ACKNOWLEDGEMENTS

Praise the Lord Jesus Christ for His endless blessings and relentless love to the author during the completion of this thesis report which entitled “EFFECT OF TEMPERATURE AND DRYING METHOD ON THE SENSORY AND FUNCTIONAL CHARACTERISTICS OF TEMPEH FLOUR”. This thesis report was written as requirement for obtaining the degree of Sarjana Teknologi Pertanian Strata Satu in Food Technology at Universitas Pelita Harapan.

The author realized that this report could not be finished without the help from many parties. Therefore, with this opportunity, the author would like to express gratitude towards all parties who helps the author during the research, report making and completion, including:

1. Julia Ratna Wijaya, MAppSc, as thesis supervisor and Head of Food Technology Department who had given time, knowledge, and wisdom.

2. The late Prof. Dr. L. Broto S. Kardono, Apt., as the co-supervisor who had given the time and insight through his knowledge and had peacefully returned to the Father before being able to sign this report.

3. All examiners who had given time, knowledge, and wisdom.

4. Natania, M.Eng, Ratna Handayani, MP, Jeremia Manuel Halim, MP, Dr. Ir. Melanie Cornelia, MT, and Dr. Ir. Adolf JN. Parhusip, MSi., as the Head of Food Processing, Research, Quality Control, Chemistry, and Microbiology Laboratory, respectively who had given the chance to conduct the research in the laboratories.
5. Mr. Adzie, Mrs. Meri, Mr. Hendra, Mr. Darius, Ms. Rachel, and Mr. Yosafat as the laboratories assistants who had helped in the laboratories.

6. Beloved Parents (Januar Gomuljo and Dina Debora), Brother (Kevin Christopher Gomuljo) who had given endless love, support, encouragement, and prayers.

7. Friends under the same supervision, Evelyn Feliciana and Livia Cornelia, who had given support, help, and togetherness.

8. Rumah Tempe Indonesia (RTI), who had given assist in providing the tempeh and support.

9. Dear Mr. David and Mrs. Bee Paul, and also the Paul’s family, who had given warm supports, encouragement, prayers, and constant reminder of truth.

10. Dear Mr. Albert Mitchell Moore and family, Mrs. Maryan Roldan Garcia, Ruth Uliasti and Spiritual Formation for Students family, who had given warm supports, encouragement, and prayers.

11. Dear Brothers, Emmanuel Arvin, who had always given bold encouragement, prayers, and constant reminder of the truth; and Joshua Samuel Wiranaga Liong, who had helped and given supports and encouragement.

12. Dear Sisters, Tania Jocelyn, who had given prayers, supports, and constant reminder of truth; and Adelina Putri Damar, Febriana, and Fitriana Valencia Ng, who had given supports and encouragement.

13. Brothers, Sisters, and Pastors from Harvest Mission Community Church, especially those from batch 2011 Overdrive, Intro and Men Obeying God Life Group for supports, prayers, encouragement, and for the togetherness.
14. All lecturers and staffs of Food Technology Department of Universitas Pelita Harapan for the knowledge, supports, and help.

15. Adeline Pannadhika, Adeline Setiawan, Anthonius Hideyo, Audrey, Elisabet Cahyani, Evelyna Glen, Grace Liesar, Rae Ninta Elisa, Rehuella Angela, and all other members of C class of Food Technology 2011 of Universitas Pelita Harapan for the togetherness, supports, and help.

16. All friends, seniors, and juniors of Food Technology of Universitas Pelita Harapan for the supports and help.

17. All relatives and friends who cannot be mentioned one by one but have also supported the author during the research and thesis report completion.

   The author realizes that this report is still far from perfection. Therefore, the author wants to apologize for any mistake and unclear statement found in this thesis report that the author might not be aware of. The author would welcome any critics and suggestions for this report. Furthermore, the author sincerely hopes that this thesis report can give useful information for the readers.

Tangerang, August 2015

## LIST OF APPENDICES ............................................... xiv

## CHAPTER I INTRODUCTION

1.1 Background .......................................................... 1

1.2 Research Problem .................................................. 3

1.3 Objectives ............................................................. 4

1.3.1 General Objectives ............................................. 4

1.3.2 Specific Objectives ............................................. 4

## CHAPTER II LITERATURE REVIEW

2.1 Soybean (*Glycine max* L. Merill) .................................. 5

2.2 Tempeh ............................................................... 6

2.2.1 Antioxidant in Tempeh ........................................ 9

2.3 Methods of Drying Foodstuffs ..................................... 10

2.3.1 Oven Drying .................................................... 11

2.3.2 Cabinet Drying .................................................. 12

2.3.3 Drum Drying .................................................... 13

2.3.4 Fluidized Bed Drying .......................................... 14

2.4 Tempeh Flour ........................................................ 15
CHAPTER III RESEARCH METHODOLOGY

3.1 Materials and Equipments .................................................................................. 17

3.2 Research Stages .................................................................................................. 18

3.2.1 Preliminary Research Procedure ................................................................. 18

3.2.2 Main Research Procedure ............................................................................ 20

3.3 Experimental Design .......................................................................................... 21

3.3.1 Preliminary Research ................................................................................... 21

3.3.2 Main Research ............................................................................................... 22

3.4 Methods of Analysis .......................................................................................... 23

3.4.1 Moisture Content (AOAC, 2005) ................................................................. 23

3.4.2 Ash Content (AOAC, 2005) ......................................................................... 24

3.4.3 Protein Content (AOAC, 2005) ................................................................... 24

3.4.4 Fat Content (AOAC, 2005) .......................................................................... 25

3.4.5 Carbohydrate Content (AOAC, 2005) ......................................................... 25

3.4.6 Extract Preparation (Chung, et al., 2010, with modification) ................. 25

3.4.7 Total Phenolic (Haron and Raob, 2014) ...................................................... 26

3.4.8 Total Flavonoid (Dajenta, et al., 2013) ....................................................... 26

3.4.9 Antioxidant Activity (Dajenta, et al., 2013, with modification) ....... 27

3.4.10 Color Profile (Hutchings, 1990; Jha, 2010) ............................................. 27

3.4.11 Sensory Evaluation ..................................................................................... 28

CHAPTER IV RESULTS AND DISCUSSION

4.1 Sensory Characteristics ...................................................................................... 29

4.1.1 Color .............................................................................................................. 29

4.1.1.1 Scoring Value ......................................................................................... 29

4.1.1.2 Hedonic Value ....................................................................................... 31

4.1.2 Aroma ............................................................................................................. 31

4.1.2.1 Scoring Value ......................................................................................... 31

4.1.2.2 Hedonic Value ....................................................................................... 33

4.1.3 Tempeh Flavor ............................................................................................... 34

4.1.3.1 Scoring Value ......................................................................................... 34

4.1.3.2 Hedonic Value ....................................................................................... 35
4.1.4 Bitter/tart Flavor ................................................................................... 36
  4.1.4.1 Scoring Value .................................................................................. 36
  4.1.4.2 Hedonic Value ................................................................................ 37
  4.1.5 Overall ............................................................................................... 38

4.2 Determination of Best Pre-treatment in Making Tempeh Flour .......... 39

4.3 Proximate Analysis and Color Profile..................................................... 39

4.4 Effect of Different Method and Temperature towards Total Phenolic
  and Total Flavonoid of Tempeh Flour ....................................................... 41

4.5 Effect of Different Method and Temperature towards Antioxidant
  Activity of Tempeh Flour ......................................................................... 45

4.6 Determination of Best Method in Making Tempeh Flour ................. 47

CHAPTER V CONCLUSIONS AND SUGGESTIONS

5.1 Conclusions ........................................................................................... 49

5.2 Suggestions ........................................................................................... 50

BIBLIOGRAPHY .......................................................................................... 51

APPENDICES ............................................................................................... 55
LIST OF TABLES

Table 2.1 Nutrient composition of soybean seed per 100g ........................................ 6
Table 2.2 Quality requirement of soybean tempeh .................................................. 8
Table 2.3 Nutrition comparison of soybean and tempeh ................................. 9

LIST OF APPENDICES

Appendix A. Sensory Evaluation Questionnaire on Preliminary Research ....... A-1
Appendix B. Scoring Data of Sensory Evaluation on Preliminary Research ......B-1
Appendix C. Statistical Analysis of Scoring Test on Preliminary Research ......C-1
Appendix D. Hedonic Data of Sensory Evaluation on Preliminary Research .... D-1
Appendix E. Statistical Analysis of Hedonic Test on Preliminary Research ......E-1
Appendix F. Result of Moisture Content Analysis on Main Research ..............F-1
Appendix G. Result of Ash Content Analysis on Main Research .................... G-1
Appendix H. Result of Protein Content Analysis on Main Research ............... H-1
Appendix I. Result of Fat Content Analysis on Main Research ...................... I-1
Appendix J. Result of Carbohydrate Content Calculation by Difference Method on Main Research .......................................................... J-1
Appendix K. Nutritional Profile of Tempeh Flour on Main Research ............. K-1
Appendix L. Color Profile of Tempeh Flour on Main Research ..................... L-1
Appendix M. Dry-Weight Data of Methanol-Sample Extract on Main Research .......................................................... M-1
Appendix N. Result of Total Phenolic Analysis on Main Research ................ N-1
Appendix O. Result of Total Flavonoid Analysis on Main Research .............. O-1
Appendix P. Result of Antioxidant Activity Analysis on Main Research ....... P-1
