HUBUNGAN ANTARA *BIG FIVE PERSONALITY* DENGAN *SELF-EFFICACY* MAHASISWA YANG SEDANG MENGERJAKAN SKRIPSI DI UNIVERSITAS X TANGERANG

(xiii + 34 halaman: 9 tabel; 6 lampiran)

Proses mengerjakan skripsi tidak mudah, apalagi dengan hambatan-hambatannya. Hal ini dapat membuat proses pengerjaan tidak lancar, yang akhirnya membuat kelulusan mahasiswa tidak tepat waktu. Fenomena ini juga terjadi pada mahasiswa Universitas X Tangerang. Untuk membantu mahasiswa tetap dapat mengerjakan skripsi dengan lancar di tengah hambatan, dibutuhkan *self-efficacy*. *Self-efficacy* ditemukan berhubungan dengan *Big Five Personality* mahasiswa, begitu pula sebaliknya, walaupun masih terdapat ketidakkonsistenan hubungan pada faktor *Big Five Personality* dengan *self-efficacy*. Selain itu juga belum ada penelitian yang meneliti hubungan keduanya pada mahasiswa spesifik yang mengerjakan skripsi. Oleh karena itu, penelitian ini bertujuan menguji/membuktikan faktor *Big Five Personality* mana yang benar-benar berhubungan dengan *self-efficacy* mahasiswa yang mengerjakan skripsi di Universitas X Tangerang. Penelitian ini menggunakan 254 orang sampel, data dikumpulkan dengan kuesioner *Google Form*. Berdasarkan analisa statistika, kelima faktor *Big Five Personality* berkorelasi positif dengan *self-efficacy* mahasiswa kecuali pada *Neuroticism* yang berkorelasi negatif. Koefisien korelasi *Conscientiousness* dengan *self-efficacy* mahasiswa paling tinggi.

Kata kunci: *Big Five Personality*; efikasi diri; mahasiswa; skripsi

ABSTRACT

Shannice Nathania Khodiat (01121180008)

THE CORRELATION BETWEEN BIG FIVE PERSONALITY AND SELF-EFFICACY OF X UNIVERSITY TANGERANG'S STUDENTS THAT ARE WORKING ON THEIR THESIS

(xiii + 34 pages: 9 tables; 6 attachments)

Working on thesis is not easy, especially considering obstacles that follow. These can affect the smoothness of students' working process, which can prevent them from graduating on-time. This also happens to X University Tangerang's students. To help them finish smoothly amidst all obstacles, self-efficacy is needed. Self-efficacy is correlated to students' Big Five Personality, and vice versa, even though there are still inconsistencies to which Big Five Personality factors correlate with self-efficacy. Besides, there has been no study examining these correlation to students working on their thesis. Therefore, this study is conducted to test/prove which Big Five Personality factors really correlate to self-efficacy of X University's students working on their thesis. This study adopted 254 samples, collected through Google Form questionnaires. Based on the statistical analysis, all Big Five Personality factors correlated positively with students' self-efficacy, excluding Neuroticism which correlated negatively. Conscientiousness has the highest correlation among all factors.

Keywords: Big Five Personality; self-efficacy; thesis; university students
