### **PROYEK THE ST. MORITZ**

(xvi + 39 halaman: 38 gambar; 1 tabel; 23 lampiran)

Proses pekerjaan pondasi merupakan salah satu bagian terpenting dalam pembangunan gedung tinggi. Tanpa pondasi yang kokoh, tentunya suatu gedung tidak dapat berdiri tegak. Oleh karena itu, laporan ini akan membahas secara mendetil mengenai proses pekerjaan pondasi *bored pile* beserta dengan beberapa pengujian yang umum digunakan di lapangan.

### **THE ST. MORITZ PROJECT**

*(xvi + 39 pages: 38 pictures; 1 table; 23 attachment)*

*Process of foundation construction is one of the most important part in constructing a high rise building. Without a good foundation, a building surely can't stand straight up. For that reason, this report will discuss in great detail about the installation of bored pile foundation with some tests that are often done at the project location.*
