

ACKNOWLEDGEMENTS

Thanks to Jesus Christ for the unlimited blessing to the writer during the completion of this thesis which entitled “EFFECT OF FERMENTATION pH AND TIME ON PRODUCTION OF CRUDE GLUCOSAMINE FROM *Panaeus monodon* SHELL DERIVED CHITIN FERMENTED BY *Serratia marcescens*” that is written as partial fulfillment of the academic requirements to obtain the degree of *Sarjana Teknologi Pertanian Strata Satu* Food Technology, Universitas Pelita Harapan.

The thesis cannot be successfully completed without the support, assistance, and guidance from many people. Therefore, the writer would like to express the gratitude to those who help and support the writer abundantly during the laboratory experiment and completion of this report, including:

1. Eric Jobiliong, Ph.D. acting as Dean of Faculty Science and Technology.
2. Sunie Rahardja, M.S.CE. acting Vice Dean of Faculty Science and Technology.
3. Laurence, ST., MT. as the Director of Faculty of Science and Technology.
4. Ir. W. Donald R. Pokatong, M.Sc., Ph.D. as Head of Food Technology Study Program of UPH and thesis defense examiner for giving a chance and many useful advices to write and finish the thesis.
5. Yuniwaty Halim, M.Sc. as thesis supervisor, for patiently guide and giving useful advice from the topic selection until the completion of the thesis and as Head of Quality Control and Research Laboratory where the writer conducts the final project.
6. Dr. Adolf J. N. Parhusip as thesis defense examiner and Head of Microbiology Laboratories who give many useful advices for the thesis completion.
7. Natania, M.Eng, and Dr. Tagor M. Siregar, M.Si. as Head of Laboratories (food processing, and chemistry respectively) where the writer conducts the final project.
8. Mr. Yosafat, Mr. Adi, Mr. Aji, Mr. Darius, and Mr. Christopher for the enormous help at laboratories.
9. All lecturers of Food Technology Study Program who teach the author during studying at Universitas Pelita Harapan.

10. Jimmy Sugiarto and Sulistyowati as beloved parents, Marvin Leonardo as beloved brother and all of my family for always giving moral support, advice, prays and comfort during the completion of this thesis.
11. “Glucosamine Family” – Graziella Fausta, Andrea Christy, Fabiola Wiratama, Febrico, Kevin Samuel, Cecilia Josephine, Veronica, William Soegiharto, and Gracia Stefani as thesis partners who always accompany, give support, help and comfort during thesis days.
12. Mr. Asiu from PT. Lola Mina to provide abundant amount of shrimp shell as the raw ingredient of this thesis project.
13. Mei Diana Sonatha, Rocky, Giovani Fransisca, Theresa Ellen, Caryn Fidelia and Jordan Bernando for endless supports, caring, and comfort during the completion of the thesis.
14. Hadyus, Christine, Ricco, Wynonna and all member of Spotlight Theater for giving supports, advices and comfort.
15. Stefany, Nikodemus, Beatrix Alijono, Jeffrey Junius, and Alexandria Nacia as mentee and friends for support given during the completion of the thesis.
16. Felicia Wiryadi, Hanna Corie, Fransisca Tania, Michelle Fadjar, and Nathania as best friends from high school for much support and comfort.
17. All members of 2014 Class C, Food Technology for the informative sharing and discussions shared together.
18. All family, friends and colleagues who cannot be mentioned one by one and contribute to the completion of the thesis.

The writer aware that this report is far from perfect and has room to be improved, therefore any criticisms and suggestions are very welcomed for better improvement. Finally, the writer hopes this report can be useful and informative to the readers.

VANIA LUCIDA

TABLE OF CONTENT

	page
COVER	
STATEMENT OF THESIS AUTHENTICITY	
APPROVAL BY THESIS SUPERVISOR	
ABSTRACT.....	iv
ACKNOWLEDGEMENTS	viii
TABLE OF CONTENT	viii
LIST OF TABLES	xi
LIST OF FIGURES	xiii
LIST OF APPENDICES.....	xiii
CHAPTER I INTRODUCTION.....	1
1.1 Background.....	1
1.2 Research Problem.....	3
1.3 Objectives	3
1.3.1 General Objective	3
1.3.2 Specific Objectives	4
CHAPTER II LITERATURE REVIEW	5
2.1 Tiger Shrimp.....	5
2.2 Chitin	7
2.2.1 Chitin Production	9
2.3 Glucosamine	10
2.4 Glucosamine Production	12
2.5 <i>Serratia marcescens</i>	13
CHAPTER III RESEARCH METHODOLOGY	16
3.1 Materials and Equipment.....	16
3.2 Research Method	17
3.2.1 Preliminary Research	17
3.2.1.1 Preparation of Isolated Chitin	17
3.2.1.2 Media Preparation	18
3.2.1.3 Preparation of Culture Stock.....	19
3.2.1.4 Preparation of Colloidal Chitin.....	19
3.2.1.5 Determination of Chitinolytic Activities	20
3.2.2 First Stage Research.....	21
3.2.3 Second Stage Research	23

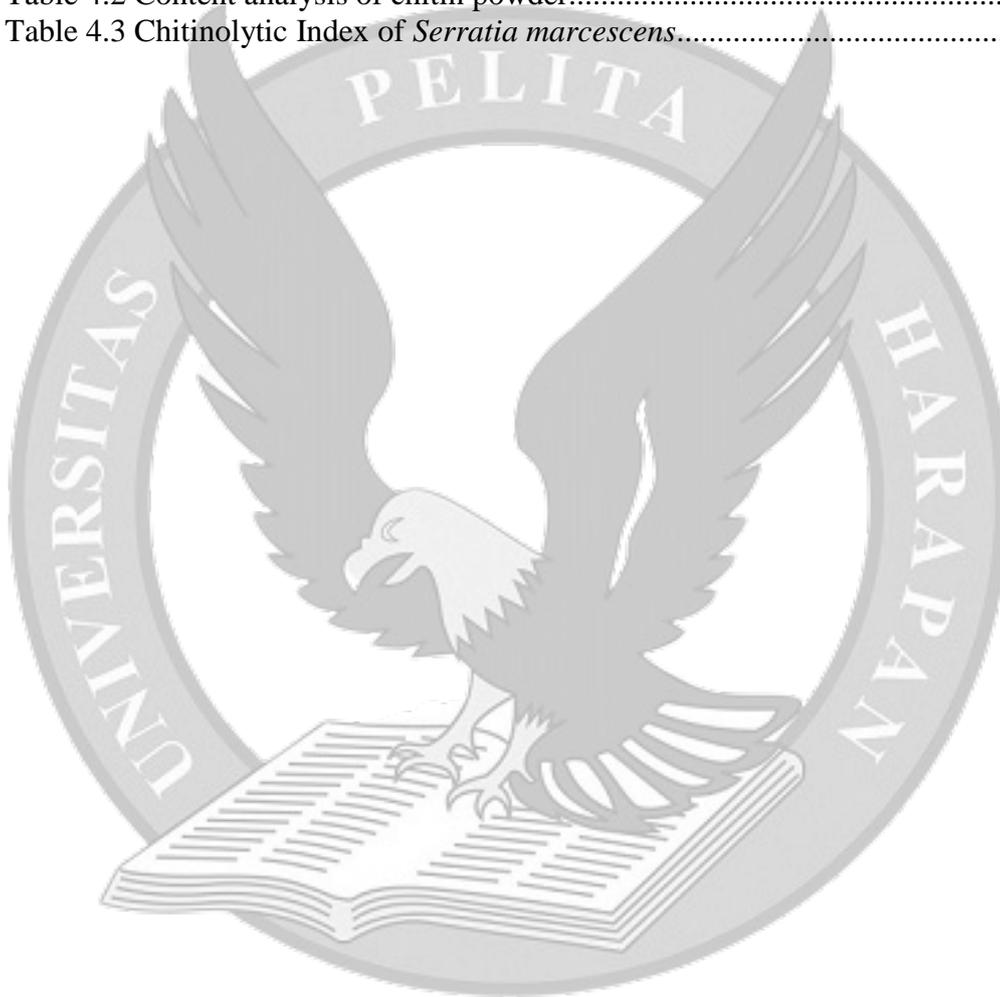

3.2.3.1 Determination of Optimum pH and Fermentation Period.....	23
3.3 Experimental Design	24
3.3.1 Research Stage I.....	24
3.3.2 Research Stage II	25
3.4 Method of Analysis	27
3.4.1 Moisture Content Analysis (AOAC, 2005)	27
3.4.2 Yield Determination (Dompeipen, 2016)	27
3.4.3 Ash Content Analysis (AOAC, 2005) with modification	27
3.4.4 Protein Content Analysis (Nielsen, 2009)	28
3.4.5 Degree of Acetylation of Chitin Powder	29
3.4.6 Determination of Bacteria Morphology (Becerra, <i>et al.</i> , 2012).....	30
3.4.7 Chitinolytic Index	30
3.4.8 Cell Counting Using Hemocytometer.....	31
3.4.9 Analysis of Glucosamine	31
3.4.9.1 Preparation of Glucosamine Standard (Saskiawan, <i>et al.</i> , 2011).....	31
3.4.9.2 Quantification of glucosamine (Saskiawan, <i>et al.</i> , 2011) with modification	32
CHAPTER IV RESULTS AND DISCUSSION.....	33
4.1 Analysis of Shrimp Shell Powder.....	33
4.2 Analysis of Chitin Powder.....	34
4.3 Identification of <i>Serratia marcescens</i>	37
4.3.1 Morphology Determination of <i>Serratia marcescens</i>	37
4.3.2 Bacteria Cell Counting.....	38
4.3.3 Chitinolytic Index	39
4.4 First Stage Research	40
4.4.1 Effects of Temperature on N-acetyl Glucosamine Production	40
4.5 Second Stage Research.....	42
4.5.1 Effects of pH and Fermentation Period to Glucosamine Production	42

CHAPTER V CONCLUSIONS AND SUGGESTIONS	47
5.1 Conclusions	47
5.2 Suggestions.....	47
BIBLIOGRAPHY	49
APPENDICES.....	53

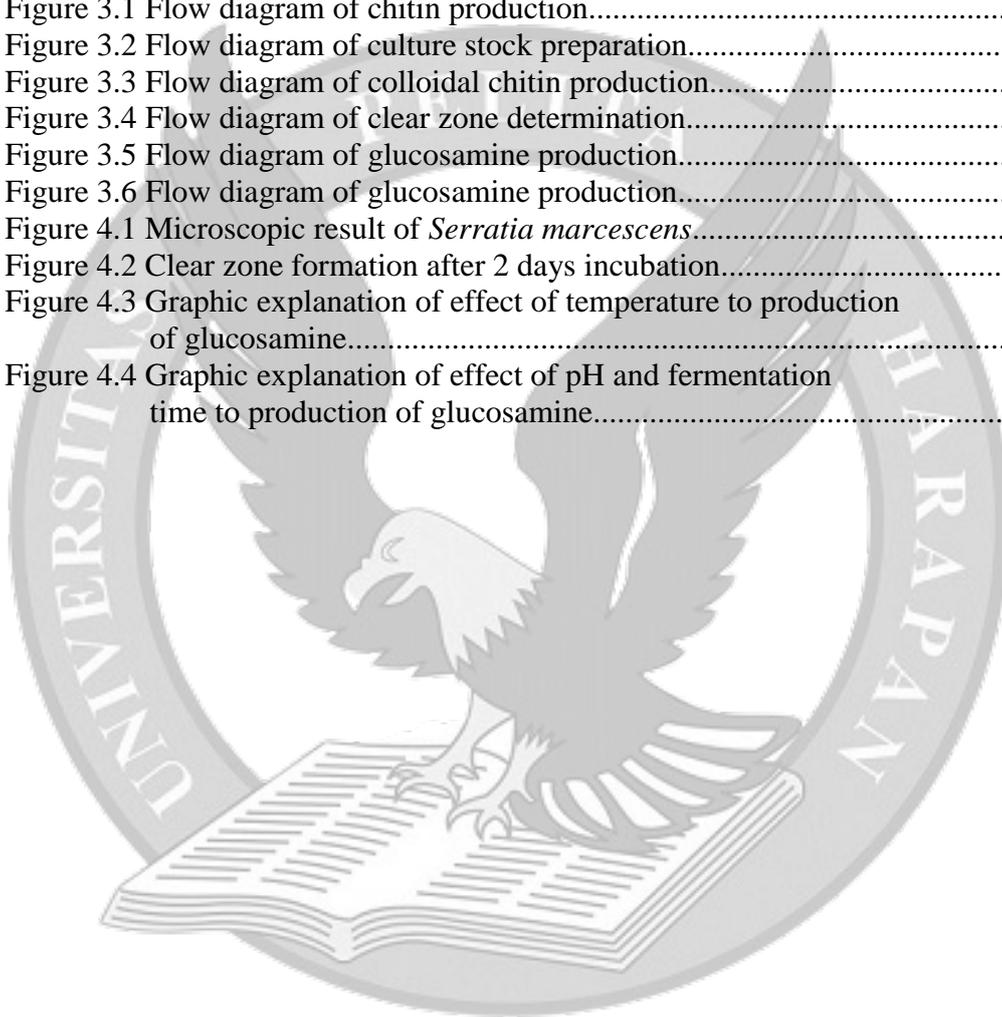

LIST OF TABLES

	page
Table 3.1 Formula for making selective media.....	21
Table 3.2 Formula for making chitin media.....	22
Table 3.3 Research statistical design stage I.....	24
Table 3.4 Research statistical design stage II.....	25
Table 4.1 Content analysis of shrimp shell.....	33
Table 4.2 Content analysis of chitin powder.....	35
Table 4.3 Chitinolytic Index of <i>Serratia marcescens</i>	39

LIST OF FIGURES

	page
Figure 2.1 <i>Penaeus monodon</i>	6
Figure 2.2 External structure of <i>Penaeus monodon</i>	6
Figure 2.3 Structure of glucosamine, glucosamine hydrochloride and sulphate.....	11
Figure 2.4 Growth curve of <i>Serratia marcescens</i>	14
Figure 3.1 Flow diagram of chitin production.....	18
Figure 3.2 Flow diagram of culture stock preparation.....	19
Figure 3.3 Flow diagram of colloidal chitin production.....	20
Figure 3.4 Flow diagram of clear zone determination.....	21
Figure 3.5 Flow diagram of glucosamine production.....	22
Figure 3.6 Flow diagram of glucosamine production.....	23
Figure 4.1 Microscopic result of <i>Serratia marcescens</i>	38
Figure 4.2 Clear zone formation after 2 days incubation.....	39
Figure 4.3 Graphic explanation of effect of temperature to production of glucosamine.....	41
Figure 4.4 Graphic explanation of effect of pH and fermentation time to production of glucosamine.....	43

LIST OF APPENDICES

	page
Appendix A	
Moisture Content Analysis.....	A-1
Appendix B	
Ash Content Analysis.....	B-1
Appendix C	
Protein Content Analysis.....	C-1
Appendix D	
Yield Analysis.....	D-1
Appendix E	
Degree of Acetylation.....	E-1
Appendix F	
Cell Counting Hemocytometer.....	F-1
Appendix G	
Chitinolytic Index.....	G-1
Appendix H	
Standard Curve.....	H-1
Appendix I	
Result of Stage 1 – Quantification of Glucosamine.....	I-1
Appendix J	
Statistical Results of Glucosamine Produced by Fermentation in Varying Temperature.....	J-1
Appendix K	
Glucosamine Quantification - Result of Stage 2.....	K-1
Statistical Results of Glucosamine Produced by Fermentation in Varying pH and Fermentation Period.....	K-7
Post-Hoc Test Results of Glucosamine Produced by Fermentation in Varying pH and Fermentation Period.....	K-9
Appendix L	
Interaction Result Between pH and Days of Fermentation.....	L-1

Appendix M
 Glucosamine Yield Determination.....M-1
Appendix N
 Authenticity Statement from LIPI of *Penaeus monodon*.....N-1
