ACKNOWLEDGEMENT

The researcher would like to thank Jesus Christ for all His guidance and blessing in every step that the researchers process of the proposal, titled “The Determinants of Foreign Direct Investment Inflow in South Korea”, can be completed. This proposal is made to obtain bachelor’s degree in the Faculty of Economics, University of Pelita Harapan, Karawaci. The researcher realized that this bachelor study and final paper would not be able to be completed without support and guidance from various parties. The writer would like to give gratitude to all the lecturers, family and friends to help, guide and give this final project. The writer hopes that this research would give benefits from the determinants that influence the foreign direct investment inflow of South Korea towards the parties concerned. In making of this proposal, surely there would have a lot of mistakes, therefore, the writer hope for suggestion and critics that could be beneficial for this proposal. Finally, writer hopes that this proposal is beneficial to the readers. The researcher would like to thank each and everyone that have involved, supported, helped, and prayed for the researcher to complete this research in time. I would like express my deepest gratitude for these people, especially to:
