PERCEPTION OF MENTOR AND MENTEE FACULTY OF NURSING, PELITA HARAPAN UNIVERSITY ABOUT PROGRAMS MENTORING IN THE PANDEMIC COVID-19

(xiv + 75 Pages; 1 Chart; 15 Tables; 8 Attachments)

Background: Mentoring is defined as continuous feedback between two individuals which aims to build knowledge, skills, information with a more focus on professional development and tends to be more personal. From the results of the preliminary study, the program mentoring for Mentors and Mentees at the Faculty of Nursing, Pelita Harapan University has been carried out involving four mentors and 11 mentees as respondents, it can be concluded that Mentors and Mentees have a bad perception. **Research Objectives:** to identify the perceptions of students in the Faculty of Nursing, Universitas Pelita Harapan about the program mentoring during the Covid-19 pandemic. **Research Methods:** This study uses descriptive quantitative methods. The research was conducted from January to March 2021. The research sample was 229 students from the Faculty of Nursing, Pelita Harapan University. The research instrument used a questionnaire consisting of 21 statement items for Mentors and 17 items for mentee statements. The sampling technique was simple random sampling using univariate analysis. **Results:** This study showed that the mentee's perception of the mentoring program during the Covid-19 pandemic was very good (65%), and the results of mentee's perception of the mentoring program during the Covid-19 pandemic showed a good perception (58%). **Recommendation:** Student Service is expected to continue to run the mentoring program and be able to adjust and improve online mentoring programs so that Mentors and Mentees can maintain their perceptions and the running of the mentoring program well.

Keywords: Nursing students, online mentoring, Mentors and mentees perceptions
