ACKNOWLEDGEMENTS

Praise to the Lord Jesus Christ for all blessings and guidance He has given to the writer during the final project so that the thesis and also the thesis report can be finished in accordance with the time allowed and excellently. This thesis was done as the requirement to achieve the degree in Sarjana Strata Satu Teknologi Pertanian. The title of the thesis is “THE EFFECT OF ADDITION OF LEMON AND CITRIC ACID TO THE QUALITY OF PUREE FROM PAPAYA (Carica papaya L.).

The writer realizes that she could not succeed without help and support from all. The writer wants to express her thankfulness and appreciation for all support and guidance that encourage and strengthen the writer so that this final project can be completed. Therefore, on this occasion, the writer would like to thank those who helped and participate during the final project and completion:

1. My father Hendra Amanto, my mother Phang Se Tjin, and my brother Christian Ekajaya Gunawan who always support, pray, and encourage the writer during this final project. They are always there for me in every condition and ready to drive me when I need to find something for final project materials. I love you all.

2. Prof. Dr. Monang Manullang, MSc., PhD as the final project supervisor who helped the writer during final project. Thank you Sir for your time, guidance, advice, and support. As my supervisor, he regards or assumes me as his own daughter and he always encourage me to work hard. His advice and input during final projects really helpful for the writer.
3. Sisi Patricia L. A. S.TP, M.Eng as the final project co-supervisor who gave a lot of support, guidance, and direction patiently during this final project until finished.

4. Mrs. Nuri Arum Anugrahati, MP as the Head of Food Technology Department, Universitas Pelita Harapan.

5. Mr. Jeremia as the Head of Food Processing Laboratory, Ms. Mery as the Head of Quality Control Laboratory, Ms. Ratna as the head of Research Laboratory, Mr. Adolf as the Head of Microbiology Laboratory, and Mr. Tagor as the Head of Chemistry Laboratory who gave permission for the completion of the final project.

6. Mr. Donny, Mr. Yos, and Mr. Rudy as the laborant, Mr. Anton, Ms. Putri, and other members of Food Technology Department who helped and guided the writer during completion of final project.

7. Albertus Afrianto, my dear, for the helps and support during this final project. Thank you for your care, motivation, patience, and love.

8. De’Fanny Endi, Nanik Wijaya, Ricky Winata, Dharmawan Laksana, and Ian Danarko as the writer’s best friend who had supporting each other during this final project and outside. And Agustinus Adrian Arinta as also the writer’s best friend but not doing his final project this semester who had given support to us all. Hope our friendship can be forever.

9. All friends with the same supervisor, De’Fanny Endi, Nanik Wijaya, Ricky Winata, Dharmawan Laksana, Ian Danarko, Cindy Hendrani, Maria Nikee Janeta, Meliana Wijaya, and Irene Velecia Sugiarto; thank you for all the time we have shared and supported each other. Although some of us not from the
same class, but through this final project we can build relationship become friend.

10. All C class of Food Technology 2007 for the support and also best memory we had shared together.

11. Everyone whose name cannot be mentioned one by one, who has helped the writer during this final project.

The writer realizes and apologizes if there might be some shortcomings in this final project report. Criticism and constructive suggestions will be very useful, so that the writer can improve to become better in the future. The writer hopes this final project report will be useful for people who read it.

Tangerang, January 2011
