The data were analyzed using the outer model and the inner model through SmartPLS 3.3.3. The outer model consists of validity and reliability tests, while the inner model is tested through R-square, hypothesis testing (bootstrapping), and multicollinearity testing. The results of this study indicate that opportunity, planning, sociability, leadership have a positive and significant impact on the women entrepreneurial profile. Meanwhile, persistence does not have a positive effect on the women entrepreneurial profile.
