

## ACKNOWLEDGEMENTS

The author would first and foremost praise and thank Lord Jesus Christ for His graces and blessings which enabled the author to complete this thesis entitled “APPLICATION OF COCOA POWDER SUBSTITUTE MADE FROM FERMENTED AND UNFERMENTED DURIAN (*Durio zibethinus* L.) SEED TO BAKED BROWNIE.” This thesis was written based on the research conducted from August 2020 to November 2020. It was written as the partial fulfilment of the academic requirement to obtain the degree of *Sarjana Teknologi Pertanian*, Food Technology Study Program, Faculty of Science and Technology, Universitas Pelita Harapan, Tangerang.

The author realizes that the completion of this thesis could not have been accomplished without the encouragements, helps, supports, and prayers from many parties. Therefore, the author would like to express a sincere gratitude to:

1. Mr. Eric Jobiliong, Ph.D. as Dean of Faculty of Science and Technology.
2. Dr. Nuri Arum Anugrahati as Vice Dean of Faculty of Science and Technology.
3. Mr. Laurence, S.T., M.T. as Director of Administration and Student Affairs of Faculty of Science and Technology.
4. Ir. W. Donald R. Pokatong, M.Sc., Ph.D., as Head of Food Technology Study Program and academic advisor for the approval and support to conduct the thesis project.
5. Ms. Ratna Handayani, M.P. as Vice Head of Food Technology Study Program for the guidance throughout the thesis project period.
6. Mrs. Natania, M.Eng. as thesis supervisor and Head of Food Processing and Technology Laboratory who has given her utmost attention, efforts, and time in supervising and supporting the whole process of research proposal preparation until thesis project completion.
7. Ms. Yuniwati Halim, M.Sc. as the Head of Quality Control and Research Laboratory, Dr. Tagor M. Siregar, S.Si., M.Si. as the Head of Chemistry

Laboratory, and Dr. Adolf J. N. Parhusip as the Head of Microbiology Laboratory for allowing the author to work in the laboratory.

8. Ms. Aileen Neysha Widyapranata, S.T.P., Mr. Aji, Mr. Regy Tahapary, Mr. Adih, Mr. Darius Wulakada, and Mr. Deni for the help, information, and directions given during work in the laboratory.
9. All other lecturers and staffs of Food Technology Study Program which cannot be mentioned one at a time for the teachings and assistances during the author's study and for the support and help during the author's thesis research.
10. Beloved parents, Budi Gunarto and Fenni Junita, and dearest sister, Monica Cornelia for the love, support, and prayers given to the author during the thesis completion.
11. Michael Austin for all the encouragements, emotional supports, helps, and prayers from the preparation of the thesis proposal up until the completion of the thesis.
12. Calmness Felia Halim, Felicia Augusta Wangsa, Joanne Tirto, Madeline Gracia, Michael Djurijanto, Shania Edeline, and Steven Ibrahim as author's dearest friends who gave endless support and prayers for the author during the thesis period.
13. Evelyn Wijaya, Iola Kalonica, Irene Natasha, Levina, and Vallencya as partners under the same supervision for the help and support during the thesis period.
14. All friends from the Food Technology Study Program 2017 especially class C, other friends and relatives for their help and support given during years of study in Universitas Pelita Harapan.

The author realizes that this report is still far from perfect. Therefore, the author would like to apologize for any mistake in the report and would appreciate any criticisms and suggestions given to this report. The author also does hope that the report will be beneficial and useful for the readers. Thank you.
