanda Gunawan, Kevin Holyson Limantara, Leonardo Chandra, and 
Silviana Saputra as adorable Head Mentor partners at Mentoring UPH who 
always support each other, listening, and take care a lot.

12. Harsha Prathama, Hans Christianto, Musa Hanny S., Grace Lydia B., Valerie 
G. T., Christian Suryajaya, and Feronika Sevalis as beloved Mentoring UPH 
partners who teach a lot of things and guide me until I become myself today.

K., Cicilia E., Davin P., Dena E. P. K., Denny J., Desy N., D. Natasya, 
Eleasha C., Erna Dame M., Evelyn M., Febriant Diaz, Giovanni A. S., Gusti 
N. A. D., Jeanne M., Jenivia T., Jessica A., Kenny T., Kevin O., Kim Minki, 
Krisha C. R., Meidyna B., M. Tiza L., Natasha V., Putri R. N., Philemon, 
Rahel N., Rebecca, Risminarni S., Robin A. K., Sandro N., Sharla, Sharlene, 
Sheila, Stefanus D. Y., Upi J., Yehezkiel E. P., Yoga G. B., Yudha S., Chief 
Mentors 2014/2015, Yoshia Reynaldi, Andre Steawan, and all of mentors as
my beloved family at Mentoring UPH who I treasure the most, for their support, care, help, and be my mood boosters whenever stress come.

14. Pricilia H., Novia T., Christopher R., Josephine L. C., Haniel N., Livia, Irene G., Bryan A. B., Yoselin, Elizabeth N. as beloved mentees, as well as Stefany V., Kezia O., Erika H., Alice Y., Eirene F. W., Cynthia C. as beloved mentors from psychology who are parts of my life that I cherish.

15. Eva Okilia, Charles Wijaya, Stephanie Theodora, Rika Tandoko, Lestari Andriani, Cynthia, and Gabriella Tiara for the support and happy times.

16. All friends in Food Technology 2012 class C and A, especially who conducts the final project on the same time.

17. Mrs. Rita as head of PAUD “Remnant” where the author conducts sensory evaluation, and all panelists who spent their times to help the author.

18. Friends and colleagues who contribute and can not be mentioned one by one.

The author feels so much gratitude and blessings for knowledge and valuable experiences gained during final project. The author also realizes that this thesis is far from excellent, thus any critics or suggestions are gladly welcomed for better improvement. Last but not least, may this report be useful and beneficial for all of the readers.

Karawaci, February 2016

TABLE OF CONTENTS ................................................................................ ix
LIST OF TABLES ......................................................................................... xiii
LIST OF FIGURES ......................................................................................... xv
LIST OF APPENDICES ................................................................................ xvii

CHAPTER I INTRODUCTION

1.1 Background ............................................................................................. 1
1.2 Research Problem .................................................................................. 3
1.3 Objectives .............................................................................................. 3
  1.2.1 General Objectives ........................................................................ 3
  1.2.2 Specific Objectives .......................................................................... 3

CHAPTER II LITERATURE REVIEW

2.1 Jelly Candy ............................................................................................. 4
  2.1.1 Ingredients of Jelly Candy ................................................................. 4
  2.1.1.1 Gelatin ......................................................................................... 4
  2.1.1.2 Sugar .......................................................................................... 6
  2.1.1.3 Water .......................................................................................... 7
  2.1.1.4 Citric Acid .................................................................................... 7
  2.1.1.5 Flavoring ...................................................................................... 7
  2.1.1.6 Coloring ....................................................................................... 8
  2.1.2 Jelly Candy Formulation ................................................................... 8
2.1.3 Process in the Making of Jelly Candy ........................................ 9
2.2 Glucomannan ................................................................. 10
  2.2.1 Chemical Structures of Glucomannan .............................. 11
  2.2.2 Fiber Content .......................................................... 12
2.3 Moringa oleifera ............................................................. 12
  2.3.1 Nutritional Composition of Moringa oleifera ................... 14
    2.3.1.1 Essential Amino Acids ....................................... 15
    2.3.1.2 Calcium ....................................................... 17
    2.3.1.3 Vitamin B .................................................... 18
  2.3.2 Moringa Oleifera Leaves Powder ................................ 18
2.4 Malnutrition ................................................................. 19
2.5 Flavoring ................................................................. 20

CHAPTER III RESEARCH METHODOLOGY

  3.1 Materials and Equipments ................................................. 21
  3.2 Research Procedures ..................................................... 22
    3.2.1 Preliminary Research ........................................... 22
    3.2.2 Main Research .................................................. 23
  3.3 Experimental Design .................................................... 26
    3.3.1 Preliminary Research ........................................... 26
    3.3.2 Main Research .................................................. 26
  3.4 Analysis Procedures .................................................... 28
    3.4.1 Physical Analysis ................................................. 28
      3.4.1.1 Texture Analysis ......................................... 29
      3.4.1.2 Color ...................................................... 29
    3.4.2 Chemical Analysis ............................................... 29
      3.4.2.1 Water Activity ........................................... 29
      3.4.2.2 Proximate Analysis ..................................... 29
      3.4.2.3 Calcium Content ........................................ 32
      3.4.2.4 Amino Acids Content ................................... 32
      3.4.2.5 Vitamin B Content ...................................... 33
    3.4.3 Sensory Analysis ................................................. 34
CHAPTER IV RESULT AND DISCUSSION

4.1 Determination of Glucomannan Concentration in Jelly Candy ........ 35
   4.1.1 Physical Characteristic of Jelly Candy with Different Glucomannan
   Concentration ................................................................. 35
      4.1.1.1 Texture ................................................................. 35
   4.1.2 Chemical Characteristic of Jelly Candy with Different
   Glucomannan Concentration .................................................. 38
      4.1.2.1 Water Activity .......................................................... 38
      4.1.2.2 Moisture Content ....................................................... 38
   4.1.3 Determination of Selected Glucomannan Concentration of Jelly
   Candy Based on Sensory Evaluation ......................................... 39
      4.1.3.1 Hedonic Test ............................................................. 40
      4.1.3.2 Scoring Test .............................................................. 41

4.2 Effect of Different Moringa Leaves Powder Concentration and Flavors on
the Physico-Chemical Characteristics of Jelly Candy ......................... 46
   4.2.1 Effect of Different Moringa Leaves Powder Concentration and
   Flavors on Texture ............................................................... 46
   4.2.2 Effect of Different Moringa Leaves Powder Concentration and
   Flavors on Color ................................................................. 49
   4.2.3 Effect of Different Moringa Leaves Powder Concentration and
   Flavors on Water Activity ..................................................... 50
   4.2.4 Effect of Different Moringa Leaves Powder Concentration and
   Flavors on Moisture Content .................................................. 51

4.3 Determination of the Best Formula of Jelly Candy Based on Sensory
Evaluation .................................................................................. 52
   4.3.1 Acceptability of Children .................................................... 53
   4.3.2 Effect of Different Moringa Leaves Powder Concentration and
   Flavors to the Sensory Parameters ............................................. 54
      4.3.2.1 Texture ................................................................. 54
4.3.2.2 Color ................................................................. 61
4.3.2.3 Taste ................................................................... 64
4.3.2.4 Aroma ................................................................. 68
4.3.2.5 Overall Acceptance ................................................. 71

4.4 Nutritional Composition of Jelly Candy with Selected Formulation
........................................................................................................... 73

CHAPTER V CONCLUSIONS AND SUGGESTIONS

5.1 Conclusions ................................................................. 76
5.2 Suggestions ............................................................... 76

BIBLIOGRAPHY ........................................................................... 78

APPENDICES .............................................................................. 83
