THE EFFECT OF ENVIRONMENTAL UNCERTAINTY ON TAX AVOIDANCE WITH CORPORATE GOVERNANCE AS MODERATING VARIABLE IN MANUFACTURING COMPANIES FOR THE PERIOD 2017-2019

(xii + 65 pages; 2 images; 13 tables; 2 appendices)

The study aims to examine the effect of environmental uncertainty on tax avoidance and the moderating effects of corporate governance. Data collection uses secondary data derived from the financial statements and annual reports of companies listed on the Indonesia Stock Exchange for the period 2017-2019 and using the S&P Capital IQ database. The population of this study consists of 80 companies with an observation period of 3 years. Thus, the total of research observations are 240 observations obtained by purposive sampling method. The results showed that environmental uncertainty negatively affects tax avoidance. The indicators of corporate governance which is independent board of commissioners can strengthen the relationship between environmental uncertainty and tax avoidance. While the audit quality is proven to weaken the relationship between environmental uncertainty and tax avoidance.
