GAMBARAN TINGKAT PENGETAHUAN PERAWAT TENTANG *INTERNATIONAL PATIENT SAFETY GOALS* DI RUANG RAWAT INAP LANTAI 5 SILOAM HOSPITALS MANADO

(xiv+ 37 halaman; 1 gambar; 5 tabel; 7 lampiran)

International Patient Safety Goals (IPSG) atau Sasaran Keselamatan Pasien merupakan standar pedoman untuk keselamatan pasien dan mencegah adanya insiden yang merugikan pasien dan rumah sakit. Pencapaian IPSG diharapkan mencapai 100%. Siloam Hospitals Manado telah menerapkan IPSG sejak awal berdirinya. Dalam menerapkan IPSG diperlukan pengetahuan yang baik. Secara keseluruhan belum pernah dilakukan evaluasi tingkat pengetahuan perawat yang ada di Siloam Hospitals Manado tentang IPSG. Tujuan penelitian ini untuk mengetahui tingkat pengetahuan perawat tentang IPSG di ruang rawat inap lantai 5 Siloam Hospitals Manado. Metode penelitian menggunakan metode kuantitatif deskriptif dengan teknik *total sampling* sebanyak 58 perawat pelaksana dan *incharge* di ruang rawat inap lantai 5 Siloam Hospitals Manado. Instrumen penelitian yang digunakan adalah kuesioner yang disusun sendiri oleh peneliti berdasarkan teori dan sudah diuji validitas serta reliabilitas. Hasil penelitian tentang tingkat pengetahuan perawat tentang IPSG di ruang rawat inap lantai 5 Siloam Hospitals Manado dalam kategori baik yaitu sebanyak 71% (41 perawat), kategori cukup sebanyak 29% (17 perawat). Peneliti menyarankan agar pihak rumah sakit terus-menerus mengadakan training, edukasi dan meningkatkan pengawasan dalam penerapan IPSG, sehingga dapat meningkatkan keselamatan pasien.
