

ACKNOWLEDGEMENTS

Praise God for His guidance and blessing, the author can finish this thesis entitled “CONVERSION OF CRUDE CURCUMIN ANALOG WITH AROMATIC ALDEHYDE AND DETERMINATION OF ITS ANTIOXIDANT ACTIVITY” that is written as partial fulfillment of the academic requirements to obtain the degree of *Sarjana Teknologi Pertanian Strata Satu* Food Technology, Universitas Pelita Harapan.

Support, guidance, and Prayer from many parties are received abundantly during the laboratory experiment and completion of this report, and therefore deserve mentions of gratitude. In this occasion, the author would like to give the highest appreciation to:

1. Mr. Eric Jobiliong, Ph.D. as Dean of Faculty of Science and Technology.
2. Mrs. Sunie Rahardja, M.S.CE. as Acting Vice Dean of Faculty of Science and Technology.
3. Mr. Laurence, S.T., M.T. as Director of Faculty of Science and Technology.
4. Mr. W. Donald R. Pokatong, Ph.D. as Head of Food Technology Study Program, Faculty of Science and Technology, Univeristas Pelita Harapan and thesis defense examiner who gave many useful advices for thesis revision and completion.
5. Mr. Ir. A. Herry Cahyana, Ph.D. as thesis supervisor and thesis defense examiner, for patiently guide, motivate, advice and support during the process and completion of the thesis.
6. Mrs. Natania, M.Eng, Head of Food Processing Laboratory, as co-supervisor, for patiently guide, motivate, advice and support during the process and completion of thesis report.
7. Ms. Lucia Crysanthi Soedirga, M.Sc. as thesis defense examiner who give many useful advices for the thesis completion.
8. Dr. Tagor M. Siregar, M.Si., as the Head of Chemistry Laboratory, Ms. Yuniwaty Halim, M.Sc., as the Head of Quality Control and Research

Laboratories, where the author conducted the final project.

9. Ms. Julia Ratna Wijaya, MAppSc., as a former Academic Advisor and Ms. Wenny S. L. Sinaga, M.Si. as the current Academic Advisor, for academic advice during study period.
10. Ms. Virly, S.T.P, Mr. Mateus Andra Gunawan, S.T.P, Mr. Darius, and Mr. Adi for the useful help and guidance in the laboratories during the research.
11. All lecturers and staff of Food Technology Study Program who teach the author during studying at Universitas Pelita Harapan.
12. Prabowo Saputra, Nerissa Arviana, Nancy Tamoni and Livia as thesis partners who always accompany, give support, help, and comfort during the thesis days.
13. Riviana Susanto, Dea Lambertha, Felicia Wie and Franz Fernando who give endless support during thesis and completion of report.
14. Novia Tanasal and Winnie Dorothy for the advices and comfort during thesis completion.
15. Johan Cahyadi who always support, comfort and understanding during hard times in thesis days and completion of report.
16. All friends from C class of Food Technology 2014 Universitas Pelita Harapan.
17. All friends and close relatives who are not yet mentioned but have supported the author during thesis days and completion of report.

The author realize that this report is far from excellence and has room to be improved. Last but not least, the author hopes this report can be useful and informative for the readers.

Tangerang, February 2018

(JESLYN WINATA)

COVER	
STATEMENT OF THESIS AUTHENTICITY	
APPROVAL BY THESIS SUPERVISORS	
APPROVAL BY THESIS EXAMINATION COMMITTEE	
ABSTRACT	v
ACKNOWLEDGEMENTS	vi
TABLE OF CONTENTS	viii
LIST OF FIGURES	x
LIST OF TABLES	xi
LIST OF APPENDICES	xii
CHAPTER I INTRODUCTION	
1.1 Background	1
1.2 Research Problem	2
1.3 Objectives	2
1.3.1 General Objectives	2
1.3.2 Specific Objectives	2
CHAPTER II LITERATURE REVIEW	
2.1 Turmeric.....	4
2.1.1 Curcuminoid	5
2.1.2 Curcumin.....	5
2.2 Cinnamon.....	7
2.2.1 Cinnamaldehyde.....	8
2.3 Benzaldehyde.....	9
2.4 Urea.....	9p
2.5 Thiourea	10
2.6 Guanidine.....	11
2.7 Concentrated Sulfuric Acid.....	12
2.8 Synthesis of Compound towards Biginelli Reaction	12
2.9 Antioxidant	13
2.10 UV-Vis Spectrophotometry	14
2.11 LC-MS	14
CHAPTER III RESEARCH METHODOLOGY	
3.1 Materials and Equipment	16
3.2 Preliminary Research	16
3.2.1 Solvent Determination and Catalyst Optimization	16
3.3 Main Research	17
3.4 Experimental Design.....	20

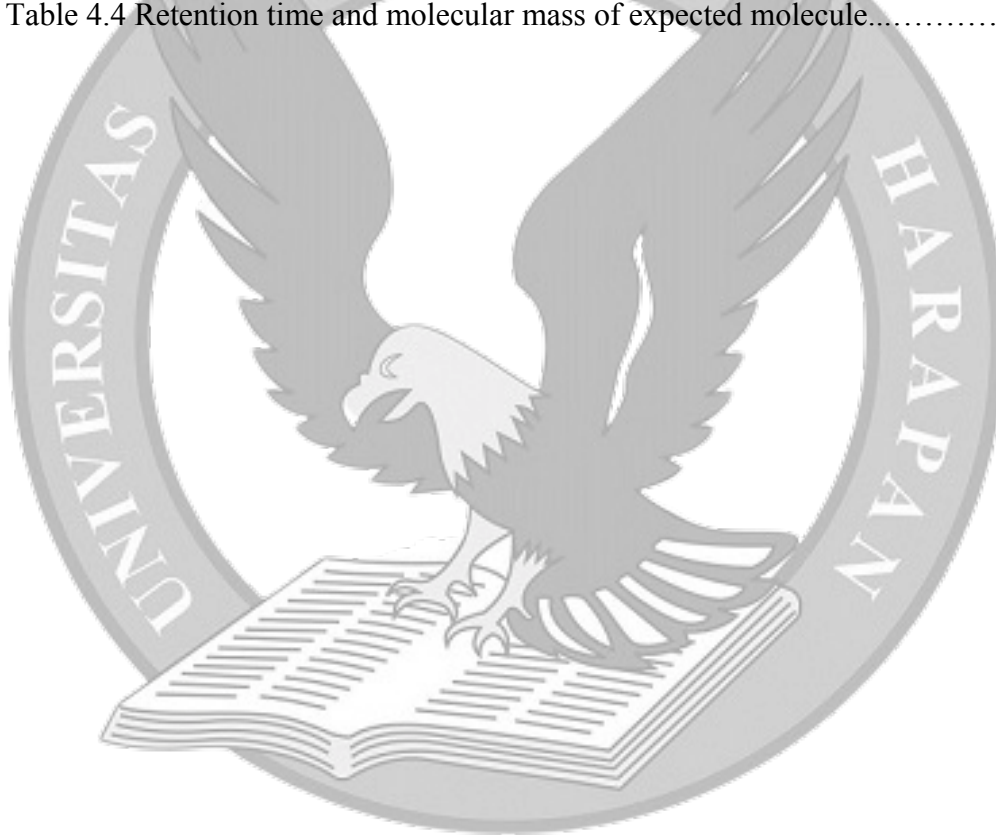

3.4.1 Preliminary Research	20
3.4.1.1 Solvent Determination and Catalyst Optimization.....	20
3.4.2 Main Research	22
3.5 Method of Analysis.....	25
3.5.1 Percentage of Yield	25
3.5.2 Thin Layer Chromatography	25
3.5.3 UV-Vis Spectrophotometry.....	25
3.5.4 Antioxidant Activity	26
3.5.5 Liquid Chromatography-Mass Spectrometry	27
CHAPTER IV RESULTS AND DISCUSSION	
4.1. Effect of Solvent and Catalyst on Yield of Crude Curcumin Analog (Dihydropyrimidine).....	28
4.2 Effect of Solvent and Catalyst on TLC spot of Crude Curcumin Analog (Dihydropyrimidine).....	30
4.3 Effect of Aldehyde and Modifier on Yield of Crude Curcumin Analog (Dihydropyrimidine).....	31
4.4 Effect of Aldehyde and Modifier on TLC Spot of Crude Curcumin Analog (Dihydropyrimidine).....	32
4.5 Effect of Aldehyde and Modifier on Peak Wavelength Maximum of Crude Curcumin Analog (Dihydropyrimidine)	33
4.6 Effect of Aldehyde and Modifier on Antioxidant Activity of Crude Curcumin Analog (Dihydropyrimidine)	36
4.7 Effect of Aldehyde and Modifier on Mass Spectrum of Crude Curcumin Analog (Dihydropyrimidine)	38
CHAPTER V CONCLUSIONS AND SUGGESTIONS	
5.1 Conclusions.....	40
5.2 Suggestions	40
BIBLIOGRAPHY	41
APPENDICES	46

LIST OF FIGURES

	page
Figure 2.1 Chemical structures of three curcuminoids.....	5
Figure 2.2 Keto-enol tautomerism of curcumin.....	7
Figure 2.3 Chemical structure of cinnamaldehyde	9
