ABSTRACT

THE INFLUENCE OF JOB AUTONOMY, EMPLOYMENT AND CAREER DEVELOPMENT ON THE INTENTION OF STAYING EMPLOYEES OF CENTRAL ASIA BANK TRAINEES THROUGH JOB SATISFACTION AS INTERVENING

(xvi+ 75 pages; 16 tables; 23 figures; 4 appendices)

Banking has the function of collecting and distributing public funds and aims to support the implementation of national development in the context of increasing the distribution of development and its results, economic growth and national stability, towards increasing the standard of living of the people at large. Human resources as a driving force in the service sector such as banking is an important factor to note. This study aims to examine the effect of Job Autonomy, Job Embeddedness and Career Development on the Intention to stay of Bank Central Asia Trainee Employees Through Job satisfaction as Intervening. This research was conducted on 43 Bank Central Asia trainee employees in Jakarta. The method used is quantitative with SEM-PLS analysis techniques. The results of the research show that all hypotheses are accepted and are positive. So it can be said that Job Autonomy, Job Embeddedness, Career Development and Job satisfaction have a positive influence on the intention to stay.
