

ACKNOWLEDGEMENTS

First and foremost, the author would like to thank Jesus Christ for His blessings and grace which has allowed the author to complete the research and thesis entitled “EFFECT OF SORGHUM FLOUR AND RICE FLOUR RATIO AND KONJAC CONCENTRATION ON NOODLE ANALOGUE CHARACTERISTICS.”

This thesis report was done to fulfill the requirements to obtain the bachelor's degree in Food Technology Study Program, Universitas Pelita Harapan. The completion of this research has been due to the guidance and supports from other parties, and thus would like to take this opportunity to express sincere gratitude to:

1. Mr. Eric Jobilong, Ph.D. as the Dean of Faculty of Science and Technology, Pelita Harapan University.
2. Dr. Nuri Arum Anugrahati, as the Vice Dean of Faculty of Science and Technology, Pelita Harapan University.
3. Mr. Laurence, S.T., M.T. as the Director of Administration and Student Affairs of Faculty of Science and Technology, Pelita Harapan University.
4. Mr. Ir. Wilbur Donald Raymond Pokatong, Ph.D. as the Head of Food Technology Department, Faculty of Science and Technology, Pelita Harapan University.
5. Mrs. Ratna Handayani, M.P., as the Deputy of Food Technology Study Program.
6. Mrs. Yuniwaty Halim, M.Sc. as thesis supervisor that has helped the author by giving time, guidance and critique throughout the whole research program.
7. Dr. Tagor M. Siregar, M.Si., Natania, M.Eng., and Yuniwaty Halim, M.Sc., as the respective Head of Chemistry, Food Processing, Quality Control and Research Laboratories who had given the permission to conduct the research.
8. All lecturers, assistant lecturers and laboratory assistants of Food Technology Study Program for the help given throughout this thesis research.

9. The author's family for the support, care and prayers that have given the author the encouragement to finish this thesis.
10. Diandra Tirta Kusuma, who has been generous in giving knowledge, advice and support in starting and finishing this thesis.
11. Yolita Lilian, Melvin Wayne Kurniawan and Frandy Gunawan for their advice and support throughout in researching the same topic.
12. Alvin Bagus Ilianto, Delvin Kho, Saverius Chandra Dwitama, Karenina Caroline, Matthew Suharso, Valerie Kathleen Laurencia, Grace Novianti, Jocelyn Shania Anggrek for their advice and support, making this thesis worthwhile.
13. All friends from Food Technology Universitas Pelita Harapan.

The author apologizes for any fault that has been conducted during the conduct and writing of this thesis. The author would accept any criticism and suggestions given to this report and would hope that this thesis would be useful to the readers. Thank you.

Tangerang, August 9th 2021.

(Brigitta Angelina)

COVER	
FINAL ASSIGNMENT STATEMENT AND UPLOAD AGREEMENT.....	
APPROVAL BY THESIS SUPERVISOR	
APPROVAL BY THESIS EXAMINATION COMMITTEE	
ABSTRACT.....	v
ACKNOWLEDGEMENTS.....	vi
TABLE OF CONTENTS.....	viii
LIST OF FIGURES	x
LIST OF TABLES	xi
LIST OF APPENDICES	xii
 CHAPTER I INTRODUCTION	
1.1 Introduction	1
1.2 Research Problem.....	3
1.3 Objectives.....	5
1.3.1 General objective.....	5
1.3.2 Specific objective	5
 CHAPTER II LITERATURE REVIEW	
2.1 Sorghum	6
2.2 Rice flour.....	10
2.3 Noodles.....	13
2.4 Konjac hydrocolloid	18
 CHAPTER III RESEARCH METHODOLOGY	
3.1 Materials and Equipment.....	20
3.2 Research Methodology.....	20
3.2.1 Research Stage I	21
3.2.1.1 Production of sorghum-rice noodle analogue.....	21
3.2.1.2 Experimental Design	22
3.2.2 Research stage II	24
3.2.2.1 Experimental Design	25
3.3 Analysis procedures	26
3.3.1 Proximate analysis	26
3.3.1.1 Moisture content analysis (AOAC, 2005)....	26
3.3.1.2 Fat content analysis (AOAC, 2005)	26
3.3.1.3 Protein content analysis (AOAC, 2005).....	27
3.3.1.4 Ash content (AOAC, 2005).....	27
3.3.1.5 Carbohydrate (Nielsen, 2007)	28
3.3.2 Texture Profile Analysis (Zhang <i>et al.</i> , 2010).....	28
3.3.3 Elongation and Tensile Strength (Affifah and Ratnawati, 2017).....	28
3.3.4 Cooking loss (Kraithong <i>et al.</i> , 2019 with modification)	29

3.3.5 Water absorption (Kraithong <i>et al.</i> , 2019).....	29
3.3.6 Sensory test.....	30
3.3.6.1 Hedonic test (Sharif <i>et al.</i> , 2017)	30
3.3.6.2 Multiple comparison test (Sharif <i>et al.</i> , 2017)	
.....	30
CHAPTER IV RESULTS AND DISCUSSION	
4.1 Noodle Analogue Characteristics with Different Sorghum-Rice Ratio and Konjac Glucomannan Concentration	31
4.1.1 Cooking loss	31
4.1.2 Water Absorption	33
4.1.3 Hardness	35
4.1.4 Adhesiveness	37
4.1.5 Springiness.....	39
4.1.6 Cohesiveness	40
4.1.7 Tensile Strength.....	42
4.1.8 Elongation.....	43
4.1.9 Organoleptic Analysis	45
4.1.9.1 Taste	45
4.1.9.2 Aroma	46
4.1.9.3 Chewiness.....	47
4.1.9.4 Hardness	48
4.1.9.5 Adhesiveness	50
4.1.9.6 Overall Acceptance	50
4.1.10 Selection of Best Formulation.....	52
4.2 Comparison between Best Noodle Analogue with Commercial Noodle	53
4.2.1. Proximate analysis	54
4.2.2. Starch and dietary fiber content.....	56
4.2.3. Cooking Properties	58
4.2.4. Textural properties.....	60
4.2.5. Organoleptic Properties	62
4.2.6. Selection of best formulation.....	63
CHAPTER V CONCLUSION AND SUGGESTIONS	
5.1 Conclusions	64
5.2 Suggestions.....	65
BIBLIOGRAPHY	66
APPENDICES	71

LIST OF APPENDICES

APPENDIX A. Moisture content of noodle analogue with different Sorghum-Rice Ratio and Konjac Glucomannan Concentration	A-1
APPENDIX B. Cooking loss of Noodle Analogue with different Sorghum-Rice Ratio and Konjac Glucomannan Concentration	B-1
APPENDIX C. Water Absorption of Noodle Analogue with different Sorghum-Rice Ratio and Konjac Glucomannan Concentration.....	C-1
APPENDIX D. Hardness of Noodle Analogue with different Sorghum-Rice Ratio and Konjac Glucomannan Concentration.....	D-1
APPENDIX E. Adhesiveness of Noodle Analogue with different Sorghum-Rice Ratio and Konjac Glucomannan Concentration	E-1
APPENDIX F. Springiness of Noodle Analogue with different Sorghum-Rice Ratio and Konjac Glucomannan Concentration	F-1
APPENDIX G. Cohesiveness of Noodle Analogue with different Sorghum-Rice Ratio and Konjac Glucomannan Concentration	G-1
APPENDIX H. Tensile Strength of Noodle Analogue with different Sorghum-Rice Ratio and Konjac Glucomannan Concentration	H-1
APPENDIX I. Elongation of Noodle Analogue with different Sorghum-Rice Ratio and Konjac Glucomannan Concentration	I-1
APPENDIX J. Hedonic test of Noodle Analogue with different Sorghum-Rice Ratio and Konjac Glucomannan Concentration	J-1
APPENDIX K. Chemical Composition of Commercial Noodle and Best Noodle Analogue Formulation with Sorghum-Rice Ratio and Konjac Glucomannan Concentration	K-1
APPENDIX L. Statistical Results from Comparison of Best Noodle Analogue and Commercial Noodle.....	L-1
APPENDIX M. Multiple Comparison Statistical Analysis Result of Best Formulated Noodle Analogue	M-1
APPENDIX N. Hedonic Test Questionnaire	N-1
APPENDIX O. Multiple Paired Comparison Test Questionnaire	O-1
APPENDIX P. Noodle Analogue Production	P-1
