

## ACKNOWLEDGEMENTS

Thanks to The Almighty God for His endless blessing to the author during the whole research and thesis completion period. This thesis is entitled as “OPTIMUM CONDITION OF CRUDE AND SEMI PURE EXTRACELLULAR CHITINASE ENZYME FROM *Providencia stuartii* FOR THE PRODUCTION OF N-ACETYLGUCOSAMINE” and written as partial fulfillment for obtaining the bachelor degree of *Sarjana Teknologi Pertanian Strata Satu* from Universitas Pelita Harapan.

The author realizes that this thesis would not be completed without the help of many parties. Thus, the author would like to express the gratitude and appreciation to those who had helped, guided and supported author, including:

1. Mr. Eric Jobiliong, Ph.D., as Dean of Faculty of Science and Technology.
2. Mrs. Dela Rosa, M.M., M.Sc., Apt., as acting Vice Dean of Faculty of Science and Technology.
3. Mr. Laurence, S.T., M.T., as Director of Finance and Student Affair of Faculty of Science and Technology.
4. Mr. Ir. W. Donald R. Pokatong, M.Sc., Ph.D., as the Head of Food Technology Study Program.
5. Ms. Ratna Handayani, MP., as the Vice Head of Food Technology Study Program.
6. Ms. Yuniwaty Halim, M.Sc. as the thesis supervisor for the guidance, support and suggestions given to the author throughout the research proposal, during the research process and thesis completion.
7. Mr. Dr. Ir. Hardoko, MS. and Ms. Ratna Handayani, MP., as the lecturers of Food Technology Study Program who have given their counsel, guidance and insight regarding the research on glucosamine
8. Mr. Dr. Tagor M. Siregar, MS., Mr. Dr. Adolf J. N. Parhusip, M.Si., Mrs. Natania, M.Eng. and Ms. Yuniwaty Halim, M.Sc., as the Head of Chemistry, Microbiology, Food Processing, Quality Control and Research Laboratory who had given permission to conduct the research in the laboratories.

9. Mr. Darius, Mr. Yosafat, Mr. Adi and Mr. Adzie for the assistance and information given during the research in laboratory.
10. Mr. Dr. Adolf J. N. Parhusip, M.Si. and Mrs. Natania, M.Eng., as the member of the examination committee during the thesis defense who had given advice and suggestions to the author.
11. All lecturers and staffs of Food Technology Department of Universitas Pelita Harapan for the knowledge and help given.
12. Beloved family for the help and support in all forms so that the author could completed this thesis report.
13. Dennis Tan, for the never-ending support and motivations given to the author under all circumstances.
14. Fransiska Rusli, as a friend and also a partner who shared togetherness and kindness with the author so that this thesis could be finished in time.
15. All of glucosamine colleagues for the solidarity, understanding and problem solving that have been faced together.
16. Angeline Vania, Frieska Darwis, Gabriella Permata Heru, Naomi Nerisha and Nathania Sofie who always supported and gave positive motivations to the author since day one.
17. All other parties who helped the author and cannot be mentioned one by one.

The author completely realizes that this thesis report is still far from perfect. Thus, the author would like to apologize for any mistakes occurred. Author will also accept any criticisms and suggestions in order to gain some improvement in the future. Lastly, the author also hopes that this report would be useful for the readers.

Tangerang, January 2019

(Cynthia)

## TABLE OF CONTENTS

	page
COVER	
STATEMENT OF THESIS AUTHENTICITY	
APPROVAL BY THESIS SUPERVISOR	
APPROVAL BY THESIS EXAMINATION COMMITTEE	
ABSTRACT .....	v
<i>ABSTRAK</i> .....	vi
ACKNOWLEDGEMENTS .....	vii
TABLE OF CONTENTS .....	ix
LIST OF FIGURES .....	xi
LIST OF TABLES .....	xii
LIST OF APPENDICES .....	xiii
CHAPTER I INTRODUCTION	
1.1 Background .....	1
1.2 Research Problem .....	3
1.3 Research Objectives .....	4
1.3.1 General Objectives .....	4
1.3.2 Specific Objectives .....	4
CHAPTER II LITERATURE REVIEW	
2.1 Tiger Shrimp .....	6
2.2 Chitin .....	7
2.2.1 Degree of Deacetylation .....	9
2.3 Glucosamine .....	10
2.4 Enzyme .....	11
2.4.1 Extracellular and Intracellular Enzyme .....	12
2.4.2 Purification of Enzymes .....	13
2.4.3 Chitinase Enzyme .....	13
2.5 Fermentation .....	15
2.6 Chitinolytic Microorganisms .....	15
2.6.1 <i>Providencia stuartii</i> .....	16
CHAPTER III RESEARCH METHODOLOGY	
3.1 Materials and Equipment .....	18
3.2 Research Method .....	19
3.2.1 First Stage Research .....	20
3.2.1.1 Preparation of Isolated Chitin (Varuna, <i>et al.</i> , 2017) .....	20
3.2.1.2 Preparation of Stock and Working Culture (Saskiawan and Handayani, 2011) .....	21
3.2.1.3 Extracellular Enzyme Extraction from <i>Providencia stuartii</i> (Narendrakumar, <i>et al.</i> , 2015) .....	23
3.2.1.4 Optimum pH Determination of the Extracellular Enzyme (Cheba, <i>et al.</i> , 2016) .....	24

3.2.1.5 Optimum Temperature Determination of the Extracellular Enzyme (Cheba, <i>et al.</i> , 2016) .....	25
3.2.2 Second Stage Research (Narendrakumar, <i>et al.</i> , 2015).....	26
3.3 Experimental Design .....	27
3.3.1 First Stage Research.....	30
3.3.2 Second Stage Research.....	31
3.4 Method of Analysis .....	30
3.4.1 Bacteria Identification and Cell Counting (Hui, 2016).....	30
3.4.2 Moisture Content (AOAC, 2005) .....	31
3.4.3 Ash Content (AOAC, 2005) .....	31
3.4.4 Protein Content (Nielsen, 2010) .....	32
3.4.5 Degree of Deacetylation (Benhabiles, <i>et al.</i> , 2012) .....	33
3.4.6 Yield of Sample (Dompeipen, <i>et al.</i> , 2016).....	33
3.4.7 Chitinase Activity (Zbircea, <i>et al.</i> , 2016).....	33
3.4.8 N-Acetylglucosamine Measurement (Ramansyah and Sudiana, 2003) .....	34
CHAPTER IV RESULTS AND DISCUSSION	
4.1 Shrimp Identification.....	36
4.2 Shrimp Shells Powder Characteristics.....	36
4.3 Isolated Chitin Characteristics .....	38
4.4 Identification of <i>Providencia stuartii</i> Bacteria .....	41
4.4.1 Morphology .....	41
4.4.2 Cell Counting.....	43
4.5 First Stage Research .....	43
4.5.1 Effect of pH on Enzyme Activity .....	43
4.5.1.1 Crude Extracellular Chitinase Enzyme.....	44
4.5.1.2 Semi Pure Extracellular Chitinase Enzyme .....	45
4.5.2 Effect of Temperature on Enzyme Activity .....	47
4.5.2.1 Crude Extracellular Chitinase Enzyme .....	48
4.5.2.2 Semi Pure Extracellular Chitinase Enzyme .....	49
4.6 Second Stage Research .....	51
4.6.1 Crude Extracellular Chitinase Enzyme.....	52
4.6.2 Semi Pure Extracellular Chitinase Enzyme.....	55
4.7 Result Comparison of Crude and Semi Pure Extracellular Enzyme.....	56
CHAPTER V CONCLUSIONS AND SUGGESTIONS	
5.1 Conclusions.....	58
5.2 Suggestions .....	59
BIBLIOGRAPHY.....	60
APPENDICES	

## LIST OF FIGURES

	page
Figure 2.1 The morphology of <i>Penaeus monodon</i> .....	7
Figure 2.2 Structure of chitin .....	8
Figure 2.3 Production step of chitin and chitosan obtained from shrimp shells .....	9
Figure 2.4 Chemical structure of glucosamine and N-acetylglucosamine.....	10
Figure 2.5 Classification of chitinases .....	14
Figure 3.1 Flow diagram of the whole research procedure.....	19
Figure 3.2 Flow diagram of isolated chitin prepared from <i>P. monodon shell</i> .....	20
Figure 3.3 Flow diagram of stock and working culture preparation .....	22
Figure 3.4 Flow diagram of extracellular enzyme extraction .....	23
Figure 3.5 Flow diagram of the optimum pH determination .....	24
Figure 3.6 Flow diagram of the optimum temperature determination.....	25

Figure 4.3 Effect of pH on crude extracellular chitinase enzyme activity.....	44
Figure 4.4 Effect of pH on semi pure extracellular chitinase enzyme activity .....	46
Figure 4.5 Effect of temperature on crude extracellular chitinase enzyme activity .....	48
Figure 4.6 Effect of temperature on semi pure extracellular chitinase enzyme activity.....	50
Figure 4.7 Effect of substrate concentration and incubation time towards NAG concentration .....	52

## LIST OF TABLES

	page
Table 2.1 Comparison between extracellular and intracellular enzyme.....	12
Table 3.1 Selective media composition .....	23
Table 3.2 Statistical design of pH factor.....	27
Table 3.3 Statistical design of temperature factor.....	27
Table 3.4 Statistical design of the second stage research .....	28
Table 4.1 Analyses results of the shrimp shells powder.....	36
Table 4.2 Analyses results of isolated chitin.....	38

## LIST OF APPENDICES

	page
Appendix A.	
Taxonomic Results of Shrimp Identification .....	A-1
Appendix B.	
Documentation of Shrimp Shells Powder Preparation .....	B-1
Appendix C. Analyses Data of Shrimp Shells Powder	
C-1. Yield .....	C-1
C-2. Moisture Content .....	C-1
C-3. Ash Content .....	C-1
C-4. Protein Content .....	C-2
Appendix D.	
Preparation of Isolated Chitin.....	D-1
Appendix E. Analyses Data of Isolated Chitin	
E-1. Moisture Content.....	E-1
E-2. Ash Content .....	E-1
E-3. Protein Content.....	E-2
E-4. Yield .....	E-2
E-5. Degree of Deacetylation .....	E-3
Appendix F.	
<i>Providencia stuartii</i> Cell Counting.....	F-1
Appendix G.	
Standard Curve of N-acetylglucosamine .....	G-1
Appendix H. Data Obtained from Fermentation with Various pH	
H-1. Chitinase Activity Obtained using Crude Enzyme .....	H-1
H-2. Statistical Result of Chitinase Activity using Crude Enzyme .....	H-2
H-3. Chitinase Activity Obtained using Semi Pure Enzyme.....	H-3
H-4. Statistical Result of Chitinase Activity using Semi Pure Enzyme.....	H-4
Appendix I. Data Obtained from Fermentation with Various Temperature	
I-1. Chitinase Activity Obtained using Crude Enzyme.....	I-1
I-2. Statistical Result of Chitinase Activity using Crude Enzyme.....	I-2
I-3. Chitinase Activity Obtained using Semi Pure Enzyme.....	I-3
I-4. Statistical Result of Chitinase Activity using Semi Pure Enzyme.....	I-4
Appendix J. Data Obtained from Fermentation with Various Substrate Concentration and Incubation Time	
J-1. NAG Obtained using Crude Enzyme .....	J-1
J-2. Statistical Result of NAG Concentration using Crude Enzyme .....	J-5
J-3. NAG Obtained using Semi Pure Enzyme.....	J-8
J-4. Statistical Result of NAG Concentration using Semi Pure Enzyme....	J-12
Appendix K.	
Fermentation Process of First Stage Research .....	K-1
Appendix L.	
Fermentation Process of Second Stage Research .....	L-1
