

ACKNOWLEDGEMENTS

The author's immense gratefulness in the name of the Father, Son and Holy Spirit for endless blessings that the author is given willpower and being kept out of the worst circumstances during writing process to complete this thesis with the title of "PHYSICOCHEMICAL AND SENSORY PROPERTIES OF JELLY CANDY PREPARED WITH DIFFERENT HYDROCOLLOIDS AND PLANT EXTRACTS".

This thesis was written based on the literature review from August 2021 to April 2022. This thesis was written as the final project to obtain the degree of *Sarjana Teknologi Pertanian*, Food Technology Study Program, Faculty of Science and Technology, Universitas Pelita Harapan. The author had received many supports, prayers and guidance from many people. This thesis also gives author more insights and to gain more knowledge.

This project would not possible to be done without any personnel who gave support, assistance, and guidance for the author. Therefore, the author would like to express huge gratitude for:

1. Ir. W. Donald R. Pokatong, M.Sc., Ph.D., Head of Food Technology Study Program, as thesis supervisor for the time, support, advice given from the thesis proposal preparation until thesis completion;
2. Eric Jobiliong, Ph.D., as Dean of Faculty of Science and Technology, Universitas Pelita Harapan, for the support given during the study in the Faculty of Science and Technology;
3. Dr. Nuri Arum Anugrahati, as Vice Dean of Faculty of Science and Technology, Universitas Pelita Harapan, for the support given during the study in the Faculty of Science and Technology;
4. Laurence, S.T., M.T., as Director of Faculty Administration and Student Affairs of Faculty of Science and Technology, Universitas Pelita Harapan, for the support given during the study in the Faculty of Science and Technology;

5. Ratna Handayani, M.P., as Deputy Head of Food Technology Study Program, for the support given during the study in the Faculty of Science and Technology;
6. All Lecturers and Staffs of Food Technology Study Program for the support given during the study in food technology study program;
7. Author's parents, brother, and cousins for the endless love, support, prayer, and motivation during thesis writing process;
8. Nicola Kristanto, Eliana Musa, and Wilbert Irwan as the author's friends for their time, supports, and prayers;
9. Other personnel who have not been mentioned above, who supports this thesis.

The author acknowledged that there might be shortcomings in this thesis report. Therefore, the author would like to apologize and welcomes any constructive feedback and suggestions, enabling the author to improve this report. Hopefully, the reader may find this report to be helpful and beneficial for the readers.
