THE EFFECT OF PROFITABILITY, LEVERGAE AND LIQUIDITY ON TAX AVOIDANCE IN MANUFACTUR COMPANIES LISTED ON THE INDONESIAN STOCK EXCHANGE FOR THE YEAR 2016 – 2020

(xvi + 61 pages, 3 pictures, 13 table, 5 appendixes)

This research aimed to determine the effect of profitability, leverage and liquidiy on tax avoidance. Profitability was measured by return on assets, leverage was measured by debt to equity ratio, and liquidity was measured by current ratio. The research was quantitative. This study used secondary data obtained through the S&P Capital platform on manufacturing companies listed on the Indonesia Stock Exchange during the 2016 – 2020 period. The data collection technique used purposive sampling, where the total samples obtained are 34 companies. The data analysis technique used multiple linear regression analysis which is processed using SPSS Statistics version 25. The research result concluded that profitability had a positive and significant effect on dividend policy, while leverage had a negative and significant effect on dividend policy. The research result concluded that profitability had a positive but non-significant effect, liquidity had a negative and significant effect and liquidity had a positive and significant effect on tax avoidance.
