ACKNOWLEDGEMENT

The writer gives thanks to Almighty God for His grace, protection, and ability to do all the works that leads to the completion of this thesis "FACIAL RECOGNITION FOR ATTENDANCE SYSTEM WITH DISCRETE WAVELET TRANSFORM AND DISCRETE COSINE TRANSFORM USING SUPPORT VECTOR MACHINE". The writer thanks God for all the opportunities, trials and strength that have been showered to be able to finish writing this thesis on schedule.

This thesis was written as a partial fulfilment of the academic requirements according to the Mathematics Study Program of the Faculty of Science and Technology, Universitas Pelita Harapan.

The writer acknowledged that this thesis wouldn't be finished without the guidance and help of many parties. Therefore, the writer would like to express the utmost gratitude towards:

1. Mr. Eric Jobiliong, Ph.D., as the Dean of the Faculty of Science and Technology.
2. Mrs. Dr. Nuri Arum Anugrahati as the Vice Dean of the Faculty of Science and Technology.
3. Mr. Laurence, M.T., as the Director of Administration and Student Affairs of the Faculty of Science and Technology.
4. Mr. Kie Van Ivanky Saputra, Ph.D., as the Head of the Mathematics Study Program of Universitas Pelita Harapan.
5. Mr. Dipl.-Math. Petrus Widjaja, the writer's Academic Advisor, who always provides guidance, time, and motivation for the writer from the first semester up until this thesis is finished.
6. Mr. Dr. Samuel Lukas, as the writer's thesis supervisor, who always helps, guides, motivates, as well as provides suggestions throughout the entire process of writing this thesis.
7. Mr. Dion Krisnadi, S.Inf., S.Si., M.T.I., M.Act.Sc., as the writer's thesis supervisor, who has given the guidance and supports the writer patiently throughout the entire process of writing this thesis.
8. All lecturers that have taught the writer in Universitas Pelita Harapan.
9. All staff of the Faculty of Science and Technology that have helped the writer in Universitas Pelita Harapan

10. Mr. Freddy Iman and Mrs. Tien Sumery T., the writer's parents, who have given tremendous support for the writer.
11. Stephanie Tanasia, the writer's best friend, who has accompanied and supported the writer.
12. Other parties that can't be mentioned one by one.

Finally, the writer expresses gratitude for the help and contribution of all parties, and the writer hopes that this thesis is beneficial and can be used as an input in the education department.

TABLE OF CONTENTS viii

LIST OF FIGURES xi

LIST OF TABLES xii

LIST OF LISTINGS xiii

LIST OF APPENDICES xiv

CHAPTER 1 INTRODUCTION 1
- 1.1 Background 1
- 1.2 Research Question 2
- 1.3 Research Objectives 2
- 1.4 Limitations 2
- 1.5 Significance of the Study 3
  - 1.5.1 Theoretical Significance 3
  - 1.5.2 Practical Significance 3
- 1.6 Overview of Chapters 3

CHAPTER 2 THEORETICAL FRAMEWORK 5
- 2.1 Discrete Wavelet Transform 5
  - 2.1.1 Wavelets 5
  - 2.1.2 Definition 6
  - 2.1.3 Filter Banks 7
- 2.2 Discrete Cosine Transform 8
  - 2.2.1 Definition 8
    - 2.2.1.1 The DCT Transform Matrix 10
  - 2.2.2 DCT Properties 11
    - 2.2.2.1 Decorrelation 11
  - 2.2.3 Energy Compaction 11
  - 2.2.4 Separability 12

2.3 Machine Learning 12
2.4 Support Vector Machine 13
2.4.1 Mathematical Prerequisites 14
2.4.1.1 Vectors 14
2.4.1.2 Unit Vector 14
2.4.1.3 Distance from Point to Line 14
2.4.2 Mathematical Model 15
2.4.3 Optimal Hyperplane 16
2.4.3.1 Lagrange Multiplier 17
2.4.4 Kernel Functions 17
2.5 Literature Review 18

CHAPTER 3 METHODOLOGY 23
3.1 Data 23
3.1.1 Training Phase Data 23
3.1.2 Testing Phase Data 23
3.2 Data Preprocessing 25
3.2.1 Object Detection 25
3.2.2 Histogram Equalization 26
3.2.3 Image Compression 27
3.2.4 Image Representation 28
3.2.5 Data Labelling 29
3.3 Building the Support Vector Machine Classifier 29
3.3.1 Creating the Model 29
3.3.1.1 Multi-Class Classification 30
3.3.1.2 Parameters 30
3.3.2 Training the Model 32
3.3.3 Testing the Model 33
3.3.3.1 Training Phase 33
3.3.3.2 Testing Phase 33

CHAPTER 4 RESULT AND ANALYSIS 34
4.1 Image Preprocessing Result 34
4.1.1 Facial Detection 34
4.1.2 Image Resizing 34
4.1.3 Histogram Equalization 37
4.2 Facial Recognition Result 37
4.2.1 Discrete Wavelet Transform 38
4.2.2 DWT and DCT 42
4.3 Analysis 44
4.3.1 Data Insufficiency 46
4.3.2 Comparison between DWT and DWT-DCT Case ... 46

CHAPTER 5 CONCLUSION AND SUGGESTION 47
5.1 Conclusion 47
5.2 Suggestion 48
