

ACKNOWLEDGEMENTS

Deepest gratitude given to Jesus Christ The Lord in helping the author to complete the report. Title of the thesis is “OPTIMIZATION OF CONDITIONS FOR CRUDE GLUCOSAMINE PRODUCTION FROM *Penaeus Monodon* Fabr. SHELL BY *Aeromonas hydrophila*”, written to fulfill requirement of obtaining degree of *Sarjana Teknologi Pertanian Strata Satu* from Universitas Pelita Harapan, Tangerang, Banten.

The author appreciate helps of many parties who support finishing the thesis. Without the help, the thesis can not be done properly. The author would like to thank sincerely to everybody who contributes in helping and encouraging author during these hard times and tough conditions, including:

1. Eric Jobiliong, Ph.D., as the Dean of Faculty of Science and Technology.
2. Sunie Rahardja, M.S.CE., as Acting Vice Dean of Faculty of Science and Technology.
3. Laurence, S.T., M.T., as the Director of Faculty of Science and Technology.
4. Ir. W. Donald R. Pokatong, M.Sc., Ph.D., as the Head of Food Technology Study Program who had given chance to the writer to carry out the thesis.
5. Yuniwaty Halim, M.Sc., as the thesis supervisor, thesis defense examiner and Head of Quality Control and Research Laboratory for the guidance, patience, and encouragement given to the writer in the entire process of finishing thesis.
6. Dr. Nuri Arum Anugrahati, MP and Dr. Adolf J.N. Parhusip, M.Si as thesis defense examiner who give many useful advices for the thesis completion.
7. Dr.Ir. Hardoko, M.S. and Ratna Handayani, MP as the lecture that involve in glucosamine project.
8. Wenny Silvia Loren Sinaga, M.Si., as academic supervisor who had supported the author in study plan management.

9. Natania, M.Eng., as the Head of Food Processing Technology Laboratory, Dr. Adolf J. N. Parhusip as the head of Microbiology laboratory, and Dr. Tagor Marsillam Siregar as the head of Chemistry laboratory who had allowed the author to conduct the thesis in their laboratories.
10. Mr. Adi, Mr. Darius, Mr. Adzie, and Mr. Yosafat for the support, especially technical things in the laboratories
11. Virly, STP and Mateus Andra Gunawan, STP who had support the author the whole time of thesis in the laboratories.
12. Precious and dearest family for the help, support, and prayer while working on the thesis until completion.
13. Andrea Christy, Cecilia Josephine, Fabiola, Gracia, Graziella Fausta, Kevin Samuel, Vania Lucida, Veronica, and William Soegiharto as partners of Glucosamine project under the same supervisor group for the continuous help, relentless encouragement, and guidance during research and finishing report.
14. Lidia Cang who always support, give enormous help, as mood boosters whenever stress come during the research and completion period of report.
15. Food Technology Batch 2014 for the togetherness and encouragement.
16. All other parties who helped the author and can not be mentioned one by one.

The author figures out that this report needs long way to go to be perfect, and thus, criticism and suggestion in order to improve the report are cordially accepted. Finally, the author expects this report will be useful for readers.

Tangerang, February 20th, 2018

(FEBRICO)

COVER	
STATEMENT OF THESIS AUTHENTICITY	
APPROVAL LETTER BY THESIS SUPERVISOR	
APPROVAL LETTER BY THESIS EXAMINATION COMMITTEE	
ABSTRACT.....	v
ACKNOWLEDGEMENT	vi
TABLE OF CONTENTS.....	viii
LIST OF FIGURES	x
LIST OF TABLES.....	xi
LIST OF APPENDICES.....	xii
CHAPTER I INTRODUCTION	
1.1 Background.....	1
1.2 Research Problem	2
1.3 Objective.....	3
1.3.1 General Objective.....	3
1.3.2 Specific Objectives.....	3
CHAPTER II LITERATURE REVIEW	
2.1 Tiger Shrimp (<i>Penaeus monodon</i> Fabricius).....	4
2.2 Chitin	5
2.2.1 Chitin Production.....	6
2.3 Glucosamine	7
2.3.1 Glucosamine Production	8
2.4 Fermentation	10
2.5 <i>Aeromonas hydrophila</i>	11
2.5.1 Morphology.....	12
CHAPTER III RESEARCH METHODOLOGY	
3.1 Materials and Equipment.....	14
3.2 Research Methods.....	15
3.2.1 Preliminary Research.....	15
3.2.1.1 Preparation of Isolated Chitin.....	15
3.2.1.2 Preparation of Stock Culture	17
3.2.1.3 Preparation of Working Culture	17
3.2.1.4 Preparation of Coloidal Chitin	17
3.2.1.5 Preparation of Chitinolytic Assay	19
3.3 Method of Analysis.....	20
3.3.1 Moisture Content (AOAC, 1999).....	20
3.3.2 Ash Content Analysis (AOAC, 1992).....	21

3.3.3 Protein Content Analysis (Kruger, 2009 with modification)	21
3.3.4 Percentage of Yield (Dompeipen, 2016)	22
3.3.5 Degree of Acetylation (Wu, 2008)	22
3.3.6 Morphology.....	23
3.3.7 Cell Counting	24
3.3.8 Chitinolytic Index (Suryadi, <i>et al.</i> , 2013).....	24
3.3.9 N-acetylglucosamine Analysis	25
3.3.9.1 Preparation of Glucosamine Standard Curve (Lamine, <i>et al.</i> , 2012 with modification).....	25
3.3.9.2 Quantification of N-acetylglucosamine (Wu, <i>et al.</i> , 2005 with modification).....	25
3.4 First Stage Research.....	26
3.4.1 Determination of Optimum Temperature for fermentation.....	26
3.5 Second Stage Reseach.....	28
3.5.1 Determination of Optimum Fermentation Period and pH of Media	28
3.5.2 Glucosamine Production.....	29
3.6 Experimental Design.....	29
3.6.1 Research Stage 1	29
3.6.2 Research Stage II	31
 CHAPTER IV RESULTS AND DISCUSSIONS	
4.1 Preliminary Research	33
4.1.1 Shrimp Identification	33
4.1.2 Aeromonas Hydrophila	34
4.1.2.1 Morphology	34
4.1.2.2 Cell Counting	34
4.1.3 Shrimp Shell Powder	34
4.1.4 Chitin Powder	35
4.1.5 Clear Zone Determination	38
4.2 First Stage Research	38
4.3 Second Stage Research	40
 CHAPTER V CONCLUSION AND SUGGESTIONS	
5.1 Conclusion.....	45
5.2 Suggetions	45

BIBLIOGRAPHY

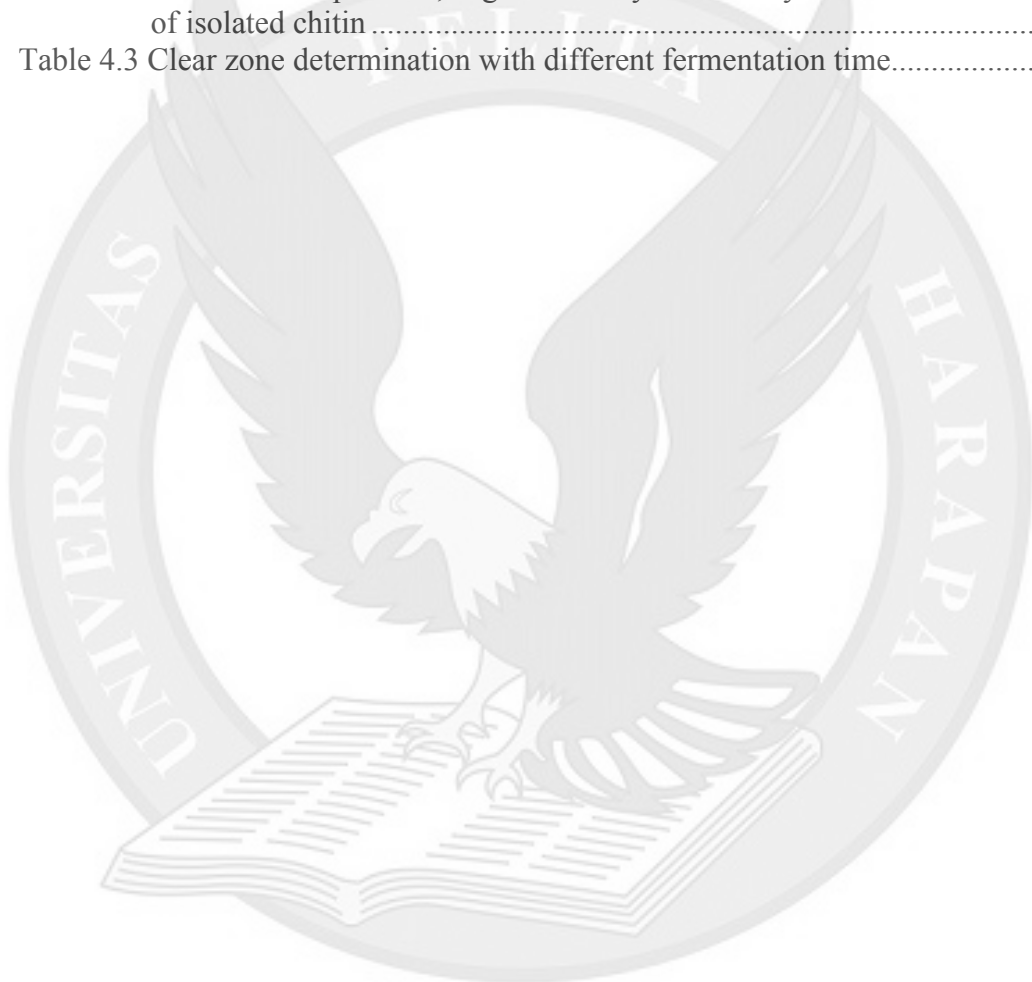

APPENDICES

LIST OF FIGURES

	page
Figure 2.1 <i>Penaeus monodon</i> Fabricius shrimp.....	5
Figure 2.2 Chemical structure of chitin	6
Figure 2.3 Chemical structure of Glucosamine	8
Figure 2.4 <i>A. hydrophila</i> growth curve on broth media.....	12
Figure 3.1 Flow diagram of substrate preparation from <i>P. monodon</i> shrimp shells	16
Figure 3.2 Flow diagram of preparation of Colloidal Chitin.....	18
Figure 3.3 Flow diagram of optimum temperature for fermentation.....	19
Figure 3.4 Flow diagram of temperature determination for glucosamine production	26
Figure 3.5 Flow diagram of optimum pH and fermentation period determination for glucosamine production	28
Figure 3.6 Flow diagram of glucosamine production.....	29
Figure 4.1 The effect of temperature towards NAG concentration	39
Figure 4.2 Submerged fermentation medium pH 7.0, 8.0, and 9.0 before sterilization.....	41
Figure 4.3 Submerged fermentation medium pH 7.0, 8.0, and 9.0 after sterilization and Buchner	41
Figure 4.4 The effect of fermentation time and pH toward production of NAG concentration.....	42

LIST OF TABLES

Table 3.1 Formulation for making selective medium.....	19
Table 3.2 Formula for making media fermentation.....	28
Table 3.3 Research statistical design stage I.....	31
Table 3.4 Research statistical design stage II.....	32
Table 4.1 Chemical composition of shrimp shell powder.....	34
Table 4.2 Chemical composition, degree of acetylation and yield of isolated chitin.....	35
Table 4.3 Clear zone determination with different fermentation time.....	38

LIST OF APPENDICES

	page
Appendix A	
Shrimp Shell identification.....	A-1
Appendix B	
Identification of <i>Aeromonas hydrophila</i>	B-1
Appendix C	
The results of the analysis of shrimp shell powder	C-1
Appendix D	
The results of the analysis of chitin powder.....	D-1
Appendix E	
Chitinolytic Index of <i>Aeromonas hydrophila</i>	E-1
Appendix F	
Standard Curve Glucosamine	F-1
Appendix G	
First Stage Research – N-acetylglucosamine Quantification.....	G-1
Appendix H	
Second Stage Research – N-acetylglucosamine Quantification.....	H-1
