

ACKNOWLEDGEMENTS

Thank to Jesus Christ for His blessing to the author during the completion of this thesis, titled “IMMOBILIZATION OF SEMI-PURE INTRACELLULAR CHITINASE OBTAINED FROM *Providencia stuartii* IN CALCIUM ALGINATE AND ITS APPLICATION FOR N-ACETYLGLUCOSAMINE PRODUCTION”, punctually, starting from the making of the proposal, throughout the conduct research, and up till the writing of the report.

Bearing in mind, the author would like to express his deepest gratitude for the people who help this internship program as well as the internship report completion. The author would like to thank:

- 1) Ms. Yuniwaty Halim, M.Sc., as the author’s thesis supervisor, who has always patiently given guidance, counsel, director, and enlightenment starting from the making of the proposal up until the completion of this report.
- 2) Mr. Eric Jobiliong, Ph.D. as the Dean of the Faculty of Science and Technology.
- 3) Mrs. Dela Rosa, S.Si., M.M., M.Sc.Apt. as the Vice Dean of the Faculty of Science and Technology
- 4) Mr. Laurence, M.T., as the Director of Administration and Student Affair of Faculty of Science and Technology.
- 5) Mr. Ir. W. Donald Pokatong, M.Sc., Ph.D., as Head of Food Technology Study Program and examiner during thesis defense for the time of supporting the preparation, giving advice, suggestions, and for the revision of the thesis.
- 6) Dr. Ir. Hardoko, M.S. and Ms. Ratna Handayani, MP, as the lecturers of Food Technology Study Program who have given their counsel, guidance and insight regarding the research on N-acetylglucosamine.
- 7) Beloved parents and relatives who have given their support and prayers to the author.
- 8) Dr. Adolf J. N. Parhusip as the head of the microbiology lab who has permitted the author to operate in the laboratory and given advice and suggestions.

- 9) Mrs. Natania, M.Eng as the head of the food processing lab and member of the examination committee, who has given the author permission to operate in the laboratory, help and advice.
- 10) Mr. Adi, Mr. Yosafat Rudju, Mr. Darius and Mr. Adzie as the laborants, who has helped and supported the author in the laboratory.
- 11) All lecturers and staffs from the Food Technology Program of Universitas Pelita Harapan who have helped the author in the making of this thesis.
- 12) “Glucosamine Family” Freddy Chayadi, Fransiska, Cynthia Saputra, Bob Lukitono, Steven Lemena C., Desi Handayani, Bella Cerelia, Christabella Zsa Zsa, Gabriella Prameswari, Karen Lavenia, Elissya Chang, Natasha Vania, Andre Maedy Limenta, Glen Meyer.
- 13) Reynald Livano, Reyner Riggo, Hendi Candra, Alexander Kevin, Kevin Christonar, Vino Arianto, Amelia Devina, Brigitta Bella, Caroline, Johan Honga, Steven Wielard, Veliana Angel, Carinna Ruth, Felicia Agustin, Livia Katherina and other friends who have helped, supported and assisted the author in the lab.
- 14) All members of Food Technology Study Program in UPH who partook the internship program together this year.
- 15) All friends and relatives who are not yet mentioned but also supported the author during the internship and completion of the report.

The author realized that this report is still far from perfect. Therefore, the author would like to apologize if there were any mistake made in the report. The author also hopes that the report can be beneficial for those who read it in the future.

Tangerang, February 2019

COVER	
STATEMENT OF THESIS AUTHENTICITY	
APPROVAL BY THESIS SUPERVISOR	
APPROVAL BY THESIS EXAMINATION COMMITTEE	
ABSTRACT.....	v
<i>ABSTRAK</i>	vi
ACKNOWLEDGEMENTS.....	vii
TABLE OF CONTENTS.....	ix
LIST OF FIGURES.....	xiii
LIST OF TABLES.....	xiv
LIST OF APPENDICES.....	xv
CHAPTER I INTRODUCTION.....	1
1.1 Background.....	1
1.2 Research Problem.....	3
1.3 Objectives.....	4
1.3.1 General Objectives.....	4
1.3.2 Specific Objectives.....	4
CHAPTER II LITERATURE REVIEW.....	5
2.1 Tiger Shrimp.....	5
2.2 Chitin.....	6
2.2.1 Chitin Isolation.....	8
2.2.1.1 Demineralization.....	8
2.2.1.2 Deproteinization.....	8
2.3 Glucosamine.....	8
2.4 Chitinolytic Microorganisms.....	9

3.3.1.1 Standard Curve Preparation	23
3.3.1.2 N-acetylglucosamine Quantification.....	24
3.3.2 Moisture Content Analysis (AOAC, 2005).....	24
3.3.3 Ash Content (AOAC, 2005).....	24
3.3.4 Protein Content (Yuan, <i>et al.</i> , 2011)	25
3.3.5 Bacteria Cell Count (Dubey and Maheswari, 2012)	26
3.3.6 Morphology Identification (Hidayat, 2011).....	26
3.3.7 Degree of Deacetylation (Czechowska-Biskup, <i>et al.</i> , 2012)	27
3.3.8 Yield Analysis (Dompeipen, <i>et al.</i> , 2016)	27
3.3.9 Enzyme Activity Measurement (Rahmansyah and Sudiana, 2003)	28
3.4 Experimental Design	28
3.4.1 Second Stage Research	28
CHAPTER IV RESULTS AND DISCUSSION.....	30
4.1 Characteristics of Shrimp Shells Powder and Isolated Chitin.....	30
4.1.1 Characteristics of Shrimp Shells Powder.....	30
4.1.2 Characteristics of Isolated Chitin.....	32
4.2 Characterization of <i>Providencia stuartii</i>	34
4.2.1 Morphology Observation	34
4.2.2 Bacteria Cell Count.....	35
4.2.3 Semi-Pure Intracellular Chitinase Activity	36
4.3 Immobilization of Chitinase in Sodium Alginate.....	37
4.4 The Effect of Fermentation Cycles on N-acetylglucosamine Production	38
CHAPTER V CONCLUSIONS AND SUGGESTIONS.....	42
5.1 Conclusions	42

5.2 Suggestions.....	42
BIBLIOGRAPHY.....	44
APPENDICES	50

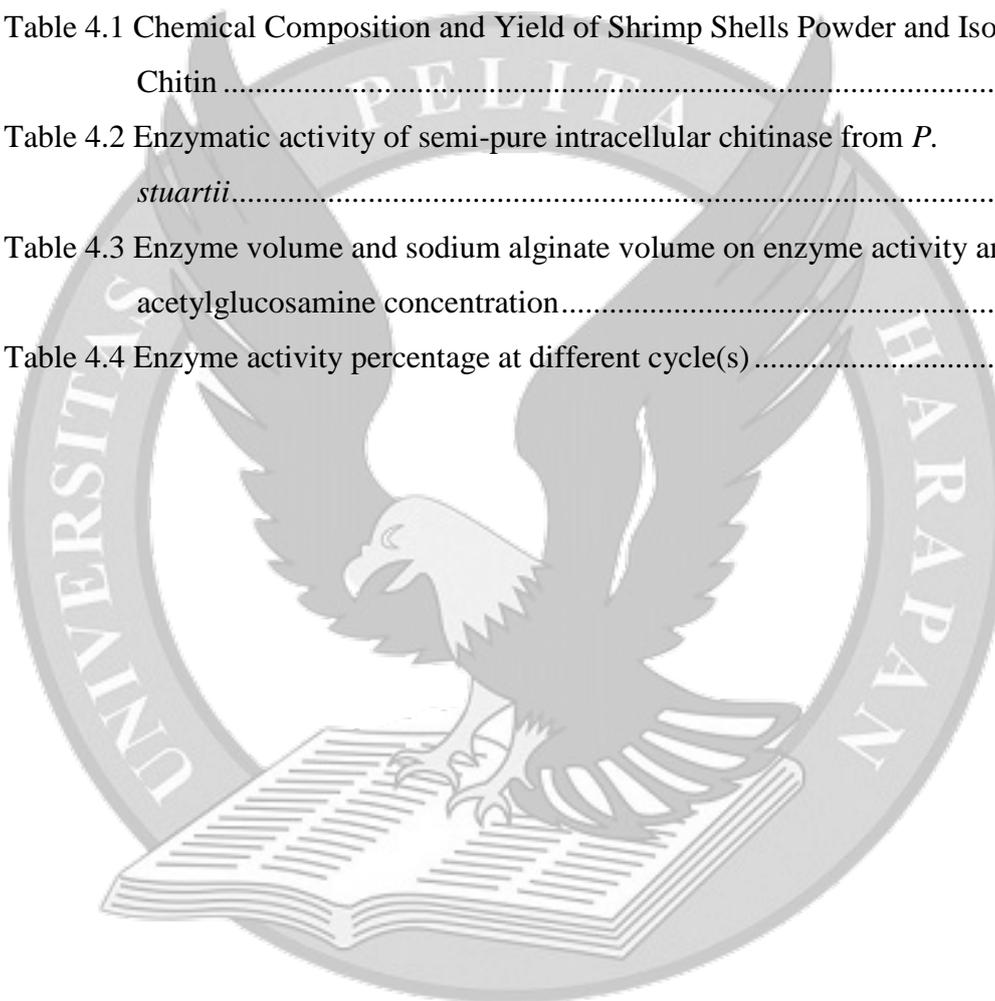

LIST OF FIGURES

	page
Figure 2.1 External anatomy of <i>P. monodon</i>	6
Figure 2.2 Chemical Structure of chitin (a) and chitosan (b).....	7
Figure 2.3 Structure of Glucosamine (left) and N-acetylglucosamine (right)	9
Figure 3.1 Flow diagram of substrate preparation from <i>P. monodon</i> shells	17
Figure 3.2 Flow diagram of stock culture and working culture preparation.....	18
Figure 3.4 Flow diagram of chitinase production	19
Figure 3.5 Flow diagram of semi-pure intracellular chitinase isolation	20
Figure 3.6 Flow diagram of chitinase immobilization	21
Figure 3.7 Immobilization of chitinase in sodium alginate	22
Figure 3.8 Determination of optimum fermentation cycles flow diagram.....	23
Figure 4.1. Morphology of <i>Providencia stuartii</i> obtained from this study.....	35
Figure 4.2 Morphology of Gram negative bacteria by Brooks, <i>et al.</i> (2012) (left) and morphology of <i>Providencia stuartii</i> by Macinga and Rather (1996) (right).....	35
Figure 4.3. Effect of fermentation cycles on enzyme activity	39
Figure 4.4. Effect of fermentation cycles on NAG concentration obtained.....	40

LIST OF TABLES

	page
Table 3.1 Minerals used for production of chitinase.....	19
Table 3.2 Statistical design of the second stage research.....	29
Table 4.1 Chemical Composition and Yield of Shrimp Shells Powder and Isolated Chitin	30
Table 4.2 Enzymatic activity of semi-pure intracellular chitinase from <i>P.</i> <i>stuartii</i>	36
Table 4.3 Enzyme volume and sodium alginate volume on enzyme activity and N- acetylglucosamine concentration.....	37
Table 4.4 Enzyme activity percentage at different cycle(s).....	40

LIST OF APPENDICES

	page
Appendix A. Shrimp Identification.....	A
Appendix B. Moisture Content of Shrimp Shells Powder and Isolate Chitin Analysis Results	B
Appendix C. Ash Content of Shrimp Shells Powder and Isolate Chitin Analysis Results	C
Appendix D. Protein Content of Shrimp Shells Powder and Isolate Chitin Analysis Results	D
Appendix E. Degree of Deacetylation of Isolated Chitin	E
Appendix F. Yield of Shrimp Shells Powder and Isolate Chitin Analysis Results	F
Appendix G. Bacteria count using Hemacytometer.....	G
Appendix H. Certificate of Analysis of Sodium Alginate	H
Appendix I. N-acetylglucosamine Standard Curve.....	I
Appendix J. Enzyme Activity of Intracellular Semi Pure Chitinase.....	J
Appendix K. Second Stage Research – N-acetylglucosamine and Enzyme Activity Quantification.....	K
K-1 Statistical Results of NAG Concentrations Produced by Fermentation at Different Cycles (One-Way ANOVA)	L
K-2 Post-Hoc Test of NAG Concentration Produced by Fermentation at Different Cycles	L
K-3 Statistical Results of Enzyme Activity of Chitinase at Different Cycles (One-Way ANOVA).....	L
K-4 Post-Hoc Test of Enzyme Activity of Chitinase at Different Cycles Produced by Fermentation at Different Cycle.....	L
K-5 Enzyme Activity Percentage at Different Cycles.....	L
Appendix L. Research Documentation	M
