THE EFFECT OF ENTERPRISE RISK MANAGEMENT, INTELLECTUAL CAPITAL, AND COMPANY POLICY ON FIRM VALUE WITH GOOD CORPORATE GOVERNANCE AS MODERATING VARIABLE

(xii + 89 pages: 1 picture; 12 tables; 3 appendices)

This study examines the effect of Enterprise Risk Management, Intellectual Capital, and Corporate Policy on Firm Value, with Good Corporate Governance as a moderating variable. Using observation data from 141 samples of non-financial companies listed on the Indonesia Stock Exchange, and using multiple linear regression, the study found that Enterprise Risk Management has a negative effect on firm value. The study also found that corporate policy through dividend policy has a positive effect on firm value. In addition, the moderating variable of Good Corporate Governance is able to moderate the relationship between Enterprise Risk Management on firm value. However, the study found that Intellectual Capital does not have an effect on firm value. As well as the moderating variable Good Corporate Governance is not able to moderate the relationship between Disclosure of Enterprise Risk Management and Intellectual Capital on firm value and the same results are found that Good Corporate Governance is not able to moderate the relationship between company policy namely dividend policy on firm value
