LAW ENFORCEMENT OF ONLINE GAMBLING FROM THE PERSPECTIVE OF DIGNIFIED JUSTICE THEORY

(x+97 pages)

Gambling becomes a real or potential threat to social norms so that it can threaten the ongoing social order. Along with its development, technology-based gambling or online gambling grows and develops along with the increasing number of users of internet-based electronic communication tools. As a state apparatus carrying out law enforcement functions, maintaining security and public order as well as protecting, protecting and serving the community, the police are tasked with preventing and tackling the crime of online gambling. In this study, the author will examine the efforts of online gambling law enforcement using a dignified justice theory analysis knife. The formulation of the problem in this study, 1) How are law enforcement efforts against online gambling in Indonesia? 2) How is the law enforcement for online gambling in the perspective of the Theory of Dignified Justice? This research is examined by using a type of normative juridical research method. Normative juridical research is research that uses statutory regulations and various literatures that use primary data, secondary data, and tertiary data. The results of the study indicate that law enforcement efforts that can be carried out against perpetrators of online gambling crimes are preventive and repressive law enforcement efforts. Preventive efforts include cooperation with the Ministry of Communication and Informatics to block online gambling game sites, cooperation with other countries in tracking sources of online gambling, cyber patrols, and outreach to the public to prevent crime. Repressive efforts are carried out by taking decisive action in the form of arrests and imposing criminal sanctions on perpetrators of online gambling crimes based on Article 27 paragraph (2) jo. Article 45 paragraph (2) of the ITE Law, and Article 303 of the Criminal Code. Law enforcement of online gambling in the perspective of a dignified justice theory must be applied by upholding justice that humanizes humans. Noble values or volksgeist are also essential in the Theory of Dignified Justice so that efforts are needed to raise awareness to the public about the impact or danger of online gambling. Suggestions that can be given are the need for the procurement of sophisticated tools to detect activities related to online gambling as well as cooperating with the Police in other countries to prevent the entry of new airports into Indonesia and the need for improving the quality and knowledge of investigators in dealing with online gambling cases.
