

ACKNOWLEDGEMENT

The foremost gratitude is to Lord God for His endless blessings and guidance to the author in completing this thesis entitled “CHARACTERIZATION OF ANTIMICROBIAL EDIBLE FILMS WITH SINGLE AND DOUBLE EMULSIONS FROM CLOVE (*Syzygium aromaticum*) OIL”.

This thesis report was written based on the research conducted from August 2018 to November 2018. This thesis was written as the partial fulfillment of the academic requirement to obtain the degree of *Sarjana Teknologi Pertanian Strata Satu*, Food Technology Study Program, Faculty of Science and Technology, Universitas Pelita Harapan, Tangerang.

The author realizes that this thesis would not be possible to be completed well and in time without the guidance, assistance, prayers, and supports of many parties. Therefore, the author would like to take this opportunity to express her gratitude to those who have helped and supported during the completion of this final project, including:

1. Eric Jobiliong, Ph.D. as Dean of Faculty of Science and Technology.
2. Dela Rosa, S.Si, M.M.,M.Sc.,Apt. as Vice Dean of Faculty of Science and Technology.
3. Laurence, M.T. as Director of Administration and Student Affair of Faculty of Science and Technology.
4. Ir. W. Donald R. Pokatong, M.Sc., Ph.D. as Head of Food Technology Study Program for the chance to conduct the thesis project and guidance throughout the final project period.
5. Ratna Handayani, MP. as Vice Head of Food Technology Study Program for the guidance throughout the final project period.
6. Natania, M. Eng. as thesis supervisor and Head of Food Processing Laboratory for the time, guidance, support, and assistance throughout the whole process of research proposal to the completion of the thesis project.

7. Dr. Adolf J. N. Parhusip, M.Si. as thesis examiner and as Head of Microbiology Laboratory and Yuniwaty Halim, M.Sc. as thesis examiner and as the Head of Quality Control and Research Laboratory, for the critics and useful insights in the writing of this thesis.
8. Tagor M. Siregar, M.Si. as the Head of Chemistry Laboratory where the author conducted the thesis project.
9. Yosafat, Darius, Adzie, Adhi, Ari for the help and assistance during the work in the laboratory.
10. All other lecturers, lecturer assistant and staffs of Food Technology Study Program for the support during the thesis project period.
11. Beloved parents Guntur Setiawan and Merry Koswara, and dearest brother and sister Ady Wijaya and Feby Priscalia for the endless love, support and prayers given to the author during the thesis completion.
12. Adrian Haryanto as the author's partner for the endless love, patience, support and company.
13. Jordan Bernando as Aussie mate and Jennifer Alvionita for the never-ending support, help, and togetherness shared from the beginning until the end of the thesis project.
14. Gracia, Joanina, Liana, Kaleb, Vella, Meriani for the help and support during the laboratory works.
15. Mei Diana, Rocky, Yohanna, Ellen, Vania, Caryn for the support during thesis completion and throughout the entire study in UPH.
16. All members of Pangan 8 2015 including Naomi, Liana, Teresa, Samuel, Wilbert, Laura, Ellys, Zefanya, Felisia, Yanetritien.
17. All members of Food Technology Class C Batch 2014 and 2015 for the togetherness.
18. Michelle Clarista, Angeline Clarissa, Jessica Carolina, who, despite the long distance, were very supportive.
19. All other friends and relatives who cannot be mentioned one by one, but have supported the author during the thesis completion.

The author realizes that this report is far from perfection and might have done some mistakes either during the research process of the completion of this report. Therefore, the author would appreciate any criticism and suggestions given to this report. Finally, the author hopes that this report can be beneficial to the readers. Thank you.

Tangerang, February 2019

(Giovani Fransisca Setiawan)

COVER	
STATEMENT OF THESIS AUTHENTICITY	
APPROVAL BY THESIS SUPERVISOR	
APPROVAL BY THESIS EXAMINATION COMMITTEE	
ABSTRACT	v
ACKNOWLEDGEMENT	vi
TABLE OF CONTENTS	ix
LIST OF FIGURES	xii
LIST OF TABLES	xiii
LIST OF APPENDICES	xiv
CHAPTER I INTRODUCTION	
1.1 Background	1
1.2 Research Problem.....	3
1.3 Research Objectives	3
1.3.1 General Objective.....	3
1.3.2 Specific Objectives.....	4
CHAPTER II LITERATURE REVIEW	
2.1 Clove	5
2.1.1 Clove Oil	6
2.2 Extraction Method.....	8
2.3 Emulsions	8
2.3.1 Double Emulsions	9
2.3.2 PGPR	11
2.3.3 Guar Gum	11
2.4 Edible Films	12
2.4.1 Starch.....	14
2.4.2 Glycerol	14
2.5 Food Microbial Contaminant.....	15
2.5.1 <i>Escherichia coli</i>	15
2.5.2 <i>Staphylococcus aureus</i>	15
2.5.3 <i>Aspergillus niger</i>	16
2.5.4 <i>Rhizopus stolonifer</i>	16
CHAPTER III RESEARCH METHODOLOGY	
3.1 Materials and Equipment	18
3.2 Research Stages.....	19
3.2.1 Preliminary Stage	19
3.2.1.1 Extraction of Clove Essential Oil.....	20
3.2.1.2 Antimicrobial Activity Testing	21
3.2.1.2.1 Rejuvenation of Bacteria.....	21
3.2.1.2.2 Rejuvenation of Molds.....	22

3.2.1.2.3 MIC, MBC, and MFC Determination	24
3.2.2 Research Stage I	26
3.2.2.1 Preparation of Emulsions	27
3.2.3 Research Stage II.....	28
3.2.3.1 Preparation of Edible Films.....	29
3.3 Experimental Design.....	30
3.3.1 Preliminary Stage	30
3.3.2 Research Stage I	30
3.3.2 Research Stage II.....	33
3.4 Analytical Procedures	35
3.4.1 Yield (Amelia <i>et al.</i> , 2017).....	35
3.4.2 Droplet size (Frascareli <i>et al.</i> , 2011 with modification)	35
3.4.3 Viscosity (Ali <i>et al.</i> , 2014 with modification).....	35
3.4.4 Stability by Centrifugation (Pulatsu <i>et al.</i> , 2017).....	35
3.4.5 Creaming Stability (Hadnadev <i>et al.</i> , 2013 with modification)	36
3.4.6 Thickness (Galus and Kadzinska, 2015)	36
3.4.7 Opacity (Galus and Kadzinska, 2015).....	36
3.4.8 Tensile Strength and Elongation at Break (Dashipour <i>et al.</i> , 2014).....	37
3.4.9 Water Vapor Transmission Rate (ASTM, 1995 with modifications).....	37
3.4.10 Swelling Index (Galus and Kadzinska, 2015).....	38
3.4.11 Antimicrobial Activity of Edible Films (Bahram <i>et al.</i> , 2013 with modifications).....	38
CHAPTER IV RESULTS AND DISCUSSIONS	
4.1 Preliminary Stage	40
4.1.1 Identification of Clove Taxonomy	40
4.1.2 Yield of Clove Oil	40
4.1.3 MIC, MBC, and MFC Determination	41
4.2 Research Stage I – Characterization of Emulsions	44
4.2.1 Droplet size.....	45
4.2.2 Viscosity	47
4.2.3 Stability of Emulsions	48
4.3 Research Stage II – Characterization of Edible Films	49
4.3.1 Appearance	50
4.3.2 Thickness.....	50
4.3.3 Opacity	52
4.3.4 Tensile Strength.....	54
4.3.5 Elongation at Break	56
4.3.6 Water Vapor Transmission Rate	58
4.3.7 Swelling Index.....	59
4.3.8 Antimicrobial Activity	61

CHAPTER V CONCLUSIONS AND SUGGESTIONS	
5.1 Conclusions	64
5.2 Suggestions	65
BIBLIOGRAPHY	66
APPENDICES	72

LIST OF APPENDICES

	page
Appendix A	
Identification of Clove Taxonomy.....	A-1
Appendix B	
Clove Oil Yield.....	B-1
Appendix C	
Identification of Test Microorganisms.....	C-1
Appendix D	
Calculation for MIC, MBC, and MFC value.....	D-1
Appendix E	
Droplet Size of Emulsions.....	E-1
Statistical Analysis of Droplet Size.....	E-3
Appendix F	
Viscosity of Emulsions.....	F-1
Statistical Analysis of Viscosity of Emulsions.....	F-1
Appendix G	
Stability of Emulsions by Centrifugation.....	G-1
Creaming Index.....	G-2
Appendix H	
Thickness of Edible Films.....	H-1
Opacity of Edible Films.....	H-2
Statistical Analysis of Thickness.....	H-3
Statistical Analysis of Opacity.....	H-4
Appendix I	
Tensile strength and elongation of edible films.....	I-1
Statistical Analysis of Tensile Strength.....	I-2
Statistical Analysis of Elongation.....	I-3
Appendix J	
Water Vapor Transmission Rate.....	J-1
Statistical Analysis of Water Vapor Transmission Rate.....	J-2
Appendix K	
Swelling Index of Edible Films.....	K-1
Statistical Analysis of Swelling Index.....	K-2

Appendix L

Antibacterial Activity of Edible Films.....	L-1
Statistical Analysis of Antibacterial Activity.....	L-2
Antifungal Activity of Edible Films.....	L-3
Statistical Analysis of Antifungal Activity.....	L-4
