

ACKNOWLEDGEMENTS

Praise the Lord Jesus Christ for His blessing and grace that author is able to complete this thesis research. This thesis with title “APPLICATION OF DRAGON FRUIT (*Hylocereus polyrhizus*) PECTIN AND CASSAVA STARCH IN EDIBLE COATING FORMULATION TO EXTEND STORAGE TIME OF FRESH-CUT APPLES (*Malus sylvestris*)” is written to fulfill the academic requirement of Food Technology Study Program of Universitas Pelita Harapan to obtain the degree of *Sarjana Teknologi Pertanian Strata Satu*, Food Technology Study Program, Faculty of Science and Technology, Universitas Pelita Harapan, Tangerang.

The author realizes that the completion of this thesis could not have been possible without the guidance, assistance and support from other people. Therefore, the author would like to express a sincere and deepest gratitude to those who have helped and supported the author throughout this thesis, including:

1. Ms. Yuniwaty Halim, M.Sc., as the Head of Quality Control and Research Laboratories, thesis examiner and as the thesis supervisor for the help, advices, time and guidance before, during and after the thesis research until the completion of the thesis report.
2. Mr. Eric Jobiliong, Ph.D., as the Dean of Faculty of Science and Technology.
3. Ms. Dela Rosa, M.M., M.Sc., Apt., as the Vice Dean of Faculty of Science and Technology.
4. Mr. Laurence, S.T., M.T., as the Director of Administration and Student Affair of Faculty of Science and Technology.
5. Mr. Ir. W. Donald R. Pokatong, M. Sc., Ph. D., as the Head of Food Technology Study Program and thesis examiner who has helped and support the author during the revision and completion of this thesis.
6. Ms. Ratna Handayani, MP, as the Deputy Head of Food Technology Study Program, who has supported the author throughout this thesis project.
7. Ms. Nathania, M.Eng., Mr. Dr. Ir. Adolf J. N. Parhusip, M. Si., and Mr. Dr. Tagor M. Siregar, as Heads of Food Processing and thesis examiner,

Microbiology and Chemistry Laboratories, respectively for the help and support given to the author.

8. Mr. Yosafat Rudju, Mr. Darius, Mr. Adi and Mr. Aji, as the laboratory staff of Universitas Pelita Harapan, who have helped and assist the author during the thesis research.
9. All other lecturers, lecturers' assistant and staffs in Food Technology Study Program for the help, guidance, and support given to the author during this research.
10. Beloved family, including father (Chrisdianto Rahardjo), mother (Inne Effendi, brother (Steven Octavian), sister (Jessica Angelina) and other family member (Gabriella Tiara Natasha, Susan Wibawati and Anis Djojotirto), for the help, support, and endless love for the author.
11. Carinna Ruth and Livia Katherina as author's thesis partners for their never-ending guidance, assistance, help, support, patience and love during this thesis research.
12. Joanina, Gracia Angelina, Tiffany Nathalie, Jennifer Alvionita and Celine Tanuwijaya as the author best friends for their patience, love, support, help and advice throughout the author study in Universitas Pelita Harapan.
13. Fransiska Rusli, Cynthia Saputra, Dustin Hendarlim, Freddy Chayadi as friends under the same supervision for their love and support for the author.
14. Friends from Food Technology 2015 Class C of Universitas Pelita Harapan, especially Nabillah Chanan Din, Jesseline Kuo, Rheza Theodorus and Liana Oktavia for their help, guidance and support for the author.
15. Friends from Food Technology Study Program Batch 2015 that cannot be mentioned one-by-one, for their endless support, guidance, advices and thoughtfulness given to the author.
16. Other friends, close relatives, and colleagues who has not yet to be mentioned by the author but have supported the author from the beginning of this thesis research until the completion of the report.

The author is aware that this thesis report is far from perfect and still requires further improvement. Therefore, the author is welcome to any suggestion and criticism the readers to improve this report. At last, the author hope that the reader will find this thesis report to be useful and informative.

Tangerang, February 2019

TABLE OF CONTENTS.....	x
LIST OF FIGURES.....	xiii
LIST OF TABLES.....	xv
LIST OF APPENDICES.....	xvi
CHAPTER I INTRODUCTION.....	1
1.1 Background.....	1
1.2 Research Problem.....	3
1.3 Objectives.....	4
1.3.1 General Objectives.....	4
1.3.2 Specific Objectives.....	4
CHAPTER II LITERATURE REVIEW.....	5
2.1 Dragon Fruit.....	5
2.1.1 Dragon Fruit Peel.....	6
2.2 Edible Coating and Film.....	7
2.2.1 Edible Film.....	8
2.2.2 Edible Coating.....	8
2.3 Components of Edible Coating and Film.....	9
2.3.1 Pectin.....	9
2.3.1.1 Type of Pectin.....	10
2.3.1.2 Pectin Extraction.....	11
2.3.2 Starch.....	12
2.3.3 Plasticizers.....	13
2.4 Characteristics of Edible Film and Coating.....	14
2.5 Apples.....	15
CHAPTER III RESEARCH METHODOLOGY.....	17
3.1 Materials and Equipment.....	17
3.2 Research Method.....	18
3.2.1 Preliminary Research.....	18
3.2.1.1 Preparation of Dragon Fruit Peel Powder.....	18
3.2.1.2 Preparation of Dragon Fruit Pectin.....	19
3.2.2 Main Research Stage I.....	20

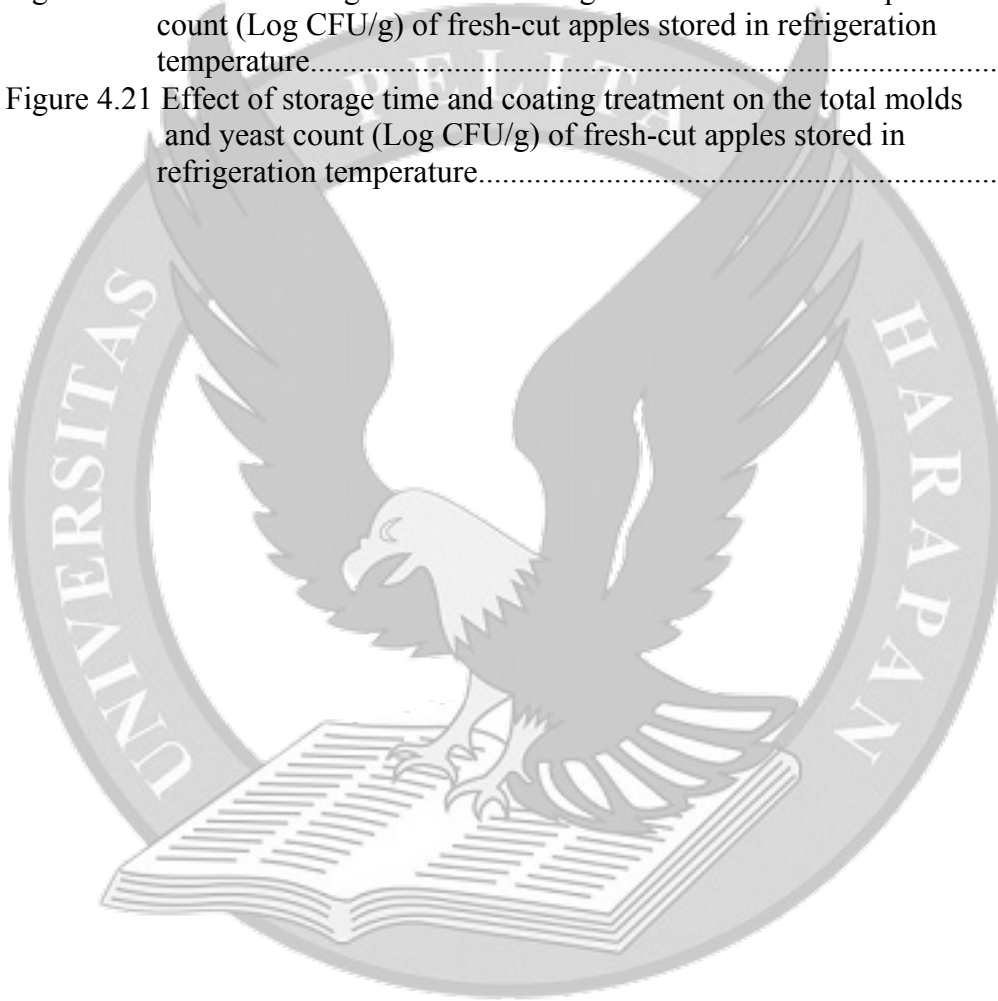

3.2.3 Main Research Stage II.....	21
3.3 Experimental Design.....	23
3.3.1 Main Research Stage I.....	23
3.3.2 Main Research Stage II.....	24
3.4 Procedure of Analyses.....	26
3.4.1 Moisture Content (AOAC, 2005).....	26
3.4.2 Ash Content (AOAC, 2005).....	27
3.4.3 Protein Content (AOAC, 2005).....	27
3.4.4 Fat Content (AOAC, 2005).....	28
3.4.5 Carbohydrate Content (AOAC, 2005).....	29
3.4.6 Yield (Azad, <i>et al.</i> , 2014).....	29
3.4.7 Equivalent Weight (Akili, <i>et al.</i> , 2012).....	29
3.4.8 Methoxyl Content (Suwoto, <i>et al.</i> , 2017).....	30
3.4.9 Galacturonic Acid Content (Akili, <i>et al.</i> , 2012).....	30
3.4.10 Degree of Esterification (DE) (Akili, <i>et al.</i> , 2012).....	31
3.4.11 Thickness (Fazilah, <i>et al.</i> , 2011).....	31
3.4.12 Water Vapor Transmission Rate (ASTM, 1995 with modification).....	31
3.4.13 Tensile Strength and Elongation (Dashipour, 2014).....	32
3.4.14 Hardness (Chiabrando and Giacalone, 2013).....	32
3.4.15 Weight Loss (AOAC, 1994).....	32
3.4.16 Total Plate Count (TPC) and Total Molds and Yeast (Ribeiro, <i>et al.</i> , 2007; Ogawa, <i>et al.</i> , 2014 with modification).....	33
3.4.17 Lightness (Velickova, <i>et al.</i> , 2013).....	34
3.4.18 Total Titratable Acidity (TTA) (Rocha and Morais, 2003 with modification).....	34
3.4.19 Total Dissolved Solid (AOAC, 2005).....	35
CHAPTER IV RESULTS AND DISCUSSIONS.....	36
4.1 Dragon Fruit Peel Powder.....	36
4.2 Characteristics of Pectin from Dragon Fruit Peel Powder.....	37
4.2.1 Pectin Yield.....	37
4.2.2 Moisture and Ash Content of Dragon Fruit Pectin.....	39
4.2.3 Equivalent Weight of Dragon Fruit Pectin.....	40
4.2.4 Methoxyl Content of Dragon Fruit Pectin.....	41
4.2.5 Galacturonic Acid Content of Dragon Fruit Pectin.....	42
4.2.6 Degree of Esterification of Dragon Fruit Pectin.....	42
4.3 Characteristics of Edible Films.....	43
4.3.1 Thickness.....	43
4.3.2 Tensile Strength of Edible Films.....	45
4.3.3 Elongation of Edible Films.....	47
4.3.4 Water Vapor Transmission Rate of Edible Films.....	48

4.4 Selected Edible Film Formulation	51
4.5 Effects of Edible Film Application on Fresh-cut Apples Quality during Storage	52
4.5.1 Weight loss of Fresh-cut Apples during Storage	52
4.5.1.1 Fresh-cut Apples Stored in Room Temperature	52
4.5.1.2 Fresh-cut Apples Stored in Refrigeration Temperature	53
4.5.2 Hardness of Fresh-cut Apples during Storage	55
4.5.2.1 Fresh-cut Apples Stored in Room Temperature	55
4.5.2.2 Fresh-cut Apples Stored in Refrigeration Temperature	56
4.5.3 Lightness of Fresh-cut Apples during Storage	58
4.5.3.1 Fresh-cut Apples Stored in Room Temperature	58
4.5.3.2 Fresh-cut Apples Stored in Refrigeration Temperature	60
4.5.4 Total Titratable Acidity of Fresh-cut Apples during Storage	62
4.5.4.1 Fresh-cut Apples Stored in Room Temperature	62
4.5.4.2 Fresh-cut Apples Stored in Refrigeration Temperature	64
4.5.5 Total Dissolved Solids of Fresh-cut Apples during Storage	65
4.5.5.1 Fresh-cut Apples Stored in Room Temperature	65
4.5.5.2 Fresh-cut Apples Stored in Refrigeration Temperature	66
4.5.6 Total Plate Count and Total Molds and Yeast Count of Fresh-cut Apples during Storage	68
4.5.6.1 Fresh-cut Apples Stored in Room Temperature	68
4.5.6.2 Fresh-cut Apples Stored in Refrigeration Temperature	71
 CHAPTER V CONCLUSIONS AND SUGGESTIONS	 75
5.1 Conclusions	75

Appendix A	
Proximate Analysis Result of Dragon Fruit Peel Powder.....	A-1
Result of Dragon Fruit Peel Powder Yield	A-1
Moisture Content Result of Dragon Fruit Peel Powder	A-2
Ash Content Result of Dragon Fruit Peel Powder	A-3
Fat Content Result of Dragon Fruit Peel Powder	A-4
Protein Content Result of Dragon Fruit Peel Powder	A-5
Carbohydrate Content Result of Dragon Fruit Peel Powder.....	A-6
Appendix B	
Results of Dragon Fruit Pectin Analyses	B-1
Result of Dragon Fruit Pectin Yield	B-1
Moisture Content Result of Dragon Fruit Pectin	B-1
Ash Content Result of Dragon Fruit Pectin	B-2
Equivalent Weight Result of Dragon Fruit Pectin	B-3
Methoxyl Content Result of Dragon Fruit Pectin	B-5
Galacturonic Acid Content Result of Dragon Fruit Pectin	B-6
Degree of Esterification Result of Dragon Fruit Pectin.....	B-7
Appendix C	
Result of Edible Film Thickness, Tensile Strength and Elongation	C-1
Appendix D	
Result of Edible Film Water Vapor Transmission Rate	D-1
Appendix E	
Weight Loss Result of Fresh-cut Apples	E-1
Appendix F	
Hardness Result of Fresh-cut Apples.....	F-1
Appendix G	
Lightness Result of Fresh-cut Apples	G-1
Appendix H	
Total Titratable Acidity Result of Fresh-cut Apples.....	H-1
Appendix I	
Total Dissolved Solids Result of Fresh-cut Apples	I-1

Appendix J

Total Plate Count Result of Fresh-cut ApplesJ-1
Total Molds and Yeast Count Result of Fresh-cut ApplesJ-7
