ACKNOWLEDGEMENTS

The first gratitude is for Jesus Chirst for His Blessings so author can finish this thesis report with title “AN OBSERVATIONAL STUDY OF RECOGNITION THRESHOLD AND PREFERENCE OF SALTY TASTE AND DAILY SODIUM INTAKE OF A NUMBER OF OFFICE WORKERS IN JAKARTA”. This thesis was written as the partial fulfillment of the academic requirements to obtain the degree of Sarjana Teknologi Pertanian Strata Satu, Food Technology Department, Faculty of Science and Technology, Universitas Pelita Harapan, Tangerang. Author was sponsored by PT. Nutrifood Indonesia in conducting this study.

During the work of this thesis, author received a lot of help, advice, and support from many parties. Author would like to give the highest gratitude for:

1. Mrs. Sisi Patricia L.A. Gultom, M.Eng as the supervisor for the opportunity, knowledge, advice and support given to author during the work of this thesis.
2. Mrs. Lina Antono, MSc as the co.supervisor for the opportunity, guidance, and advices given to the author.
3. Ms. Julia Ratna Wijaya, MAppSc as Head of Department of Food Technology for the opportunity for author to conduct this research.
4. Mrs. Astri Kurniati and Ms. Vanessa Yolanda, for guidance, advices, supervision, patience given to author during the work of this thesis.
5. Mr. Donald and Ms. Lisa for guidance and advices in revising this thesis.
6. Mr. Budi Laij and Mrs. Asien, as the Founder of PT. Megah Abadi Intijaya (MAI) for allowing author to conduct study in PT. MAI.

7. Dearest parents, Mr. Tjan Tjin Siang and Mrs. Mita Djenar for support and prayers for author.

8. Dearest siblings, Ms. Egie Amalia, Ms. Helen, Ms. Natasha, Mr. Delwyn, Joe and Dearest grandma, Mrs. Karlina for support and consolation for author.

9. Ms. Adeline Setiawan, fellow friend during thesis, for support, advice, and consolation for author.

10. Ms. Intan Dinda, internship partner during thesis, for support and advices.

11. Mr. Ardy, Mr. Wika and Mr. Richie for advice and guidance for author.

12. Fellow friends, Evelyn, Livia, Ninta, Jessica, Sharon, Stella, Vika, Angela, Elisabeth, Nita, and Casie for being care with author.

13. All of the panelists who participated in this study, employee of PT. MAI, PT, Kreston, PT. CBC, PT. Nutrifood, PT. TAL, PT. TDP, and Bank BII.

14. All friends, family, and colleagues who are not enlisted one by one, but have contributed to the completion of this thesis report.

Author realizes that this thesis report is not perfect and still need improvement. Any advice and suggestion regarding this thesis will be welcomed. Lastly, author hopes that this thesis report will be beneficial for readers.

STATEMENT OF THESIS AUTHENTICITY

APPROVAL BY THESIS SUPERVISORS

APPROVAL BY THESIS EXAMINATION COMMITTEE

ABSTRACT .................................................................................................................... v

ACKNOWLEDGEMENTS .............................................................................................. vi

TABLE OF CONTENTS ................................................................................................. viii

LIST OF FIGURES .......................................................................................................... xi

LIST OF APPENDICES ................................................................................................. xiii

CHAPTER I INTRODUCTION

1.1 Research Background .......................................................................................... 1

1.2 Research Problem ............................................................................................... 3

1.3 Research Objectives ............................................................................................ 3

1.3.1 General Objectives ......................................................................................... 3

1.3.2 Specific Objectives ......................................................................................... 4

CHAPTER II LITERATURE REVIEW

2.1 Observational Study ............................................................................................ 5

2.2 Taste ................................................................................................................... 6

2.2.1 Structure of Taste System ............................................................................ 7

2.3 Threshold ............................................................................................................ 8

2.4 Sodium ............................................................................................................... 9

2.5 24-h Food Recall ................................................................................................ 10
2.6 Sensory Evaluation ........................................................................................................ 12
  2.6.1 Preference Test ........................................................................................................ 13
  2.6.2 Threshold Test ........................................................................................................ 13
2.7 Other Factors Affecting Salty Taste Threshold ......................................................... 14
2.8 Other Factors Affecting Human Preference toward Salty Taste ............................ 15
2.9 Other Factors Affecting Sodium Intake .................................................................... 19
2.10 Kruskal-Wallis Test ..................................................................................................... 20
2.11 Box Plot ......................................................................................................................... 22

CHAPTER III RESEARCH METHODOLOGY
3.1 Materials and Equipment .............................................................................................. 24
3.2 Research Method ............................................................................................................ 25
  3.2.1 Personal Information and Body Mass Index .................................................... 25
  3.2.2 Sensory Evaluation ................................................................................................. 26
    3.2.2.1 Threshold Test ......................................................................................... 26
    3.2.2.2 Preference Test ........................................................................................ 28
  3.2.3 24-hour Food Recall and Sources of Sodium Intake ...................................... 29
  3.2.4 Data Arrangement and Statistical Test to Study About Preference of Salty Taste in Each Salty Taste Recognition Threshold Group ................. 30
  3.2.5 Data Arrangement and Statistical Test to Study About Daily Sodium Intake in Each Salty Taste Recognition Threshold Group ....................... 32
  3.2.6 Data Arrangement and Statistical Test to Study About Daily Sodium Intake in Each Preferred Salt Concentration Group ............................. 33
CHAPTER IV RESULTS AND DISCUSSION

4.1 Sodium Intake and Sources of Sodium of Full Time Office Workers in Jakarta ................................................................. 36
4.1.1 Sodium Intake and Sources of Sodium ......................................................... 36
4.1.2 Proportion of Sources of Sodium in Larger Meal Component ................. 40

4.2 Preference of Salty Taste in Each Salty Taste Recognition Threshold Group .................................................................................. 41
4.3 Daily Sodium Intake in Each Salty Taste Recognition Threshold Group ...... 46
4.4 Daily Sodium Intake in Each Preferred Salt Concentration Group .......... 50

CHAPTER V CONCLUSIONS AND SUGGESTIONS

5.1 Conclusions ......................................................................................... 55
5.2 Suggestions ....................................................................................... 55

REFERENCES ......................................................................................... 57
APPENDICES ......................................................................................... 62
LIST OF FIGURES

Figure 2.1 Taste bud ........................................................................................................ 8
Figure 2.2 Box plot which indicates significant difference sample distribution ........ 21
Figure 2.3 Anatomy of box plot ............................................................................... 23
Figure 3.1 Food dummy (left) and eating utensils (right) ........................................ 24
Figure 3.2 Flow chart of threshold test .................................................................... 27
Figure 4.1 Panelist’s demographic .......................................................................... 35
Figure 4.2 Percentage of sources of sodium from food which subject consumed .... 37
Figure 4.3 Sources of sodium intake ..................................................................... 38
Figure 4.4 Percentage of sources of sodium in larger meal component ............... 40
Figure 4.5 Distribution and median of preferred concentration of salt in meat broth in different recognition threshold group ........................................ 41
Figure 4.6 Percentage of subject with hypertensive family member in each recognition threshold group ....................................................... 44
Figure 4.7 Number of male and female subjects in each recognition threshold group ............................................................... 45
Figure 4.8 Distribution and median of daily sodium intake in different recognition threshold group ............................................................... 46
Figure 4.9 Distribution and median of daily sodium intake in different preferred concentration group ........................................................................... 51
Figure 4.10 Percentage of subject with hypertensive family member in each preferred salt concentration group ....................................................... 53

LIST OF TABLES

Table 2.1 Type of thresholds .....................................................................................9
Table 2.2 Sodium content in 100 gram of many food types .................................10
Table 3.1 Example of data arrangement to study about preference of salty taste in each salty taste recognition threshold group ........................................31
Table 3.2 Example of data arrangement to study about daily sodium intake in each salty taste recognition threshold ..........................................................32
Table 3.3 Example of data arrangement to study about daily sodium intake in each preferred salt concentration group .........................................................34
Table 4.1 Summary of the result of the study (Mean ± SD) ........................................35
Table 4.2 Description of sources of sodium intake ..................................................38
LIST OF APPENDICES

Appendix A. Example of Calculation in Kruskal-Wallis Test ........................................A-1
Appendix B. Informed Consent and Personal Questionnaire ...........................................B-1
Appendix C. Threshold Test Questionnaire ...................................................................C-1
Appendix D. Preference Test Questionnaire ...................................................................D-1
Appendix E. Result of Inbody 230 ................................................................................E-1
Appendix F. Food Recall Form ......................................................................................F-1
Appendix G. Calculation of Average Daily Sodium Intake and Percentage of Panelist with Excess Sodium Intake ..........................................................G-1
Appendix H. Result of Threshold Test ............................................................................H-1
Appendix I. Result of Preference Test ............................................................................I-1
Appendix J. Statistical Test Results to Study about Preferences of Salty Taste in Each Salty Taste Recognition Threshold Group .................................................J-1
Appendix K. Statistical Test Results to Study about Daily Sodium Intake in Each Salty Taste Recognition Threshold Group .........................................................K-1
Appendix L. Statistical Test Results to Study about Daily Sodium Intake in Each Preferred Salt Concentration Group ..............................................................L-1
Appendix M. Data of Panelist’s Demographic .................................................................M-1
Appendix N. Statistical Test Results to Analyze Subject’s Body Mass Index (BMI) in Each Salty Taste Recognition Threshold Group .................................................N-1
Appendix O. Statistical Test Results to Analyze Subject’s Age in Each Salty Taste Recognition Threshold Group ..............................................................O-1
Appendix P. Statistical Test Results to Analyze Subject’s Body Mass Index (BMI) in Each Preferred Salt Concentration Group .........................................................P-1
Appendix Q. Statistical Test Results to Analyze Subject’s Age in Each Preferred Salt Concentration Group ..............................................................Q-1
Appendix R. Calculation of Proportion of Sources of Sodium in Larger Meal Component ..................................................................................................................R-1
Appendix S. Example of Output Result of Food Processor ESHA ....................................S-1
