

ACKNOWLEDGEMENTS

The foremost gratitude is to Lord Jesus Christ for His blessings and guidance to the author in completing this thesis entitled “CHARACTERIZATION OF CORN AND TAPIOCA STARCH BASED EDIBLE FILMS WITH DOUBLE EMULSION FROM CLOVE OIL (*Syzygium aromaticum*) AS ANTIMICROBIAL” This thesis was written as the partial fulfillment of the academic requirement to obtain the degree of *Sarjana Teknologi Pertanian Strata Satu*, Food Technology Study Program, Faculty of Science and Technology, Universitas Pelita Harapan, Tangerang.

The author realizes that this thesis would not be possible to be completed well and in time without the guidance, assistance, prayers and supports of many parties. Therefore, the author would like to take this opportunity to express his gratitude to those who have helped and supported during the completion of this final project, including:

1. Natania, M.Eng., as Head of Food Processing Laboratory and thesis supervisor who has guided, supported, given useful inputs and time from the beginning of thesis proposal until the thesis was completed.
2. Eric Jobiliong, Ph.D., Dean of Faculty of Science and Technology in Universitas Pelita Harapan.
3. Dela Rosa, S.Si, M.M., M.Sc., Apt. Vice Dean of Faculty of Science and Technology in Universitas Pelita Harapan.
4. Laurance, S.T., M.T., as Director of Finance and Student Affair of Faculty of Science and Technology in Universitas Pelita Harapan.

5. Ir. W. Donald R. Pokatong, M.Sc., Ph.D., Head of Food Technology Study Program in Universitas Pelita Harapan, and as head of examiner for the support, guidance, and useful inputs regarding thesis revision.
6. Ratna Handayani, MP, Deputy Head of Food Technology Study Program in Universitas Pelita Harapan.
7. Yuniwaty Halim, M.Sc., as Head of Quality Control & Research Laboratories and examiners for the support and useful suggestion regarding this thesis project.
8. Dr. Adolf J. Parhusip, as Head of Microbiology Laboratory; Dr. Tagor M. Siregar, as Head of Chemistry Laboratory.
9. Yosafat, Darius, Adzie, Adhi as Laboratory assistant who has helped the author and giving useful information.
10. All others lecturers, lecturers assistant and staffs in Food Technology Study Program for the support and help given to the author during the project.
11. Beloved parents, Winardi Harsawiguna and Jasinta Junianti Budiman, and dearest brother and sister, Ignatius Jordi Bernandi Harsawiguna and Elizabeth Jovita Bernadia Harsawiguna, for the endless love, support, and prayers given to the author during the thesis completion.
12. Giovani Fransisca as my partner for the never-ending support and help during years of study in Universitas Pelita Harapan.
13. Jennifer Alvionita for the help and support from the beginning until the end of the thesis project.
14. Gracia, Joanina, Vanessa, Clairine as friend under supervision for the support.

15. Ellen Tjakrakusuma, Meidiana Sonatha, Rocky, Caryn Fidelia, Vania Lucida Franz Fernando, Felicia Wie, Rivi, Jesslyn, Dea Lambertha for the supports during years of study in Universitas Pelita Harapan.
16. All students from Food Technology Batch 2014 especially C class for the support and togetherness during years of study in Universitas Pelita Harapan.
17. All students from Food Technology Batch 2015 especially C class for the support and togetherness during years of study in Universitas Pelita Harapan
18. All my friends in church for the support and prayers.
19. All other friends and relative who are not yet mentioned, but have supported the author during the thesis completion.

The author realizes that this report is far from perfection and might have done some mistakes either during the research process or the completion of this report. Therefore, the author would appreciate any criticisms and suggestions given to this report. Finally, the author hopes that this report can be beneficial for the readers. Thank you.

Tangerang, February 2019

Ignatius Jordan Bernando Harsawiguna

COVER PAGE	
STATEMENT OF THESIS AUTHENTICITY	
APPROVAL BY THESIS SUPERVISOR	
APPROVAL BY THESIS EXAMINATION COMMITTEE	
ABSTRACT.....	v
<i>ABSTRAK</i>	vi
ACKNOWLEDGEMENTS.....	vii
TABLE OF CONTENTS.....	x
LIST OF FIGURES.....	xiii
LIST OF TABLES.....	xiii
LIST OF APPENDICES.....	xvi
CHAPTER I INTRODUCTION	
1.1 Background.....	1
1.2 Research Problem.....	2
1.3 Objectives.....	3
1.3.1 General Objectives.....	3
1.3.2 Specific Objectives.....	3
CHAPTER II LITERATURE REVIEW	
2.1 Clove.....	4
2.1.1 Clove Oil.....	5
2.1.2 Extraction of Clove Oil.....	6
2.2 Double Emulsion.....	7
2.3 Edible Film and Coating.....	8
2.3.1 Starch Based Edible Film.....	10
2.3.1.1 Corn Starch.....	11
2.3.1.2 Tapioca Starch.....	11

2.3.2 Plasticizer.....	11
2.4 Microbial Contaminants.....	12

CHAPTER III RESEARCH METHODOLOGY

3.1 Materials and Equipment.....	14
3.2 Research Methods.....	15
3.2.1 Preliminary Stage.....	16
3.2.1.1 Clove Oil Isolation.....	16
3.2.1.2 Determination of Antimicrobial Activity.....	17
3.2.1.2.1 Rejuvenation of Bacteria.....	17
3.2.1.2.2 Rejuvenation of Molds.....	18
3.2.1.2.3 MIC, MBC, MFC Determination.....	19
3.2.2 Main Research Stage I.....	20
3.2.3 Main Research Stage II.....	21
3.3 Experimental Design.....	23
3.3.1 Preliminary Stage.....	23
3.3.2 Research Stage I.....	23
3.3.3 Research Stage II.....	23
3.4 Analytical Procedure.....	25
3.4.1 Yield.....	25
3.4.2 Droplet Size.....	26
3.4.3 Stability by Centrifugation.....	26
3.4.4 Stability by Creaming Index.....	26
3.4.5 Viscosity.....	27
3.4.6 Thickness.....	27
3.4.7 Tensile Strength and Elongation.....	27
3.4.8 Opacity.....	27
3.4.9 Swelling Index.....	28
3.4.10 Water Vapor Transmission Rate.....	28
3.4.11 Antimicrobial Activity.....	29

CHAPTER IV RESULTS AND DISCUSSION

4.1 Taxonomical Verification of Clove	30
4.2 Clove Oil.....	30
4.2.1 Yield of Clove Oil.....	30
4.2.2 MIC, MBC, and MFC of Clove Oil.....	31
4.3 Clove Oil Double Emulsion Characteristic.....	33
4.3.1 Droplet Size	33
4.3.2 Viscosity	34
4.3.3 Stability	35
4.4 Edible Film Characteristics.....	36
4.4.1 Appearance	36
4.4.2 Thickness	37
4.4.3 Tensile Strength	39
4.4.4 Elongation.....	40
4.4.5 Opacity.....	42
4.4.6 Swelling Index	44
4.4.7 Water Vapor Transmission Rate (WVTR)	45
4.4.8 Antimicrobial Activity.....	47
CHAPTER V CONCLUSIONS AND SUGGESTIONS	
5.1 Conclusions.....	50
5.2 Suggestions	51
BIBLIOGRAPHY.....	52
APPENDICES	58

LIST OF FIGURES

	page

LIST OF APPENDICES

	page
Appendix A. Verification of Clove Taxonomy	A-1
Appendix B. Yield of Clove Oil	B-1
Appendix C. Identification of Test Microorganism.....	C-1
Appendix D. Calculation of MIC, MBC, and MFC Value.....	D-1
Appendix E. Droplet Size of Emulsion.....	E-1
Appendix F. Viscosity of Emulsion.....	F-1
Appendix G. Stability of Emulsions	G-1
Appendix H. Mechanical Properties of Edible Film.....	H-1
Appendix I. Opacity of Edible Film	I-1
Appendix J. Swelling Index.....	J-1
Appendix K. Water Vapor Transmission Rate	K-1
Appendix L. Antimicrobial Activity.....	L-1
