THE EFFECT OF MARKETING MIX STRATEGY ON PATIENT SATISFACTION AND ITS IMPACT ON PATIENT LOYALTY IN OUTPATIENT SERVICES IN SILOAM HOSPITALS LIPPO VILLAGE

(xiv + 130 pages + 11 figure + 20 tables; 4 attachments)

Hospitals compete by presenting competitive services to be able to achieve patient satisfaction and loyalty by paying attention to marketing strategies. One way of marketing strategy is the marketing mix which consists of product, price, place, promotion, people, physical evidence, and process. The marketing mix has a very important role as a company strategy and policy to achieve customer satisfaction which will ultimately increase customer loyalty. This study proposes a new model from a modification of previous research. The purpose of this study was to examine and analyze the effect of product, price, place, promotion, people, physical evidence, and process on patient satisfaction and their impact on patient loyalty. The model in this study is a quantitative survey using a cross sectional approach. Respondent data was taken by purposive sampling using a questionnaire. There were 171 samples that met the requirements and were analyzed by PLS-SEM. The results showed that the seven antecedents of patient satisfaction had a significant and positive effect. The strongest influence is obtained from price and people.. Found a positive impact of patient satisfaction on patient loyalty in outpatient services. From the findings of this study, managerial implications can be drawn for the development of outpatient services so that they can help improve the quality of health in the community. There are a number of limitations followed by suggestions for further research.
