

ACKNOWLEDGEMENTS

The author would first and foremost thank Lord Jesus Christ for the unlimited blessing which has been granted to the author, that the thesis report for “EFFECT OF SEVERAL LEAF CRUDE EXTRACTS AND THEIR CONCENTRATIONS ON ANTIOXIDANT AND PHYSICOCHEMICAL CHARACTERISTICS OF PINEAPPLE SORBET” can be completed well in a timely manner.

This thesis report is written based on the research which has been conducted from August 2018 to December 2018. The thesis research is the final compulsory requirement for students in the Food Technology Study Program, Faculty of Science and Technology, Universitas Pelita Harapan. This thesis research has also been beneficial for the author, as a means through which the obtained knowledge may be applied and also as a new experience which the author has not had during class learning activities.

In the process of writing this thesis report, the author was supported by many people. In order to give gratitude where it is due, the author would like to deeply thank:

- 1) Ir. W. Donald R. Pokatong, M.Sc., Ph.D., as the Head of Food Technology Study Program who has provided the opportunity to conduct the thesis research and as Thesis Supervisor who has supervised, encouraged and supported the author throughout the whole process of research, revision and completion of the thesis.
- 2) Eric Jobiliong, Ph.D. as the Dean of the Faculty of Science and Technology.
- 3) Dela Rosa M.M, M.Sc.Apt. as the Vice Dean of the Faculty of Science and Technology.
- 4) Laurence, M.T. as the Director of Administration and Student Affairs of the Faculty of Science and Technology.
- 5) Ratna Handayani, M.P. as the Vice Head of Food Technology Study Program for the guidance and assistance during the author’s research.

- 6) Dr. Tagor M. Siregar, Dr. Adolf J.N. Parhusip, Natania, M.Eng and Yuniwaty Halim, M.Sc. as the respective heads of the respective laboratories of chemistry, microbiology, food processing, quality control and research, for the lab entry permit, instructions and support given to the author during the thesis research.
- 7) Christopher I. Rimba, S.T.P, Fiametta Ester S.T.P, and Bryan Anders S.T.P as assistant lecturers for the practical help and support.
- 8) Darius, Yosafat, Adzie and Adi for the practical laboratory equipment support and facilitation.
- 9) The author's dear family for the wholehearted support throughout the thesis research.
- 10) Danielle Linggar and Nathania Sofie as the author's laboratory partners for the emotional support, meaningful discussions and collective hard work during the research.
- 11) Stephen Kemala, Emil Kristiawan, Samuel Jusuf Roestan, James Ariputra and Rheza Theodorus Salim as the author's friends for the emotional support throughout the final thesis research.
- 12) All students of the Food Technology Study Program of Universitas Pelita Harapan who partook the final thesis research together with the author this year.
- 13) All friends and relatives of the author who have not been mentioned but have also given support to the author throughout the thesis period and the completion of the report.

The author realizes that this report is still far from perfect. Therefore, the author would like to apologize for any mistakes made in this report. The author also hopes that this report may be beneficial to those who will read it in the future.

Tangerang, February 2018

COVER	
STATEMENT OF THESIS AUTHENTICITY	
APPROVAL BY THESIS SUPERVISOR	
APPROVAL BY THESIS EXAMINATION COMMITTEE	
ABSTRACT.....	v
<i>ABSTRAK</i>	vi
ACKNOWLEDGEMENTS	vii
TABLE OF CONTENTS	ix
LIST OF TABLES	xii
LIST OF FIGURES	xiii
LIST OF APPENDICES	xv
CHAPTER I INTRODUCTION	
1.1 Background.....	1
1.2 Research Problem	2
1.3 Objectives	2
1.3.1 General Objective.....	2
1.3.2 Specific Objectives.....	3
CHAPTER II LITERATURE REVIEW	
2.1 Functional Food	4
2.2 Antioxidant	5
2.2.1 DPPH Assay for Antioxidants	7
2.3 African Bitter Leaf (<i>Vernonia amygdalina</i> Del.).....	8
2.3.1 Antioxidant Characteristics of African Bitter Leaf.....	10
2.4 Betel Leaf (<i>Piper betle</i> L.).....	12
2.4.1 Antioxidant Characteristics of Betel Leaf.....	13
2.5 Green Grass Jelly Leaf (<i>Cyclea barbata</i> Miers).....	14
2.5.1 Antioxidant Characteristics of Green Grass Jelly Leaf.....	15
2.6 Pineapple.....	16

2.7 Sorbet.....	17
-----------------	----

CHAPTER III RESEARCH METHODOLOGY

3.1 Materials and Equipment.....	20
3.2. Research Stage I.....	20
3.3 Research Stage II.....	23
3.4 Experimental Design.....	24
3.4.1 Research Stage I.....	24
3.3.2 Research Stage II.....	25
3.4 Analytical Methods.....	28
3.4.1 Antioxidant Analysis (Shimamura <i>et al</i> , 2014).....	28
3.4.2 Total Phenolic Content (Ainsworth & Gillespie, 2007)	29
3.4.3 Total Flavonoid Content (Chang <i>et al</i> , 2002).....	30
3.4.4 Measurement of pH (AOAC, 2005).....	30
3.4.5 Measurement of Total Soluble Solids.....	30
3.4.6 Measurement of Total Titratable Acidity (AOAC, 2005).....	31
3.4.7 Color Profile Analysis (Sahin & Sumnu, 2006).....	31
3.4.8 Sorbet Mix Viscosity (Sahin & Sumnu, 2006).....	32
3.4.9 Melting Time (Granger <i>et al</i> . 2005 with modifications)....	33
3.4.10 Sensory Evaluation (Lawless & Heymann, 2010).....	33
3.5 Proximate Analysis Methods.....	34
3.5.1 Moisture Content (BSN, 1992).....	34
3.5.2 Protein Content (BSN, 1992).....	34
3.5.3 Fat Content (BSN, 1992).....	35
3.5.4 Ash Content (BSN, 1992).....	36
3.5.5 Carbohydrate.....	36

CHAPTER IV RESULTS AND DISCUSSION

4.1 Leaf Powder Produced.....	37
4.2 Yield and antioxidant characteristics of leaf extracts.....	38
4.2.1 African bitter leaf.....	38

4.2.2 Green grass jelly leaf.....	39
4.2.3 Betel leaf	40
4.3 Total phenolic and total flavonoid content of extracts	41
4.4 Antioxidant characteristics of pineapple sorbet.....	42
4.4.1 Antioxidant activity.....	42
4.4.2 Total phenolic content.....	43
4.4.3 Total flavonoid content	45
4.5 Sensory evaluation of pineapple sorbet	46
4.6 Physicochemical characteristics of pineapple sorbet.....	48
4.6.1 Melting time	48
4.6.2 pH.....	49
4.6.3 Total titratable acidity	49
4.6.4 Color.....	50
4.6.5 Viscosity.....	51
4.6.6 Total soluble solids	51
4.7 Proximate characteristics of pineapple sorbet	52
4.7.1 Moisture	52
4.7.2 Ash	52
4.7.3 Protein	53
4.7.4 Fat.....	53
4.7.5 Carbohydrate	54
CHAPTER V CONCLUSIONS AND SUGGESTIONS	
5.1 Conclusions.....	55
5.2 Suggestions	56
BIBLIOGRAPHY	57
APPENDICES.....	57
