PENGARUH KOMITE AUDIT DAN KUALITAS AUDIT TERHADAP AUDIT DELAY

(XIV + 48 pages: 1 figures; 5 table; 18 attachments)

The research carried out aims to analyze and observe the effect of the audit committee and audit quality on audit delay. The research sample comes from manufacturing sector companies that have been listed on the Indonesia Stock Exchange in the 2018-2021 period using the purposive sampling method, obtained 103 sample companies. This study uses data for a period of 4 years obtained from the company's official website, S&P Capital IQ, as well as information disclosure on the Indonesia Stock Exchange. In this study there is one dependent variable and four independent variables. The dependent variable in this study is audit delay, while the independent variables in this study are the number of audit committees, the number of audit committee independence, KAP reputation, and audit opinion. Based on the results of the research that has been carried out, it can be seen that there is an effect of the audit committee and audit quality on audit delay simultaneously. In addition, the results of this study also found that there was a negative influence between the number of audit committees, the number of audit committee independence, KAP reputation, and audit opinion on audit delay partially.
