

ACKNOWLEDGMENTS

First of all, I would like to thank God for giving me opportunity to have more education in my life, and I would like to dedicate this thesis to my mother Ibu Lily Jurnaliah Fauzan, for her endless prayers, love and support.

I would like to express my deepest gratitude to my supervisor, Ibu Irene Rebecca Tobing, Ph.D. Her dedication, on-going support, timely advice, meticulous scrutiny, and broad knowledge on scholarly advice has helped me a great deal - not just in finishing my thesis, but she has been solely responsible for the broadening of my perspectives in how things are in general.

I have a great sense of gratitude to Dr. Hananto for taking his time in pointing me to the right direction regarding statistics. His meticulous scrutiny, scientific approach and most importantly his patience has helped me to a very great extent to be able to understand the use of statistics and the quantitative approach.

I also would like to acknowledge Ibu Connie Rasilim, S.S., B.Ed., M.Pd, the dean of the Faculty of Education of Universitas Pelita Harapan and Dr. Niko Sudibjo, S.Psi., M.A, the head of Master of Educational Technology program of Universitas Pelita Harapan.

I am extremely thankful to my friend Stefy Akuba, who has been patiently giving advice, and guiding me throughout this process. Your generosity has helped me on many occasions. Also, my best friend Sandra Sitorus, who was always there when I need extra encouragement. You have both motivated me to finish this thesis.

Finally, it is my privilege to thank my husband John Godbold for his endless encouragement, love, support, and for always believing in me, and last but certainly not the least to my son Musa Khizar Godbold to give strength and will power to finish what I have started.
