

ACKNOWLEDGEMENTS

Praise and gratitude to God for His blessings in accomplished this thesis entitled “PHYSICOCHEMICAL CHARACTERISTICS OF ACETYLATED BOGOR TARO (*Colocasia esculenta* L. SCHOTT) STARCH” that was written as partial fulfillment of the academic requirements to obtain *Sarjana Teknologi Pertanian Sastra Satu* Food Technology, Universitas Pelita Harapan.

The author realized without the guidance, help, prayers, and supports from many parties, this thesis will not be completed in its time. Therefore, the author would like to express gratitude and appreciation to those parties, including:

1. Eric Jobiliong, Ph.D., as the Dean of Faculty Science and Technology UPH.
2. Dela Rosa, S.Si, M.M., M.Sc., Apt., as Vice Dean of Faculty of Science and Technology UPH.
3. Laurence, M.T., as the Director Administration of Student Affair of Faculty of Science and Technology UPH.
4. Ir. W. Donald R. Pokatong, M.Sc., Ph.D., as the Head of Food Technology Study Program UPH and Academic Supervisor, for the support until thesis was completed.
5. Ratna Handayani, MP as the Vice Head of Food Technology Study Program UPH.
6. Dr.-Ing. Azis Boing Sitanggang S.TP, M.Sc., as Supervisor who has given his time by guiding, teaching, advising, and motivating the writer until this thesis was fully completed.

7. Wenny S.L. Sinaga, M.Si., as Co-Supervisor, for the guidance, time, and motivation during study period and the process of writing this thesis.
8. Dr. Adolf J. N. Parhusip, M.Si., and Yuniwaty Halim, M.Sc., as the thesis examiner, for the guidance, time and suggestions to complete the thesis.
9. Dr. Adolf J. N. Parhusip, M.Si., Yuniwaty Halim, M.Sc., Tagor M. Siregar, M.Si., and Natania, M.Eng., as the Head of Laboratories, where the author conducted the final project.
10. Mr. Adzie, Mr. Christopher, STP, Mr. Adhi, Mr. Darius, and Mr. Yosafat Rudju, for helping the author at laboratories to complete the final project .
11. Father, mother and brother who have always given their endless supports and prayers to the author.
12. Angeline Vania, Grace Josephine, Margareta Wijaya, Yokhebed Fransiska, Patricia Sani and Handy Gosun as team in the same supervisor which have given their support and help during the process of thesis completion.
13. Fransiska, Lydia Senjaya Leo, Marsela Elvina, Natasha Collhins, and Sherly for the supports, helps and time to the author.
14. Claretta Fortunatan, Jessica Wilona, Ingrid Samrat, Arnie, Mami Ningtyas, Therecia Lee and Valencia for the mental supports, prayers and motivation for the author to complete the thesis.
15. All of people who cannot be mentioned one by one.

Author realized that this report still far from perfection and might have some mistakes. Therefore, the author would like to apologize for instance and sincerely accept any suggestions that was given to the author about this report. Author also

hopes that this report can be useful for the readers and those who needed. Thank You.

STATEMENT OF THESIS AUTHENTICITY	
APPROVAL BY THESIS SUPERVISORS	
APPROVAL BY THESIS EXAMINATION COMMITTEE	
ABSTRACT	
ACKNOWLEDGEMENT.....	vi
TABLE OF CONTENT.....	ix
LIST OF TABLE.....	xii
LIST OF FIGURE.....	xiii
CHAPTER I INTRODUCTION	
1.1 Background	1
1.2 Research Problem.....	2
1.3 Objectives.....	3
1.3.1 General Objective.....	3
1.3.2 Specific Objectives.....	3
CHAPTER II LITERATURE REVIEW	
2.1 Bogor Taro (<i>Colocasia esculenta</i> L. Schott).....	4
2.2 Starch.....	5
2.2.1 Modified Starch	6
2.2.1.1 Chemically Modified Starch.....	6
2.2.1.1.2 Acetylation.....	7
2.2.2 Resistant Starch	8
2.3 Alpha Amylase	10
CHAPTER III METHODOLOGY	
3.1 Materials and Equipment.....	11
3.2 Research Method	11
3.2.1 Preliminary Step	12

	page
3.2.1.1 Starch Extraction	12
3.2.2 Research Stage I	13
3.2.3 Research Stage II	14
3.2.3 Method of Analysis	16
3.2.3.1 Acetylation.....	16
3.2.3.2 Determination of Acetyl Percentage (Ac%) and Degree of Substitution (DS)	17
3.2.4 Physicochemical Characteristics of Starch.....	18
3.2.4.1 Fourier Transform Infrared (FTIR) Spectroscopy	18
3.2.4.2 Amylose and Amylopectin Content Determination	18
3.2.4.2.1 Determination of Amylose Standard Curve	18
3.2.4.2.2 Determination of Amylose Content.....	19
3.2.4.3 Solubility and Swelling Power	19
3.2.4.4 Viscosity	20
3.2.4.5 Color Analysis	20
3.2.4.6 Starch Percentage by Direct Acid Hydrolysis Method.....	20
3.2.4.7 Resistant Starch Determination by Multi-enzyme Method.....	21
3.2.4.8 Proximate Analysis.....	21
3.2.5 Statistical Analysis.....	23
3.3 Experimental Design	23
3.3.1 Research Stage I	24
3.3.2 Research Stage II	25
3.3.3 Physicochemical Characteristics	25

CHAPTER IV RESULTS AND DISCUSSION

4.1 Starch Content	28
4.2. Effect of Concentration in Acetylation.....	28
4.2.1.1 Acetyl Percentage.....	28
4.2.1.2 Degree of Substitution.....	29
4.2.1.3 Viscosity	30

	page
4.2.1.4 Color	32
4.3 Effect of Temperature and Time in Acetylation.....	35
4.3.1.1 Acetyl Percentage.....	35
4.3.1.2 Degree of Substitution.....	37
4.3.1.3 Viscosity.....	39
4.3.1.4 Color.....	40
4.4 Physicochemical Characteristics of Acetylated Starch	43
4.4.1 Resistant Starch	43
4.4.2 Starch Percentage	44
4.4.3 Amylose and Amylopectin Content	45
4.4.4 Solubility and Swelling Power	47
4.4.5 FTIR (Fourier Transform Infrared Spectroscopy	48
4.4.6 Proximate Analysis.....	49
CHAPTER V CONCLUSIONS AND SUGGESTIONS	
5.1 Conclusions	52
5.2 Suggestions.....	52
BIBLIOGRAPHY.....	54
APPENDICES	54
