ACKNOWLEDGEMENTS

God is good. Thanks to Him, the author had the opportunity to carry out the thesis this semester. Lots of things had happened through the completion of this thesis. Good and bad, bad and good – but in the end all is well. Just like the old saying goes, “When life throws you lemon, make lemonade”; just keep calm and carry on, and make sure to make the most of it. The author does not think this thesis could be finished without the help, support, and encouragement from these people. Author’s gratitude goes beyond the words “Thank you”.

1. Prof. Dr. L. Broto Sugeng Kardono, Apt. as the supervisor who has patiently supervised and guided the author during the making of this thesis, and the never ending “good luck” through the completion of this thesis.

2. Mrs. Julia Wijaya, MSc. as the co-supervisor and for the guidance, support, and understanding through the making of this thesis.

3. Mrs. Nuri Arum Anugrahati, MP. as the Head of Food Technology Department, for giving the chance to carry on with the research.

4. Mrs. Sisi Patricia as the head of food processing laboratory and Mrs. Ratna Handayani as the head of research laboratory for all the help and guidance during the research.

5. Beloved parents, thank you for your endless support and patience.

6. Brother and sister for their understanding and support.

7. Maria Clarisa Witoko for being a great company from the beginning of until now and Monika Laurensia for giving the tough love when it is necessary and countless reminder.
8. Selfani Natalya, Cynthia Laureanna Chandra, and Elisa Kuswari for the cheer and encouragement.

10. All friends and acquaintances who are not mentioned here but have supported the author since the beginning of the final project until the completion of thesis; thank you.

The author realizes that this thesis is not perfect. Therefore, the author would like to apologize if there were any mistake in this thesis. For all the concern, suggestion, appreciation, and criticism toward this thesis, the author would like to sincerely thank you, it really means so much to the author. Last but not least, the author hopes this thesis would be useful to readers. Thank you.

Jakarta, June 2012

## CHAPTER I INTRODUCTION

1.1 Background | 1 |
1.2 Research Problem | 2 |
1.3 Objectives | 2 |
   1.3.1 General Objective | 2 |
   1.3.2 Specific Objective | 2 |

## CHAPTER II LITERATURE REVIEW

2.1 Soybean | 3 |
2.2 Bean Curd | 4 |
2.3 Okara | 5 |
2.4 Doughnut | 5 |
   2.4.1 Wheat Flour | 6 |
   2.4.2 Potato | 6 |
   2.4.3 Yeast | 7 |
   2.4.4 Salt | 7 |
   2.4.5 Sugar | 8 |
CHAPTER III RESEARCH METHODS

3.1 Materials and Equipments .................................................. 10
3.2 Research Steps ................................................................. 10
   3.2.1 Preliminary Step ......................................................... 11
   3.2.2 Main Research Steps .................................................. 11
3.3 Experimental Design ....................................................... 12
3.4 Analysis Procedure ......................................................... 14
   3.4.1 Protein Content ........................................................ 15
   3.4.2 Fat Content ............................................................. 15
   3.4.3 Ash Content ............................................................ 16
   3.4.4 Water Content ........................................................ 16
   3.4.5 Dietary Fiber ........................................................... 17
   3.4.6 Hedonic Test ............................................................ 18

CHAPTER IV RESULTS AND DISCUSSION

4.1 Analysis for Okara Powder ................................................. 20
   4.1.1 Nutritional Composition ............................................. 20
   4.1.2 Lightness ............................................................... 21
4.2 Determination of the Best Potato Doughnut with Addition of Okara 22
   4.2.1 Crust Color ............................................................. 22
   4.2.2 Crumb Color ........................................................... 24
   4.2.3 Aroma ................................................................. 25
   4.2.4 Taste ................................................................. 27
   4.2.5 Texture ............................................................... 28
   4.2.6 Overall Acceptance .................................................. 30
4.3 Physico-Chemical Characteristics ...................................... 31
   4.3.1 Texture (Hardness) .................................................... 31
   4.3.2 Moisture Content ..................................................... 33
4.4 Nutritional Composition .................................................... 33
LIST OF TABLES

Table 3.1 Ingredients for Potato Doughnut ..................................................11
Table 3.2 Percentage of Okara Powder ......................................................11
Table 3.3 Combinations of Treatments in Potato Doughnut with Addition of Okara .................................................................12
Table 4.1 Yield of Okara Powder per Particle Size ......................................20
Table 4.2 Nutritional Compositions of Fine Okara Powder ..........................20
Table 4.3 Proximate Compositions of Potato Doughnut with 0% Okara Addition, and Potato Doughnut with 5% Fine Okara Addition ........34
LIST OF FIGURES

Figure 2.1 Okara Production ................................................................. 5
Figure 3.1 Making of Okara Powder ..................................................... 11
Figure 3.2 Making of Potato Doughnut with Addition of Okara .......... 12
Figure 4.1 Lightness of Okara Powder with Different Particle Sizes .... 21
Figure 4.2 Panelists Preference on the Crust Color of Potato Doughnut with Addition of Okara powder with Different Percentages .... 23
Figure 4.3 Panelists Preference on the Crust Color of Potato Doughnut with Addition of Okara powder with Different Particle Sizes .... 23
Figure 4.4 Panelists Preference on the Crumb Color of Potato Doughnut with Addition of Okara Powder with Different Percentages .... 24
Figure 4.5 Panelists Preference on the Crumb Color of Potato Doughnut with Addition of Okara Powder with Different Particle Sizes .... 25
Figure 4.6 Panelists Preference on the Aroma of Potato Doughnut with Addition of Okara Powder with Different Percentages .... 25
Figure 4.7 Panelists Preference on the Aroma of Potato Doughnut with Addition of Okara Powder with Different Particle Sizes .... 26
Figure 4.8 Panelists Preference on the Taste of Potato Doughnut with Addition of Okara Powder with Different Percentages .... 27
Figure 4.9 Panelists Preference on the Taste of Potato Doughnut with Addition of Okara Powder with Different Particle Sizes .... 28
Figure 4.10 Effect of Interaction of Okara Powder Percentage and Particle Size towards Texture ................................................................. 29
Figure 4.11 Panelists Preference on the Overall Acceptance of Potato Doughnut with Addition of Okara Powder with Different Percentages ............................................................... 30
Figure 4.12 Panelists Preference on the Overall Acceptance of Potato Doughnut with Addition of Okara Powder with Different Particle Sizes ............................................................... 31
Figure 4.13 Effect of Interaction of Okara Powder Percentage and Particle Size towards Hardness……………………………………………………32

Figure 4.14 T-Test Result for Moisture Content of Potato Doughnut with Best Percentage of Okara Addition, and the Potato Doughnut with 0% Okara Addition as Control…………………………………………..33
LIST OF APPENDICES

Appendix 1. Questionnaire for Hedonic Test……………………………………40
Appendix 2. Result of Proximate Analysis of Fine Okara Powder at PT. Saraswanti Indo Genetech……………………………………41
Appendix 3. Result of Soluble and Insoluble Fiber Analysis of Fine Okara Powder at PT. Saraswanti Indo Genetech……………………………………44
Appendix 4. Result of Proximate Analysis of Potato Doughnut without Addition of Okara at PT. Saraswanti Indo Genetech……………………………………45
Appendix 5. Result of Soluble and Insoluble Fiber Analysis of Potato Doughnut without Addition of Okara at PT. Saraswanti Indo Genetech……………………………………46
Appendix 6. Result of Proximate Analysis of Potato Doughnut with 5% Fine Okara Addition at PT. Saraswanti Indo Genetech……………………………………47
Appendix 7. Result of Soluble and Insoluble Fiber Analysis of Potato Doughnut with 5% Fine Okara Addition at PT. Saraswanti Indo Genetech……………………………………48
Appendix 8. Lightness Result of Okara Powder with Different Particle Size…..49
Appendix 9. Result of Soluble Fiber Analysis……………………………………50
Appendix 10. Result of Insoluble Fiber Analysis…………………………………51
Appendix 11. Result of Hedonic Test for Aroma of Potato Doughnut with Coarse, Fair, and Fine Okara Powder……………………………………52
Appendix 12. Result of Hedonic Test for Crust Color of Potato Doughnut with Coarse, Fair, and Fine Okara Powder……………………………………56
Appendix 13. Result of Hedonic Test for Crumb Color of Potato Doughnut with Coarse, Fair, and Fine Okara Powder……………………………………60
Appendix 14. Result of Hedonic Test for Taste of Potato Doughnut with Coarse, Fair, and Fine Okara Powder……………………………………64
Appendix 15. Result of Hedonic Test for Texture of Potato Doughnut with Coarse, Fair, and Fine Okara Powder……………………………………69
Appendix 16. Result of Hedonic Test for Overall Acceptance of Potato Doughnut with Coarse, Fair, and Fine Okara Powder ..............................................................................................................73

Appendix 17. Result of Hardness of Potato Doughnut with Addition of Okara using Texture Analyzer .................................................................77

Appendix 18. T-Test for Moisture Content of Potato Doughnut with 0% and 5% Fine Okara Powder Addition .........................................................80
